The purchase process of our XSIAM-Analyst question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. If you buy our XSIAM-Analyst study tool successfully, you will have the right to download our XSIAM-Analyst exam torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our XSIAM-Analyst question torrent. We believe the operation is very convenient for you, and you can operate it quickly. At the same time, we believe that the convenient purchase process will help you save much time.

Palo Alto Networks XSIAM-Analyst Exam Syllabus Topics:

Topic	Details
Topic 1	• Endpoint Security Management: This section of the exam measures the skills of Endpoint Security Administrators and focuses on validating endpoint configurations and monitoring activities. It includes managing endpoint profiles and policies, verifying agent status, and responding to endpoint alerts through live terminals, isolation, malware scans, and file retrieval processes.
Topic 2	• Threat Intelligence Management and ASM: This section of the exam measures the skills of Threat Intelligence Analysts and focuses on handling and analyzing threat indicators and attack surface management (ASM). It includes importing and managing indicators, validating reputations and verdicts, creating prevention and detection rules, and monitoring asset inventories. Candidates are expected to use the Attack Surface Threat Response Center to identify and remediate threats effectively.

Topic 3	• Automation and Playbooks: This section of the exam measures the skills of SOAR Engineers and focuses on leveraging automation within XSIAM. It includes using playbooks for automated incident response, identifying playbook components like tasks, sub-playbooks, and error handling, and understanding the purpose of the playground environment for testing and debugging automated workflows.
Topic 4	• Alerting and Detection Processes: This section of the exam measures the skills of Security Analysts and focuses on recognizing and managing different types of analytic alerts in the Palo Alto Networks XSIAM platform. It includes alert prioritization, scoring, and incident domain handling. Candidates must demonstrate understanding of configuring custom prioritizations, identifying alert sources like correlations and XDR indicators, and taking corresponding actions to ensure accurate threat detection.
Topic 5	• Incident Handling and Response: This section of the exam measures the skills of Incident Response Analysts and covers managing the complete lifecycle of incidents. It involves explaining the incident creation process, reviewing and investigating evidence through forensics and identity threat detection, analyzing and responding to security events, and applying automated responses. The section also focuses on interpreting incident context data, differentiating between alert grouping and data stitching, and hunting for potential IOCs.

Exam Dumps XSIAM-Analyst Demo - Free PDF Quiz 2026 First-grade Palo Alto Networks XSIAM-Analyst Excellect Pass Rate

The Palo Alto Networks XSIAM-Analyst exam questions pdf is properly formatted to give candidates the asthenic and unformatted information they need to succeed in the XSIAM-Analyst exam. In addition to the comprehensive material, a few basic and important questions are highlighted and discussed in the XSIAM-Analyst Exam Material file. These questions are repeatedly seen in past Palo Alto Networks XSIAM Analyst exam papers. The Palo Alto Networks XSIAM Analyst practice questions are easy to access and can be downloaded anytime on your mobile, laptop, or MacBook.

Palo Alto Networks XSIAM Analyst Sample Questions (Q57-Q62):

NEW QUESTION # 57
During an investigation, an analyst runs the reputation script for an indicator that is listed as Suspicious. The new reputation results display in the War Room as Malicious; however, the indicator verdict does not change.
What is the cause of this behavior?

- A. The indicator verdict was manually set to Suspicious.
- B. The indicator exists as an IOC rule.
- C. The indicator has been excluded.
- D. The indicator is expired.

Answer: A

Explanation:
The correct answer isD - The indicator verdict was manually set to Suspicious.
When an indicator's verdict is manually set in Cortex XSIAM, automated reputation scripts and updates do not override this manual setting. Thus, even if the reputation result in the War Room reflects a higher risk (Malicious), the indicator's main verdict will not change until manually updated by an analyst.
"If an indicator's verdict is set manually, it will not be automatically updated by enrichment or reputation scripts. Manual verdicts must be changed by an analyst." Document Reference:XSIAM Analyst ILT Lab Guide.pdf Page:Page 37 (Threat Intel Management section)

NEW QUESTION # 58
An alert contains the featured fields "User: JohnDoe" and "File Hash: e4f7...". These help you:
(Choose two)
Response:

- A. Identify relevant asset or identity context
- B. Exclude the alert from processing
- C. Automatically score the incident
- D. Quickly pivot to related threat intelligence

Answer: A,D

NEW QUESTION # 59
An asset is flagged in ASM for hosting an exposed RDP port. What steps might follow?
(Choose two)
Response:

- A. Review asset owner and apply patches
- B. Delete the asset from inventory
- C. Assess for rule revalidation
- D. Trigger endpoint isolation

Answer: A,C

NEW QUESTION # 60
While investigating an IOC, you want to validate its presence in the environment. What steps should you take?
(Choose two)
Response:

- A. Run threat intel reputation scan
- B. Use the XQL query builder
- C. Search the IOC in the Cortex dataset
- D. Check the endpoint inventory

Answer: B,C

NEW QUESTION # 61
How can a SOC analyst highlight alerts generated on C-level executive hosts?

- A. Add a tag to the C-level executive users
- B. Add the C-level executive users to the Executive Accounts asset role.
- C. Create a dynamic group for the C-level hosts.
- D. Create a Featured Alert field for the C-level hosts

Answer: B

Explanation:
The correct answer is A - Add the C-level executive users to the Executive Accounts asset role.
By assigning C-level executives to the Executive Accounts asset role, any alerts generated from those accounts or devices are highlighted and given higher visibility in Cortex XSIAM.
"Adding C-level users to the Executive Accounts asset role ensures that related alerts are highlighted and prioritized." Document Reference: XSIAM Analyst ILT Lab Guide.pdf Page: Page 49 (Asset and User Management section)

NEW QUESTION # 62
