## 1Y0-205 Valid Test Labs & 1Y0-205 Reliable Test Simulator

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the 1Y0-205 cram materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the 1Y0-205 latest exam file and whose articles are highly authorized. They provide strong backing to the compiling of the 1Y0-205 Exam Questions and reliable exam materials resources. They compile each answer and question carefully. Each

question presents the key information to the learners and each answer provides the detailed explanation and verification by the senior experts. The success of our 1Y0-205 latest exam file cannot be separated from their painstaking efforts.

## Citrix Virtual Apps and Desktops Administration Sample Questions (Q41-Q46):

### NEW QUESTION # 41

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog. Which two conditions can cause this to happen? (Choose two.)

- A. The Microsoft License Server is unreachable.
- B. The version of Windows installed is Windows Server 2012 R2.
- C. The base image rearm count has been exceeded.
- D. The version of Windows installed uses Multiple Activation Key (MAK) licensing.

**Answer: C,D**

Explanation:

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

### NEW QUESTION # 42

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Citrix Universal Printer Driver
- B. The Auto-create PDF universal printer policy
- C. The Auto-create local (non-network) client printers only policy
- D. The Citrix Universal Print Server

**Answer: A**

Explanation:

Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

### NEW QUESTION # 43

Scenario: A StoreFront store supports 150 users who have full access to all enterprise resources.

A Citrix Administrator needs to create a new StoreFront store for contractors who will work onsite for two months. The contractors need access to specific resources but will NOT be Active Directory users.

Which option should the administrator select while creating the store for contractors?

- A. Smart card
- B. Unauthenticated
- C. HTTP Basic
- D. Pass-through

**Answer: B**

### NEW QUESTION # 44

Which two statements are valid when using Citrix Profile Streaming? (Choose two.)

- A. Registry entries and files in the pending area are fetched when accessed.
- B. The files and folders are fetched on demand.
- C. Profile Streaming is disabled by default.
- D. Profile Streaming will delay the logon process.

**Answer: A,B**

Explanation:

With Citrix Profile Streaming, parts of the user profile (such as registry entries and files) are loaded on demand instead of fully at logon. This reduces logon time by fetching profile components only when accessed during the session.

#### NEW QUESTION # 45

A user calls the help desk to report that when launching any application from within their published desktop session, it takes a long time and the overall performance is poor. Which Citrix Director report can a Citrix Administrator use to initiate the investigation of the issue?

- A. Machine Utilization in Machine Details
- B. Session Data in Filters
- C. Launch Failures in Trends
- D. Load Evaluator in Trends

**Answer: B**

Explanation:

The Session Data in Filters report in Citrix Director provides detailed performance metrics for individual user sessions, including logon duration, application launch times, and resource utilization. This report is the best starting point to investigate performance complaints within a published desktop session.

#### NEW QUESTION # 46

.....

Fantasy can make people to come up with many good ideas, but it can not do anything. So when you thinking how to pass the Citrix 1Y0-205 Exam, It's better open your computer, and click the website of TestPDF, then you will see the things you want. TestPDF's products have favorable prices, and have quality assurance, but also to ensure you to 100% pass the exam.
