Microsoft SC-200 Exam is an essential certification for security professionals who are responsible for security operations and incident response. Microsoft Security Operations Analyst certification is recognized globally and is highly valued by employers. It is an excellent way for security professionals to demonstrate their skills and knowledge and for organizations to ensure that their security professionals have the necessary skills and knowledge to protect their networks and systems from security threats.

Microsoft Security Operations Analyst Sample Questions (Q21-Q26):

NEW QUESTION # 21

You have an Azure subscription that has Azure Defender enabled for all supported resource types.

You create an Azure logic app named LA1.

You plan to use LA1 to automatically remediate security risks detected in Defenders for Cloud.

You need to test LA1 in Defender for Cloud.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 22

You have a Microsoft 365 E5 subscription.

You need to create a hunting query that will return every email that contains an attachment named Document.pdf. The query must meet the following requirements:

* Only show emails sent during the last hour.

* Optimize query performance.

How should you complete the query? To answer, select the appropriate options in the answer area. NOTE:

Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 23

You have a Microsoft Sentinel workspace.

You enable User and Entity Behavior Analytics (UEBA) by using Audit Logs and Signin Logs.

The following entities are detected in the Azure AD tenant:

- App name: App1

- IP address: 192.168.1.2

- Computer name: Device1

- Used client app: Microsoft Edge

- Email address: user1@company.com

- Sign-in URL: https://www.company.com

Which entities can be investigated by using UEBA?

- A. app name, computer name, IP address, email address, and used client app only
- B. IP address only
- C. IP address and email address only
- D. used client app and app name only

Answer: A

NEW QUESTION # 24

You have a Microsoft 365 E5 subscription that uses Microsoft Defender XDR and contains two users named User1 and User2.

You need to ensure that the users can perform searches by using the Microsoft Purview portal. The solution must meet the following requirements:

* Ensure that User1 can search the Microsoft Purview Audit service logs and review the Microsoft Purview Audit service configuration.

* Ensure that User2 can search Microsoft Exchange Online mailboxes.

* Follow the principle of least privilege.

To which Microsoft Purview role group should you add each user? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

In Microsoft Purview, permissions to perform searches, audits, and investigations are managed through role groups within the Microsoft Purview compliance portal. Each role group provides specific capabilities aligned with least privilege principles.

To allow a user to:

* Search the Microsoft Purview Audit logs, and

* Review the Audit configuration and settings,

...the required role group is Audit Reader.

According to Microsoft documentation:

"Members of the Audit Reader role group can search the audit log for user and admin activities and view audit configuration settings." This group grants audit-related permissions only - it does not grant access to other Purview or mailbox content, meeting the least privilege requirement.

User1 = Audit Reader

To allow a user to:

* Perform content searches across Microsoft Exchange Online mailboxes,
...the correct role group is Data Investigator.

Per Microsoft Purview documentation:

"Members of the Data Investigator role group can perform content searches across Exchange Online, SharePoint Online, and OneDrive locations." Other options such as Communication Compliance Investigators or Insider Risk Management Investigators are specific to their respective Purview solutions and not used for general content or mailbox searches.

User2 = Data Investigator

NEW QUESTION # 25

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring Microsoft Defender for Identity integration with Active Directory.

From the Microsoft Defender for identity portal, you need to configure several accounts for attackers to exploit.

Solution: You add each account as a Sensitive account.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:
