HP HPE7-A05 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Configure the Solution: This section of the exam measures the skills of Network Engineers and focuses on implementing the low-level design through different configuration interfaces. It includes verifying that the configuration aligns with design requirements and setting up monitoring tools to track performance and system health.
Topic 2	<ul style="list-style-type: none">• Plan the Low-Level Design: This section of the exam measures the skills of Network Architects and covers the creation of a low-level design for deployment using HPE Aruba Networking data center switches. It focuses on translating high-level network designs into detailed implementation plans, validating the Bill of Materials (BoM), and assessing whether the physical infrastructure supports the intended solution. Recommendations for necessary modifications to the environment are also part of this process.
Topic 3	<ul style="list-style-type: none">• Create a Monitored Environment: This section of the exam measures the skills of IT Operations Managers and focuses on setting up a monitoring framework to track network performance, availability, and resource utilization. It involves defining baseline metrics, configuring alert thresholds, and generating reports to assess the health of data center switches and overall infrastructure.
