

# Exam JN0-637 Cram Review & JN0-637 Latest Exam Online

BONUS!!! Download part of DumpsQuestion JN0-637 dumps for free: <https://drive.google.com/open?id=1L2jYKNrwHq5PPAtJ2k0CJGnGvyKsZb88>

With our wide range of Juniper JN0-637 exam questions types and difficulty levels, you can tailor your Juniper JN0-637 exam practice to your needs. Your performance and exam skills will be improved with our Juniper JN0-637 Practice Test software. The software provides you with a range of Juniper JN0-637 exam dumps, all of which are based on past Juniper JN0-637 certifications.

## Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Troubleshooting Security Policies and Security Zones: This topic assesses the skills of networking professionals in troubleshooting and monitoring security policies and zones using tools like logging and tracing.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>Automated Threat Mitigation: This topic covers Automated Threat Mitigation concepts and emphasizes implementing and managing threat mitigation strategies.</li></ul>
Topic 7	<ul style="list-style-type: none"><li>Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.</li></ul>

## Juniper JN0-637 Latest Exam Online - Latest JN0-637 Test Online

Our JN0-637 exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the JN0-637 quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. And our JN0-637 exam torrent make it easy for you to take notes on it so that your free time can be well utilized and you can often consolidate your knowledge. Everything you do will help you successfully pass the exam and get the card. The version of APP and PC of our JN0-637 Exam Torrent is also popular. They can simulate real operation of test environment and users can test JN0-637 test prep in mock exam in limited time. They are very practical and they have online error correction and other functions. The characteristic that three versions of JN0-637 exam torrent all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our JN0-637 quiz guide. The three different versions can help customers solve any questions and meet their all needs.

## Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q109-Q114):

### NEW QUESTION # 109

Refer to the Exhibit.

Referring to the exhibit, which three topologies are supported by Policy Enforcer? (Choose three.)

- A. Topology 4
- B. Topology 1
- C. Topology 5
- D. Topology 2
- E. Topology 3

**Answer: A,B,E**

Explanation:

Reference: [https://www.juniper.net/documentation/en\\_US/junos-space17.2/policy-enforcer/topics/concept/policy-enforcer-deployment-supported-topologies.html](https://www.juniper.net/documentation/en_US/junos-space17.2/policy-enforcer/topics/concept/policy-enforcer-deployment-supported-topologies.html)

### NEW QUESTION # 110

You want to create a connection for communication between tenant systems without using physical revenue ports on the SRX Series device.

What are two ways to accomplish this task? (Choose two.)

- A. Use a secure wire.
- B. Use an external router.
- C. Use a point-to-point logical tunnel.
- D. Use an interconnect VPLS switch.

**Answer: A,C**

Explanation:

Secure wire and logical tunnels provide internal connectivity options for isolated tenant systems within an SRX device, avoiding the need for physical interfaces. Secure wire maintains security context, while logical tunnels facilitate inter-system communication. More on this can be found at Juniper Tenant Systems Documentation.

To create a connection between tenant systems without using physical interfaces on an SRX Series device, you have two effective options:

\* Secure Wire (Answer C): This feature allows you to create a secure, internal connection between security zones. Essentially, traffic is bridged between two zones without needing to pass through physical interfaces, providing a "virtual" wire.

Configuration Example:

bash

Copy code

```
set security zones security-zone zone1 interfaces ge-0/0/0.0 host-inbound-traffic system-services all set security zones security-zone zone2 interfaces ge-0/0/1.0 host-inbound-traffic system-services all set security secure-wire secure-wire1 from-zone zone1 to-zone zone2
```

\* Point-to-Point Logical Tunnel (Answer D): This establishes a virtual connection between two different points (zones or systems) within the SRX device using logical interfaces like lt (logical tunnel interfaces). No physical ports are required, and it's useful for connecting isolated tenant systems.

Configuration Example:

bash

Copy code

```
set interfaces lt-0/0/0 unit 0 family inet address 192.168.1.1/30
```

```
set interfaces lt-0/0/1 unit 0 family inet address 192.168.1.2/30
```

```
set security zones security-zone zone1 interfaces lt-0/0/0.0
```

```
set security zones security-zone zone2 interfaces lt-0/0/1.0
```

Both methods are suitable for connecting systems within the SRX without using physical interfaces.

### NEW QUESTION # 111

Exhibit

Referring to the exhibit, which two statements are true? (Choose two.)

- A. Juniper ATP Cloud automatically creates the suspicious\_Endpoints feed after you commit the security policy.
- B. You must manually create the suspicious\_Endpoint3 feed in the Juniper ATP Cloud interface.
- C. The suspicious\_Endpoint3 feed is usable by any SRX Series device that is a part of the same realm as SRX-1
- D. The suspicious\_Endpoint3 feed is only usable by the SRX-1 device.

Answer: C,D

### NEW QUESTION # 112

Referring to the exhibit, which two statements are true ?

- A. Every VPN packet that the SRX receives from the VPN peer is outside the ESP sequence window
- B. The SRX is not sending any packets to the VPN peer.
- C. The SRX is sending traffic into the tunnel and out toward the VPN peer.
- D. The SRX is not receiving any packets from the VPN peer.

Answer: C,D

### NEW QUESTION # 113

Exhibit

The highlighted incident (arrow) shown in the exhibit shows a progression level of "Download" in the kill chain.

What are two appropriate mitigation actions for the selected incident? (Choose two.)

- A. Immediate response required: Block malware IP addresses (download server or CnC server)
- B. Not an urgent action: Use IVP to confirm if machine is infected.
- C. Immediate response required: Wipe infected endpoint hosts.
- D. Immediate response required: Deploy IVP integration (if configured) to confirm if the endpoint has executed the malware and is infected.

Answer: A,D

### NEW QUESTION # 114

.....

You don't need to install any separate software or plugin to use it on your system to practice for your actual Security, Professional (JNCIP-SEC) (JN0-637) exam. Juniper web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.
