300-835 Certification Test Questions | Test 300-835 Preparation

2. Run a Speed Test to Check Bandwidth

Use reliable tools such as Google Speed Test, Speedtest.net, or Fast.com to measure upload and download speeds. Compare these results with the speeds promised in the ISP plan. Noticeable differences may indicate service issues that need to be resolved before proceeding with the network installation.

3. Perform a Ping Test for Latency

Use the ping command in Command Prompt or Terminal to test how long it takes for data to reach a server and return. A ping time under 50 ms generally indicates fast response and good performance. High or fluctuating ping values can signal connection instability.

4. Run a Traceroute Test

A traceroute test shows the path data takes to reach its destination server and identifies where delays or bottlenecks occur. This helps determine whether an issue originates from the ISP's network or internal infrastructure. It also supports speed test optimization and helps service providers diagnose routing problems.

5. Monitor Connection Stability Over Time

Structured cabling contractors often perform continuous ping tests or use monitoring tools such as Wireshark or PRTG for extended periods. This helps identify temporary drops, throttling, or inconsistent speeds. Stable results indicate the connection is ready for network deployment.

6. Verify Equipment Health

Check the modem, Ethernet cables, and NIC components for physical damage or outdated hardware. Replacing faulty equipment ensures better performance and reduces network interruptions. Updating modem and router firmware also enhances security and accuracy during testing.

7. Record and Compare Results

Keep detailed logs of speed tests, ping values, jitter, and timestamps. Comparing data from multiple tests helps identify patterns or recurring issues. Providing this information to the ISP can speed up the resolution process or support adjustments in the plan.

Professional Preparation for ISP Connection Testing

Below are key preparation steps to ensure accurate ISP testing before setting up a network.

Gather the Right Testing Tools

Collect tools such as Ping-plotter, iPerf, or online diagnostic platforms. These tools analyze latency, speed, and connection stability and give a more comprehensive view of network performance.

Use a Direct Wired Connection

Always connect the testing device directly to the modem via an Ethernet cable. This reduces WiFi interference and ensures accurate performance readings. Avoid connecting multiple devices during the tests to prevent bandwidth distortion.

Disconnect Unnecessary Devices

Some sites provide Cisco 300-835 Exam study materials on the Internet, but they do not have any reliable guarantee. Let me be clear here a core value problem of Exam4Docs. All Cisco exams are very important. In this era of rapid development of information technology, Exam4Docs just questions provided by one of them. Why do most people choose Exam4Docs? This is because the exam information provided by Exam4Docs will certainly be able to help you pass the exam. Why? Because it provides the most up-to-date information, which is the majority of candidates proved by practice.

Cisco 300-835 exam is a comprehensive test that covers various topics related to automating and programming Cisco Collaboration solutions. The topics covered in 300-835 exam include software development and design, application programming interfaces (APIs), automation tools, and Cisco Collaboration solutions. 300-835 Exam is designed to test a candidate's ability to design, develop, and implement automated solutions for Cisco Collaboration solutions.

Test 300-835 Preparation & 300-835 Real Exam Questions

Similarly, Exam4Docs provides you 1 year free updates after your purchase of Cisco 300-835 practice tests. These updates will

help you prepare well if the content of the exam changes. The Automating and Programming Cisco Collaboration Solutions (300-835) demo of the practice exams is totally free and it helps you in examining the 300-835 study materials.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q99-Q104):

NEW QUESTION # 99
Drag and Drop Question
Drag and drop the code snippets from the bottom onto the blanks in the Python script to create an XMPP cluster using the Cisco Meeting Server API. Not all options are used.

```
Answer Area

import requests

ip = "xxx.xxx.xxx.xxx"

url = "https://{0}:445/api/v1/system/configuration/xmpp".format(ip)

uniqueDomain="cms"

domain="example.domain"

Server="xxx.xxx.xxx.xxx"

payload='uniqueName={0}&domain={1}&serverAddressOverride={2}'.format(uniqueDomain,

domain, Server)

headers = {

  'Authorization': 'Basic token',

  'Content-Type': 'application/x-www-form-urlencoded'

}

response = requests.request("POST", [        ], [        ]=headers, data=[        ])

print(response.[        ])
```

```
  cms       data      headers      url      text      header      payload
```

Answer:

Explanation:

Explanation:
url, headers, and payloadare all used in the standard requests.request()call.
- url points to the XMPP configuration API on Cisco Meeting Server.
- headersinclude authentication and content type.
- payloadcontains the data for creating the XMPP cluster.
response.textprints the raw response body for visibility.

NEW QUESTION # 100
In Cisco Webex, which of the following is a valid criteria that the system can automatically determine a meeting type if the admin
leaves the meeting type parameter empty? (Choose two.)

- A. Meeting Center PRO based with the highest meeting type ID
- B. Meeting Center STD with a drop-down list of generic meeting types
- C. Specific meeting types created previously with MC Pro with highest meeting type ID
- D. If available, MC PRO meeting type based on a template is selected
- E. If unavailable, MC STD is selected with the highest meeting type ID

Answer: A,E

NEW QUESTION # 101
What is a capability of the Cisco Webex Meeting XML API?

- A. Search and access Cisco Webex Meetings recording files.
- B. Programmatically schedule Event Center meetings.
- C. Embed Cisco Webex Meeting functionality into a web page.

- D. Send notification messages to users in a Cisco Webex space.

Answer: B

Explanation:
The Cisco Webex Meeting XML API allows developers to programmatically manage Webex Meetings, including scheduling, editing, listing, and deleting Event Center (now Webex Webinars) meetings. This API is part of the legacy Webex suite, used primarily for backend integrations with scheduling systems.

NEW QUESTION # 102
Drag and Drop Question
Drag and drop the code to create a Webex Teams Recents Widget in an existing HTML page.
Not all items are used.

Answer Area

```
<div style="width:300px; height: 500px;"
  id="recents"
  />
<script>
  // Initialize a new widget

  const widgetElement = document.getElementById('[          ]');

  ciscospark.widget(widgetElement).[          ]({
    accessToken: "YOUR_WEBEX_TEAMS_ACCESS_TOKEN",
    onEvent: callback
  });

  function callback(type,event) {

    if (type === '[          ]'){
      console.log("room " + event.data.id + " was selected");
    }
  }
</script>
```

| recentsId | selected | my-recents-widget |

| rooms:selected | recentsWidget | recents |

Answer:

Explanation:

Answer Area

```
<div style="width:300px; height: 500px;"
  id="recents"
  />
<script>
  // Initialize a new widget

  const widgetElement = document.getElementById('[my-recents-widget]');

  ciscospark.widget(widgetElement).[recentsWidget]({
    accessToken: "YOUR_WEBEX_TEAMS_ACCESS_TOKEN",
    onEvent: callback
  });

  function callback(type,event) {

    if (type === '[  recents  ]'){
    console.log("room " + event.data.id + " was selected");
    }
  }
</script>
```

recentsId		selected

rooms:selected

NEW QUESTION # 103

```xml
<?xml version="1.0" encoding = "UTF-8"?>
<serv:message xmlns:serv="http://www.webex.com/schemas/2002/06/service"
    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
    <header>
        <securityContext>
          <siteName>apidemoeu</siteName>
          <webExID>alice@example.com</webExID>
          <sessionTicket>AAABb6TooBMAABUYA0gAKEgyU0sAAAAE9FpXDKRKO</sessionTicket>
        </securityContext>
    </header>
    <body>

    </body>
</serv:message>
```

Refer to the exhibit. Alice is a Webex Meetings admin for her organization. Which code snippet completes a Webex Meetings XML API request that returns all users?

- A.
```
<bodyContent xsi:type=<java:com.webex.service.binding.user.LstsummaryUser">
<webExID>*</webExID>
</bodyContent>
```
- B.
- C.
```
<bodyContent xsi:type=<java:com.webex.service.binding.user.LstsummaryUser">
</bodyContent>
```
- C.

```
<bodyContent xsi:type=<java:com.webex.service.binding.user.GetUser">
<webExID></webExID>
</bodyContent>
```

- D.

```
<bodyContent xsi:type=<java:com.webex.service.binding.user.GetUser">
</bodyContent>
```

Answer: C

Explanation:
Section: Meetings
Explanation/Reference:

NEW QUESTION # 104

......

Do you want to pass 300-835 exam and get the related certification within the minimum time and effort? If you would like to give me a positive answer, you really should keep a close eye on our website since you can find the best 300-835 study material in here--our 300-835 Training Materials. We have helped millions of thousands of candidates to prepare for the 300-835 exam and all of them have got a fruitful outcome, we believe you will be the next winner as long as you join in us!
