

F5 F5CAB1 New Exam Braindumps & F5CAB1 Knowledge Points

P.S. Free & New F5CAB1 dumps are available on Google Drive shared by DumpsKing: <https://drive.google.com/open?id=16w-Pp6yow1t7dYc57mxTVg8DUNjDiP-e>

We assure that you can not only purchase high-quality F5CAB1 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of F5CAB1 guide torrent, you can download any time without registering. We can't say we are the absolutely 100% good, but we are doing our best to service every customer. Only in this way can we keep our customers and be long-term cooperative partners. Looking forwarding to your F5CAB1 Test Guide use try!

F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> BIG IP Administration Data Plane Concepts: This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.
Topic 2	<ul style="list-style-type: none"> BIG IP Administration Data Plane Configuration: This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.
Topic 3	<ul style="list-style-type: none"> BIG IP Administration Support and Troubleshooting: This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.
Topic 4	<ul style="list-style-type: none"> BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.
Topic 5	<ul style="list-style-type: none"> BIG IP Administration Install Initial Configuration and Upgrade: This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.

F5 F5CAB1 Knowledge Points | F5CAB1 Test King

Are you bothered by looking for good exam materials of F5 F5CAB1 test? Don't worry. DumpsKing can provide you with everything you need. Should your requirement, DumpsKing find an efficient method to help all candidates to pass F5CAB1 exam. Most candidates are preparing for IT certification exam while they working, which is a painstaking, laborious process. In order to avoid wasting too much time in preparing for the exam, DumpsKing provides you with F5 F5CAB1 Dumps that can help you pass the test in the short period of time. The dumps contain all problems in the actual test. So, as long as you make use of our dumps, F5CAB1 certificate exam will not a problem.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q44-Q49):

NEW QUESTION # 44

The BIG-IP Administrator uses Secure Copy Protocol (SCP) to upload a TMOS image to the `/shared/images/` directory in preparation for a TMOS upgrade.

After the upload is completed, what will the system do before the image is shown in the GUI under:

System » Software Management » Image List?

- A. The system verifies the internal checksum
- B. The system performs a reboot into a new partition
- C. The system copies the image to `/var/local/images/`

Answer: A

Explanation:

When a TMOS image (.iso file) is uploaded into the `/shared/images/` directory, the BIG-IP performs an internal validation step before the ISO appears in the GUI.

1. The system verifies the internal checksum

* BIG-IP automatically reads the embedded checksum inside the ISO file

* Verifies integrity of the uploaded image

* Confirms the file is not corrupted or incomplete

* Ensures the image is a valid F5 TMOS software image

Only after this checksum verification succeeds does the image appear under:

System # Software Management # Image List

Why the other options are incorrect:

A). The system performs a reboot into a new partition

* Uploading an ISO file never triggers a reboot.

C). The system copies the image to `/var/local/images/`

* All valid TMOS images remain in `/shared/images/`.

* No copying occurs.

NEW QUESTION # 45

For security reasons, a BIG-IP Administrator needs to specify allowable IP ranges for access to the Configuration Utility (WebUI). The exhibit shows the User Administration section of the Configuration Utility.

□ The administrator could not find any setting that explicitly restricts access to the Configuration Utility.

Which one of the following is a reason for that?

- A. The administrator must restrict access by IP address for SSH, which will implicitly restrict access to the Configuration Utility
- B. To avoid locking out the administrator, recent versions of BIG-IP no longer allow restricting administrator access to the Configuration Utility by source IP address
- C. The administrator needs to switch to the "Advanced" view mode in order to display the relevant setting
- D. Restricting access to the Configuration Utility can only be done from the Command Line Interface

Answer: D

Explanation:

The screenshot shown is from the User Administration section of the BIG-IP GUI.

This section controls:

Root and Admin passwords

SSH Access

SSH IP Allow settings

However, it does not contain any controls for restricting access to the WebUI (TMUI). BIG-IP does not provide TMUI access restrictions from this part of the GUI.

Access to the web-based Configuration Utility is controlled by the httpd allow list, configured through TMSH:

```
tmsh modify /sys httpd allow { <IP/subnet> }
```

This setting is not displayed in the User Administration panel, and in many BIG-IP versions, the httpd allow list is only configurable from the CLI, not the GUI.

Therefore, the administrator cannot find the setting in the screen shown because:

TMUI access restriction is not located in this GUI section

It must be configured using tmsh under /sys httpd allow

This is why Option A is correct.

NEW QUESTION # 46

What is the purpose of a Virtual Server in BIG-IP?

- A. It is used to configure the Self-IP
- B. It defines how SSL certificates are managed
- C. It defines a failover mechanism for the system
- **D. It handles the routing of traffic to back-end servers**

Answer: D

Explanation:

A Virtual Server is used to manage traffic, directing it to the appropriate pool of servers based on load balancing rules.

NEW QUESTION # 47

The Configuration Utility of a BIG-IP device is currently accessible via its management IP

10.53.1.245 from all VLANs.

The BIG-IP Administrator needs to restrict access so only hosts from the 10.0.0.0/24 subnet can access the Configuration Utility.

Which TMSH command accomplishes this?

- A. (tmos)# modify /ltm httpd allow replace-all-with {10.0.0.0/24}
- B. (tmos)# create /net acl MGMT.HTTP rule add { (permit tcp 10.0.0.0/24 10.53.1.245 http) (deny ip any any http) }
- **C. (tmos)# modify /sys httpd allow replace-all-with {10.0.0.0/24}**
- D. (tmos)# create /net acl MGMT.HTTP rule add { (permit tcp 10.0.0.0 0.0.0.255 host 10.53.1.245 http) }

Answer: C

Explanation:

BIG-IP controls access to the web-based Configuration Utility (TMUI) through the /sys httpd allow list. This parameter specifies which client IPs or subnets may initiate HTTP/HTTPS connections to the management interface.

To restrict TMUI access to only the 10.0.0.0/24 subnet:

The correct method is to modify the HTTPD allow list so that it contains only this subnet.

This requires replacing the entire current list with the new subnet using:

```
modify /sys httpd allow replace-all-with {10.0.0.0/24}
```

This ensures that only clients within 10.0.0.0/24 can reach the Configuration Utility.

NEW QUESTION # 48

The device is currently on v15.1.2.1.

The BIG-IP Administrator needs to boot the device back to v13.1.0.6 to gather data for troubleshooting.

The system shows:

Sys::Software Status

Volume Product Version Build Active Status Allowed

HD1.1 BIG-IP 15.1.2.1 0.0.10 yes complete yes

HD1.2 BIG-IP 13.1.0.6 0.0.3 no complete yes

Which is the correct command-line sequence to boot the device to version 13.1.0.6?

- A. switchboot -I HD1.2, then reboot
- B. Use tmsh to select a new boot volume, tmsh reboot HD1.2
- C. Use tmsh to select a new boot volume, tmsh switchboot HD1.2
- **D. switchboot -b HD1.2, then reboot**

Answer: D

Explanation:

To change the boot volume on a BIG-IP system from one installed TMOS version to another, the correct CLI tool is: switchboot

The correct syntax uses the -b flag:

switchboot -b <volume>

This command marks the specified boot location as the one to be used on the next reboot.

Thus, to boot into HD1.2 which contains 13.1.0.6, the sequence is:

Mark HD1.2 as the next boot location:

switchboot -b HD1.2

Reboot the system:

reboot

This is the standard and officially supported method for selecting a different installed volume.

NEW QUESTION # 49

.....

Our company has forged a group of professional experts with the excelsior craftsmanship and a mature service system. The quality of our F5CAB1 latest question is high because our expert team organizes and compiles them according to the real exam's needs and has extracted the essence of all of the information about the test. So our F5CAB1 Certification tool is the boutique among the same kinds of the study materials. Our assiduous pursuit for high quality of our F5CAB1 exam prep creates our top-ranking F5CAB1 test guide and constantly increasing sales volume.
