## Quiz Lpi - 305-300 - LPIC-3 Exam 305: Virtualization and Containerization Perfect Reliable Dumps Ppt

If moving up in the fast-paced technological world is your objective, RealValidExam is here to help. The excellent Lpi 305-300 practice exam from RealValidExam can help you realize your goal of passing the Lpi 305-300 Certification Exam on your very first attempt. Most people find it difficult to find excellent Lpi 305-300 exam dumps that can help them prepare for the actual Lpi 305-300 exam.

## Lpi LPIC-3 Exam 305: Virtualization and Containerization Sample Questions (Q53-Q58):

NEW QUESTION # 53

FILL BLANK

Which subcommand of virsh opens the XML configuration of a virtual network in an editor in order to make changes to that configuration? (Specify ONLY the subcommand without any parameters.)

**Answer:**

Explanation:

net-edit

#### NEW QUESTION # 54

What is the purpose of the kubelet service in Kubernetes?

- A. Store and replicate Kubernetes configuration data.
- B. Provide a command line interface to manage Kubernetes.
- C. Manage permissions of users when interacting with the Kubernetes API.
- **D. Run containers on the worker nodes according to the Kubernetes configuration.**
- E. Build a container image as specified in a Dockerfile.

**Answer: D**

#### NEW QUESTION # 55

Which of the following values would be valid in the FROM statement in a Dockerfile?

- A. registry:ubuntu:focal
- B. file:/tmp/ubuntu/Dockerfile
- C. docker://ubuntu: focal
- D. http://docker.example.com/images/ubuntu-focal.iso
- **E. ubuntu:focal**

**Answer: E**

#### NEW QUESTION # 56

Which container orchestration platform is often associated with automated scaling and load balancing?

- A. Amazon ECS
- B. LXC
- C. Docker Compose
- **D. Kubernetes**

**Answer: D**

Explanation:

Kubernetes is the container orchestration platform most strongly associated with automated scaling and load balancing. According to container orchestration documentation, Kubernetes provides built-in features such as Horizontal Pod Autoscaling, service-based load balancing, self-healing, and declarative deployment models.

Docker Compose and LXC are not orchestration platforms at scale, and while Amazon ECS supports scaling, Kubernetes is the industry-standard platform most commonly referenced for these capabilities.

Therefore, the correct answer is B.

#### NEW QUESTION # 57

Which of the following commands moves the libvirt domain web1 from the current host system to the host system host2?

- A. virsh patch web1 .Domain.Node=host2
- B. virsh cp .:web1 host2:web1
- C. virsh pool-add host2 web1
- **D. virsh migrate web1 qemu+ssh://host2/system**
- E. virsh node-update host1=-domweb1 host2=+domweb1

**Answer: D**

Explanation:

The correct command to move the libvirt domain web1 from the current host system to the host system host2 is virsh migrate web1 qemu+ssh://host2/system. This command uses the virsh migrate command, which initiates the live migration of a domain to another

host1. The first argument is the name of the domain to migrate, which in this case is web1. The second argument is the destination URI, which specifies the connection to the remote host and the hypervisor to use<sup>2</sup>. In this case, the destination URI is `qemu+ssh://host2`

### NEW QUESTION # 58

By taking a 305-300 practice exam, you can find out what you're good at. 305-300 exam preparation software is the best way to prepare for your 305-300 certification exam. With the 305-300 list of questions, you can brush up on your skills and knowledge. With RealValidExam, you'll access a lot of 305-300 Practice Questions, detailed explanations, and personalized feedback. And because it's all online, you can study anywhere, anytime. The LPIC-3 Exam 305: Virtualization and Containerization (305-300) practice exam consists of questions from a pool of questions.

- [illegible]
