100% Pass Quiz Salesforce-Slack-Administrator - Salesforce Certified Slack Administrator –High-quality Test Price

According to the survey of our company, we have known that a lot of people hope to try the Salesforce-Slack-Administrator test training materials from our company before they buy the study materials, because if they do not have a try about our study materials, they cannot sure whether the study materials from our company is suitable for them to prepare for the exam or not. So a lot of people long to know the Salesforce-Slack-Administrator study questions in detail. In order to meet the demands of all people, our company has designed the trail version for all customers. We can promise that our company will provide the demo of the Salesforce-Slack-Administrator learn prep for all people to help them make the better choice. It means you can try our demo and you do not need to spend any money.

Salesforce Salesforce-Slack-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
Topic 2	<ul style="list-style-type: none">Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.

Topic 3	<ul style="list-style-type: none"> • Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
Topic 4	<ul style="list-style-type: none"> • App Administration: This section evaluates the skills of Slack Administrators in managing applications within Slack. Candidates will summarize the value of interoperability for both decision-makers and end-users while learning to use Workflow Builder for automating tasks.
Topic 5	<ul style="list-style-type: none"> • Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.

Salesforce Certified Slack Administrator Sample Questions (Q88-Q93):

NEW QUESTION # 88

The Operations team at Fire Extinguishers Ltd has recently launched Slack and wants to better collaborate when internal alerting systems notify them of a failure. In the past, it was difficult to identify where the alert was coming from and who was responding. Sometimes, the team even missed the alerts.

The Operations team and the Security team both have alerting set up with popular software tools, and the alerts get sent to multiple, unrelated teams.

What should Fire Extinguishers Ltd do to centralize their alerting identification and response?

- A. Install apps from the Slack App Directory for the tools they use, and have the apps post alerts in a #alerts- all channel for the relevant teams to monitor.
- B. Send an announcement to the company reminding them to be more responsive when receiving alerts.
- C. Build custom apps for all the popular tools that send the alerts to one channel.
- D. Set up Slackbot custom responses to trigger when the word "alert" or "failure" is used in Slack.

Answer: C

NEW QUESTION # 89

Your company is on the Slack Business+ plan and is interested in setting up SCIM provisioning in their identity provider (IdP) to more efficiently manage their Slack user base.

Which two benefits would the company gain from using SCIM provisioning? (Select the TWO best answers.)

- A. They can deactivate users automatically from their IdP.
- B. They do not have to pre-provision any users; employees will automatically create an account when they attempt to log in for the first time.
- C. Users only need to remember one set of credentials for all the applications they use.
- D. They can sync custom profile fields to obtain more useful analytics about employees' Slack usage.
- E. They can pre-provision Multi-Channel and Single-Channel Guests to their workspace.

Answer: A,C

NEW QUESTION # 90

Your company is on the Slack Business+ plan and is interested in setting up SCIM provisioning in their identity provider (IdP) to more efficiently manage their Slack user base.

Which two benefits would the company gain from using SCIM provisioning? (Select the TWO best answers.)

- A. They can deactivate users automatically from their IdP.
- B. Users only need to remember one set of credentials for all the applications they use.
- C. They do not have to pre-provision any users; employees will automatically create an account when they attempt to log in for the first time.
- D. They can sync custom profile fields to obtain more useful analytics about employees' Slack usage.
- E. They can pre-provision Multi-Channel and Single-Channel Guests to their workspace.

Answer: A,E

Explanation:

SCIM provisioning offers two major benefits:

"Automatically deactivating user accounts when they are deactivated in the identity provider (IdP)."

"Pre-provisioning Multi-Channel and Single-Channel Guests in Slack."

SSO (Option B) relates to authentication, not provisioning. Automatic account creation upon login (Option D) is tied to Just-in-Time (JIT) provisioning with SSO, not SCIM.

(Reference: Slack Administration Study Guide - SCIM Provisioning Benefits)

-

NEW QUESTION # 91

Which of the following would most make your company a good candidate to use Slack's Enterprise Key Management (EKM)?

- A. Your company's employees primarily use unsecured mobile devices to access Slack.
- **B. Your company frequently shares personally identifiable information (PII).**
- C. Your company is in the public sector.
- D. You use Azure for all of your key management.

Answer: B

Explanation:

Slack's Enterprise Key Management (EKM) provides organizations with the ability to control and revoke access to data encryption keys, ensuring protection for sensitive information such as PII (personally identifiable information).

Slack documentation states:

"Slack EKM allows customers to manage and control access to their data in Slack by using their own encryption keys. It is ideal for industries that frequently handle sensitive data such as PII, PHI, and financial information." Using unsecured mobile devices (option A) is a mobile device management issue, Azure usage (option C) is not a sole qualifier, and being in the public sector (option D) may suggest high-security needs but does not directly relate to EKM eligibility.

(Reference: Slack Administration Study Guide - Security and Compliance - Enterprise Key Management)

-

NEW QUESTION # 92

You're the Workspace Primary Owner of a Slack Free plan. You want to allow all employees in your company to join your workspace when they're ready. You also want to prevent anyone outside your company from accessing your workspace without admin approval.

What should you do? (Select the best answer.)

- **A. Enable employees to sign up for the workspace using the company's email domain.**
- B. Invite all employees to the workspace by entering their email addresses in the invite flow from the workspace settings page.
- C. Allow all workspace members to invite new members.
- D. Direct your employees to access Slack through your identity provider (IdP).

Answer: A

Explanation:

On the Free plan, to ensure only employees can join automatically and prevent outsiders from signing up:

"Enable sign-up using a specific email domain (such as @company.com) so only people with company email addresses can join the workspace without needing manual invites." Allowing all members to invite (Option A) could allow external people to join, and IdP enforcement (Option C) typically applies to paid plans, not Free.
