NEW QUESTION # 179

Which three actions are required in order to use the automated method within Azure Cloud to streamline the process of using remediation in the identity and access management (IAM) module? (Choose three.)

- A. Install boto3 & requests library.
- B. Install azure.servicebus & requests library.
- C. Integrate with Azure Service Bus.
- D. Configure IAM AWS remediation script.
- E. Configure IAM Azure remediation script.

Answer: B,C,E

Explanation:

To use the automated method within Azure Cloud for streamlining the process of using remediation in the identity and access management (IAM) module, the required actions include configuring the IAM Azure remediation script, integrating with Azure Service Bus, and installing the azure.servicebus & requests library.

These steps ensure that the automated remediation system can communicate effectively with Azure services, execute the necessary remediation actions, and address IAM-related alerts by adjusting permissions and access controls as needed. This automation helps maintain a secure and compliant cloud environment by promptly addressing potential IAM issues.

NEW QUESTION # 180

What should be used to associate Prisma Cloud policies with compliance frameworks?

- A. Compliance
- **B. Custom compliance**
- C. Policies
- D. Alert rules

Answer: B

Explanation:

In the context of associating Prisma Cloud policies with compliance frameworks, the most appropriate option is "Custom compliance." Prisma Cloud provides a comprehensive set of security and compliance policies that can be applied to cloud environments. While predefined policies cover a wide range of compliance standards and best practices, every organization has unique requirements and may follow specific compliance frameworks that are not directly included in the predefined policies. Custom compliance allows organizations to define their own compliance frameworks and associate specific Prisma Cloud policies with these custom frameworks. This flexibility ensures that organizations can maintain compliance with their specific regulatory and industry standards, tailoring the Prisma Cloud policies to meet their unique compliance needs. Custom compliance frameworks can be created within Prisma Cloud to include a collection of policies that address the specific controls and requirements of the organization's chosen compliance standards, providing a tailored approach to cloud security and compliance.

NEW QUESTION # 181

What is a benefit of the Cloud Discovery feature?

- A. It helps engineers find all cloud-native services being used only on AWS.
- B. It does not require any specific permissions to be granted before use.
- **C. It enables engineers to continuously monitor all accounts and report on the services that are unprotected.**
- D. It offers coverage for serverless functions on AWS only.

Answer: C

Explanation:

The Cloud Discovery feature in Prisma Cloud allows engineers to monitor accounts continuously and report on cloud-native services that are unprotected across different cloud service providers. This feature requires specific permissions to access and assess the cloud environment's configuration and security posture. Thus, the correct answer is C: It enables engineers to continuously monitor all accounts and report on the services that are unprotected.

NEW QUESTION # 182

The InfoSec team wants to be notified via email each time a Security Group is misconfigured. Which Prisma Cloud tab should you choose to complete this request?

- A. Notifications
- B. Events
- **C. Alert Rules**
- D. Policies

Answer: C

Explanation:

In Prisma Cloud, to notify the InfoSec team via email about misconfigured Security Groups, the appropriate tab to use is "Alert Rules." Alert rules in Prisma Cloud define the conditions under which alerts are generated and the notification channels, including

email, where these alerts are sent. By configuring alert rules related to Security Group misconfigurations, the platform can automatically notify the team when such an event occurs, ensuring prompt awareness and response to potential security issues.

NEW QUESTION # 183

.....

The meaning of qualifying examinations is, in some ways, to prove the candidate's ability to obtain qualifications that show your ability in various fields of expertise. If you choose our CloudSec-Pro learning guide materials, you can create more unlimited value in the limited study time, through qualifying examinations, this is our CloudSec-Pro Real Questions and the common goal of every user, we are trustworthy helpers, so please don't miss such a good opportunity. The acquisition of CloudSec-Pro qualification certificates can better meet the needs of users' career development.
