Reliable NIS-2-Directive-Lead-Implementer Exam Braindumps - Valid NIS-2-Directive-Lead-Implementer Practice Questions

The passing rate of our NIS-2-Directive-Lead-Implementer study materials is 99% and the hit rate is also high. Our study materials are selected strictly based on the real NIS-2-Directive-Lead-Implementer exam. Our expert team guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more learning NIS-2-Directive-Lead-Implementer resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q49-

Q54):

NEW QUESTION # 49

Scenario 5: Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Based on the scenario above, answer the following question:

Which risk identification approach does Astral Nexus Power use?

- A. All-hazards approach
- B. Event-based approach
- C. Asset-based approach

Answer: C

NEW QUESTION # 50

What is the requirement for Member States regarding resources for competent authorities and single points of contact under Article 8 of the NIS 2 Directive?

- A. To provide adequate resources for efficient execution of tasks and the Directive's objectives
- B. To allocate resources solely for international cooperation
- C. To provide unlimited resources for any related tasks

Answer: A

NEW QUESTION # 51

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team

has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, which of the following approaches was used by SafePost to analyze market forces and opportunities?

- A. SWOT analysis
- B. Porter's Five Forces analysis
- C. PEST analysis

Answer: C

NEW QUESTION # 52

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, what type of policy has SafePost established for protecting digital assets and maintaining security?

- A. Topic-specific policy
- B. High-level general policy
- C. High-level topic-specific policy

Answer: C

NEW QUESTION # 53

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its

security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on the scenario above, answer the following question:

Why does the NIS 2 Directive apply to SafePost?

- A. Because the directive applies only to companies with more than 500 employees that provide postal services within the European Union
- B. Because the directive applies to entities that offer trust services as defined by EU regulations within the European Union
- C. Because the directive applies to companies that provide postal services within the European Union

Answer: C

NEW QUESTION # 54
