Exam PK0-005 Preparation, Best PK0-005 Preparation Materials

Our PK0-005 training materials are compiled carefully with correct understanding of academic knowledge using the fewest words to express the most clear ideas, rather than unnecessary words expressions or sentences and try to avoid out-of-date words. And our PK0-005 Exam Questions are always the latest questions and answers for our customers since we keep updating them all the time to make sure our PK0-005 study guide is valid and the latest.

CompTIA Project+ Certification Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

Project team members are leaving the company due to a stressful work environment. The project manager needs to capture this concern about potentially losing team members again. Which of the following logs should the project manager use?

- A. Defect
- **B. Risk**
- C. Issue
- D. Change

Answer: B

Explanation:

A risk log or risk register is used to document potential risks to the project, including the loss of team members due to high stress. CompTIA Project+ recommends this log as a tool for identifying and managing risks throughout the project lifecycle.

NEW QUESTION # 44

A project manager receives an escalation from an external group reporting that an expected deliverable should have been available some time ago. After analysis, the project team realizes the deliverable was provided on time. Which of the following should the project manager do next?

- **A. Revise the communication plan.**
- B. Request a change control ticket.
- C. Refine the project documentation.
- D. Review the schedule plan.

Answer: A

Explanation:

When a project manager receives an escalation about a deliverable that was actually provided on time, it indicates a communication issue. The next step should be to revise the communication plan to ensure that all stakeholders are properly informed about project progress and deliverables in the future. This helps to prevent misunderstandings and ensures that everyone has the correct information.

NEW QUESTION # 45

Participant attendance has been poor at the last few weekly meetings. The project manager wants to validate who the participants should be, how often the meetings should occur, and on which day and at what time the meeting should be held. Which of the following is the best place to validate this information?

- A. Project management plan
- **B. Project communication plan**
- C. Project schedule
- D. Project business case

Answer: B

Explanation:

The communication plan defines the meeting cadence, frequency, participants, formats, and methods of communication. If participation is low, the project manager refers to this plan for validation and adjustment.

This is part of governance and compliance to ensure the right stakeholders are engaged appropriately.

NEW QUESTION # 46

How does data discovery assist with data classification'?

- A. It helps to identify the data owner
- **B. It provides assurance of data integrity**

- C. It shows where specific data is stored
- D. It automatically classifies data by keywords

Answer: C

Explanation:

Data discovery is the process of finding and analyzing data across an organization's data sources, such as databases, files, cloud services, and applications¹². Data discovery can assist with data classification, which is the process of assigning labels and categories to data based on its sensitivity, value, and risk³⁴. By showing where specific data is stored, data discovery can help to: Identify the location and scope of sensitive data, such as personal, financial, or health information, that may require special protection or compliance measures⁵⁶.

Evaluate the data quality, accuracy, and relevance for different purposes and users⁷⁸.

Optimize the data storage, access, and governance policies and practices⁹¹⁰.

NEW QUESTION # 47

A project team is deciding how to break up a large project into smaller components so the project can be delivered without increasing the duration of the iteration cycles. Which of the following describes the grouping of the smaller components?

- A. A backlog item
- B. A goal
- C. An issue
- D. An epic

Answer: D

Explanation:

In agile methodology, an epic is a large user story or body of work that can be broken down into smaller backlog items deliverable within iteration cycles. This enables large projects to be incrementally deployed while maintaining predictable iteration lengths.
