“Quality First, Credibility First, and Service First” is our company’s purpose, we deeply hope our C\_ACDET\_2506 Study Materials can bring benefits and profits for our customers. So we have been persisting in updating in order to help customers, who are willing to buy our test torrent, make good use of time and accumulate the knowledge. We will guarantee that you will have the opportunity to use the updating system for free.

## SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Deploy and Migration:</b> This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Project Overview, Roles and Responsibilities:</b> This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Field Configuration:</b> This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>

## 100% Pass C\_ACDET\_2506 - Fantastic New SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Exam Answers

The users can instantly access the product after purchasing it from RealVCE, so they don't have to wait to prepare for the C\_ACDET\_2506 Exams. The 24/7 support system is available for the customers, so they can contact the support whenever they face any issue, and it will provide them with the solution. Furthermore, RealVCE offers up to 1 year of free updates and free demos of the product.

### SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q13-Q18):

#### NEW QUESTION # 13

How can you make the attributes of a Flex Master Data field reportable?

- A. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- B. Flex Master Data objects and their attributes cannot be made reportable
- C. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- **D. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.**

**Answer: D**

Explanation:

When creating a Flex Master Data (FMD) template, you can specify which attributes are reportable by marking them accordingly during template setup. Only attributes marked as reportable will be accessible in reporting tools within SAP Ariba.

While some users employ workarounds by creating custom fields with defaulting expressions to surface FMD attribute values, the direct and supported method is to configure reportability at the attribute level within the FMD template itself.

This capability ensures efficient and accurate reporting without requiring complex custom fields or expressions.

#### NEW QUESTION # 14

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- **A. The status changes to Complete when migration is finished.**
- B. You can revert migrated configurations from the target site.
- C. If any configuration type fails during the migration process, you cannot create a new migration request.
- **D. You cannot make other configuration updates in ICM when a migration operation is in progress.**

**Answer: A,D**

Explanation:

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.

Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

### NEW QUESTION # 15

How can you set the order of your custom Contract Workspace fields? (Select 2 correct answers)

- A. Select Field Configuration, find the class, and select the Layout tab. Drag and drop the order of the fields, then publish.
- B. Navigate to the UI where the class is presented, select Customize in the banner, edit, and drag and drop fields, then publish.
- C. Select Field Configuration and under the Advanced tab set the Sequence property, then publish.
- D. Fields are presented in alphabetical order of the field label.

**Answer: A,C**

Explanation:

Custom Contract Workspace field order can be controlled through two methods:

\* Using the Layout tab in Field Configuration, where fields can be dragged and dropped to reorder them visually, followed by publishing the changes.

\* Using the Sequence property under the Advanced tab, assigning numeric values that define the sort order, with lower numbers appearing first. Option B is incorrect because UI banner customization does not manage field order in Contract Workspace screens. Option C is incorrect; field order is controlled by explicit settings, not alphabetical label order.

### NEW QUESTION # 16

What system is provided by SAP Free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Application Lifecycle Management
- B. SAP Ariba Enablement Workbook
- C. SAP for Me
- D. SAP Cloud Project Studio

**Answer: B**

### NEW QUESTION # 17

How can you make the attributes of a Flex Master Data field reportable?

- A. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- B. Flex Master Data objects and their attributes cannot be made reportable
- C. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- D. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.

**Answer: D**

### NEW QUESTION # 18

.....
