troubleshooting. It is an advanced-level certification that requires a high level of expertise and knowledge.

Trend Micro Certified Professional for Deep Security Sample Questions (Q51-Q56):

NEW QUESTION # 51
Based on the following exhibit, what behavior would you expect for the Application Control Protection Module?

□

- A. Since this computer is in Maintenance Mode, new or changed software will be auto-matically added to the list of Allowed software in the currently active ruleset.
- B. Since this computer is in Maintenance Mode, Application Control will ignore any Blocked software in the currently active ruleset.
- C. Since this computer is in Maintenance Mode, updates to the Application Control Pro-tection Module will be applied.
- D. Since this computer is in Maintenance Mode, Application Control will allow any Blocked software to temporarily run

Answer: C

NEW QUESTION # 52
Which of the following statements is true regarding Intrusion Prevention protection?

- A. Intrusion Prevention protection can drop malicious packets but cannot reset the con-nection.
- B. Intrusion Prevention protection can only work on computers where a Deep Security Agent is installed; agentless protection is not supported.
- C. Intrusion Prevention protection can drop or reset a connection.
- D. Intrusion Prevention protection only works in conjunction with the Anti-Malware Pro-tection Module.

Answer: C

NEW QUESTION # 53
Multi-tenancy is enabled in Deep Security and new tenants are created. Where does the new tenant data get stored when using SQL Server as the Deep Security database?

- A. An additional user is created for each new tenant in the SQL Server database to store its data.
- B. An additional table is created for each new tenant in the existing database in the SQL Server database to store its data.
- C. The new tenant data is added to the existing SQL Server database.
- D. An additional database is created in SQL Server for each new tenant to store its data.

Answer: D

Explanation:
With Microsoft SQL and PostgreSQL, there's one main database and an additional database for each tenant. With Oracle, all tenant information is in one Deep Security Manager database, but an additional user is created for each tenant. Each user has its own tables.
Explication: Study Guide - page (409)

NEW QUESTION # 54
Which of the following statements is true regarding Maintenance Mode in the Application Control protection Module?

- A. When enabled, Maintenance Mode rescans the protected computer to rebuild the soft-ware inventory. Any new or changed software will be included in this rebuilt inventory.
- B. While in Maintenance Mode, all Block and Allow rules are ignored while new or updated applications are added to the software inventory
- C. Maintenance Mode can be configured as a Scheduled Event. In this scenario, all soft-ware upgrades will be performed at the same time every day to avoid creating Alerts for normal software updates.
- D. When in Maintenance Mode, the Application Control Protection Module will continue to block software identified in Block rules, but will allow new and changed applications to be added to the software inventory.

Answer: D

Explanation:
When Maintenance Mode is enabled, Application Control continues to block previously blocked software but automatically allows new or changed software and adds it to the allowed inventory. This is ideal for patching or upgrades.
From the official documentation:
"While in Maintenance Mode, Application Control continues to enforce Block rules but allows new or updated applications to run and automatically adds them to the allowed list." References:
Trend Micro Deep Security Application Control Guide: Maintenance Mode

NEW QUESTION # 55
Your organization stores PDF and Microsoft Office files within the SAP Netweaver platform and requires these documents to be scanned for malware. Which Deep Security component is required to satisfy this requirement?

- A. The Netweaver plug-in must be installed on the Deep Security Agent.
- B. No extra components are required, this can be done by enabling the AntiMalware Pro-tection Module on the SAP Netweaver server.
- C. Deep Security Scanner is required.
- D. A Smart Protection Server must be installed and configured to service the SAP Netweaver platform

Answer: B

Explanation:
Trend Micro Deep Security's Anti-Malware Protection Module provides real-time, manual, or scheduled malware scanning for files stored on protected servers, including SAP NetWeaver servers. No additional plugins or components are required-simply enable the Anti-Malware module on the SAP NetWeaver host to scan PDF and Office documents.
From the official documentation:
"To scan for malware in documents stored on SAP NetWeaver or other platforms, enable the Anti-Malware module on the target server. No additional plugins are required." References:
Trend Micro Deep Security Administrator's Guide: Anti-Malware Module
