Salesforce Order Management Administrator Accredited Professional Sample Questions (Q70-Q75):

NEW QUESTION # 70

An administrator is tasked to utilize a Product Price Book which is managed on an external platform. How can the administrator meet this requirement?

- A. Create an External Data Source in Setup which references the external platform where the Pricebook is held
- B. Go to Setup, Order settings, and select Enable Optional Price Books for Orders
- C. This is not possible, all Products require a Pricebook Entry
- D. Edit the Product page layout to make the Pricebook field not require

Answer: B

NEW QUESTION # 71

Universal Containers needs to implement a new Payment Method. What should the admin evaluate in relation to Payment Gateways and Payment Processors?

- A. An Apex implementation will need to be written as Payment Methods have nothing to do with Payment Gateways and Payment Processors
- B. A new Payment Processor needs to be adopted since each Payment Method needs its own Payment Processor

- C. Ensure the new payment method will support the existing payment gateway and payment processor
- D. A new Payment Gateway needs to be adopted since each Payment Method needs its own Payment Gateway

Answer: C

NEW QUESTION # 72

Which three options are the main types of building blocks when working in Flow Builder?

- A. Resources
- B. Connectors
- C. Elements
- D. Async processes
- E. Data lookups

Answer: A,B,C

Explanation:

The main types of building blocks when working in Flow Builder are:

Elements: These are the components that define the logic and functionality of a flow. Elements include actions, assignments, decisions, loops, screens, subflows, and waits.

Resources: These are the variables, constants, formulas, collections, and record choice sets that store data in a flow. Resources can be used as inputs or outputs for elements.

Connectors: These are the arrows that connect elements and resources in a flow. Connectors determine the sequence and direction of the flow execution. Reference: [Flow Building Blocks]

NEW QUESTION # 73

Which three steps should an administrator take to set up a mock payment gateway in a new org?

- A. Create a CORS (Cross-Origin Resource Sharing) entry
- B. Create a Payment Gateway
- C. Create a Trusted Site Entry
- D. Create a Named Credential
- E. Create a Payment Provider

Answer: B,D,E

Explanation:

To set up a mock payment gateway in a new org, an administrator should take the following steps:

Create a Payment Provider: This is a custom metadata type that defines the configuration and behavior of a payment gateway. A payment provider specifies the name, type, class, and endpoint of the payment gateway.

Create a Named Credential: This is a Salesforce feature that securely stores authentication information for connecting to external services. A named credential specifies the URL, identity type, authentication protocol, and certificate of the payment gateway.

Create a Payment Gateway: This is a custom object that represents an instance of a payment provider. A payment gateway references a payment provider and a named credential, and defines additional settings such as currency, mode, and timeout. Reference: Salesforce Payments and Order Management, [Named Credentials]

NEW QUESTION # 74

A company sells its products in kits. The company wants the kits to remain grouped together during returns in Order Management so that all parts of the kit are accounted for. What should the administrator recommend?

- A. Add a custom attribute to the order header only
- B. Track the individual kit items using custom attributes
- C. Pass the data as is. Order Management will handle the kit.
- D. Add a suffix to the Stock Keeping Unit of the Product which represents Kit status

Answer: B

Explanation:

The best way for the administrator to recommend tracking the kits so that they remain grouped together during returns in Order Management is to use custom attributes. Custom attributes are fields that can be added to objects to store additional information that is not available in standard fields. The administrator can create custom attributes for the Order Item Summary object to indicate whether an item is part of a kit, and what are the other items in the kit. This way, the kits can be easily identified and handled during returns.
