2026 FCSS_SASE_AD-24 Test Cram | Perfect FCSS_SASE_AD-24 100% Free New Exam Braindumps

Only 20-30 hours are needed for you to learn and prepare our FCSS_SASE_AD-24 test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our FCSS_SASE_AD-24 exam materials you will save your time and energy and focus your attention mainly on your most important thing. You only need several hours to learn and prepare for the exam every day. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important FCSS_SASE_AD-24 Exam Torrent in the shortest time and finally pass the exam successfully.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.
Topic 2	<ul style="list-style-type: none"> SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
Topic 3	<ul style="list-style-type: none"> SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.
Topic 4	<ul style="list-style-type: none"> SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which event log subtype captures FortiSASE SSL VPN user creation?

- A. VPN Events
- B. Endpoint Events
- C. Administrator Events
- **D. User Events**

Answer: D

Explanation:

The event log subtype that captures FortiSASE SSL VPN user creation is User Events. This subtype is specifically designed to log activities related to user management, such as creating, modifying, or deleting user accounts. When an SSL VPN user is created, it falls under this category because it involves adding a new user to the system.

Here's why the other options are incorrect:

* A. Endpoint Events: These logs pertain to activities related to endpoint devices, such as device registration, compliance checks, or security posture assessments. SSL VPN user creation is unrelated to endpoint events.

* B. VPN Events: These logs capture activities related to VPN connections, such as session establishment, termination, or errors. While SSL VPN usage generates VPN events, the creation of a user account itself is not logged under this subtype.

* D. Administrator Events: These logs track actions performed by administrators, such as configuration changes or policy updates. While an administrator might create the SSL VPN user, the specific event of user creation is categorized under User Events, not Administrator Events.

NEW QUESTION # 23

Which onboarding methods should be used in FortiSASE for securing user access?

(Select all that apply)

Response:

- **A. Bulk user registration with secure credentials**
- **B. Multi-Factor Authentication (MFA)**
- C. Publicly available registration forms
- D. Individual user invitations

Answer: A,B

NEW QUESTION # 24

Which two advantages does FortiSASE bring to businesses with multiple branch offices? (Choose two.)

- A. It enables seamless integration with third-party firewalls.
- B. It eliminates the need to have an on-premises firewall for each branch.
- C. It offers centralized management for simplified administration.
- D. It offers customizable dashboard views for each branch location

Answer: B,C

Explanation:

FortiSASE brings the following advantages to businesses with multiple branch offices:

* Centralized Management for Simplified Administration:

* FortiSASE provides a centralized management platform that allows administrators to manage security policies, configurations, and monitoring from a single interface.

* This simplifies the administration and reduces the complexity of managing multiple branch offices.

* Eliminates the Need for On-Premises Firewalls:

* FortiSASE enables secure access to the internet and cloud applications without requiring dedicated on-premises firewalls at each branch office.

* This reduces hardware costs and simplifies network architecture, as security functions are handled by the cloud-based FortiSASE solution.

References:

FortiOS 7.2 Administration Guide: Provides information on the benefits of centralized management and cloud-based security solutions.

FortiSASE 23.2 Documentation: Explains the advantages of using FortiSASE for businesses with multiple branch offices, including reduced need for on-premises firewalls.

NEW QUESTION # 25

For FortiSASE point of presence (POP) to connect as a spoke, which Fortinet solution is required as standalone IPSec VPN hub?

- A. secure web gateway (SWG)
- B. zero trust network access (ZTNA)
- C. SD-WAN
- D. next generation firewall (NGFW)

Answer: D

Explanation:

A next-generation firewall is capable of acting as an IPSec VPN hub, providing the necessary functionality to establish and manage VPN connections. It can handle the encryption, decryption, and authentication of traffic between the FortiSASE POP and the on-premises network.

While other options like SD-WAN or ZTNA can also provide VPN capabilities, they are typically designed for different use cases and may not have the same level of flexibility or control as a dedicated NGFW.

NEW QUESTION # 26

Which FortiSASE component primarily provides secure access to cloud applications?

Response:

- A. Cloud Access Security Broker (CASB)
- B. Cloud Access Security Broker (CASB)
- C. Secure Web Gateway (SWG)
- D. Secure SD-WAN

Answer: A,B

NEW QUESTION # 27

.....
