Official HCL-DOM-AADM-12 Practice Test & PDF HCL-DOM-AADM-12 Download

We promise to provide a high-quality simulation system with advanced HCL-DOM-AADM-12 study materials. With the simulation function, our HCL-DOM-AADM-12 training guide is easier to understand and have more vivid explanations to help you learn more knowledge. You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real HCL-DOM-AADM-12 Exam. You will be confident if you have more experience on the HCL-DOM-AADM-12 exam questions!

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which tab in the Domino Administrator Client provides tools to manage database replication?

- **A. Files**
- B. Messaging
- C. Configuration
- D. People & Groups

Answer: A

Explanation:

The Files tab in the HCL Domino Administrator client is the primary location for managing physical database files and their replicas. Within this tab, an administrator can select one or more databases and use the Tools pane to access Replication utilities. This allows them to create new replicas, manage existing ones, and manually trigger replication between the local server and a destination server.

NEW QUESTION # 65

What is the purpose of using a silent install method for Domino server installation?

- **A. To automate installation without user interaction**
- B. To allow interactive, real-time feedback during setup
- C. To require manual license key entry
- D. To enforce GUI-based configuration only

Answer: A

Explanation:

The Silent Install method is used to automate the installation of Domino binaries across one or many servers without requiring a person to manually click through the graphical interface. This is achieved by using a "response file" that contains all the necessary installation parameters. It is highly efficient for large-scale deployments or for installing Domino on remote servers where a graphical display (GUI) may not be available.

NEW QUESTION # 66

Which feature within the Domino Administrator Client allows you to replicate databases across servers manually?

- A. Server > Status > Replication Queue
- B. Files > Tools > Compact
- **C. Files > Tools > Replicate**
- D. Configuration > Policies

Answer: C

Explanation:

While replication is typically automated via schedules in Connection documents, administrators can trigger it manually when needed. This is done by navigating to the Files tab in the Domino Administrator Client, selecting the desired database, and choosing the Replicate option from the Tools menu. This manual trigger allows for immediate synchronization of data between a source and destination server.

NEW QUESTION # 67

Which file is automatically updated during Domino server configuration to store environment-specific settings?

- A. names.nsf
- B. admin4.nsf
- C. server.id
- **D. notes.ini**

Answer: D

Explanation:

The notes.ini file is the primary configuration file for an HCL Domino server. During the initial setup and configuration process, the Domino utility automatically updates this file with environment-specific settings, such as the server's name, the path to the data directory, and the specific tasks to be loaded at startup. It serves as the master checklist for how the server behaves every time it boots.

NEW QUESTION # 68

What authentication method does Domino use by default for client-to-server access?

- A. RADIUS-based challenge-response
- B. Biometric signature verification
- **C. Notes ID-based authentication using public key infrastructure (PKI)**
- D. OAuth 2.0 token-based login

Answer: C

Explanation:

The foundational security of HCL Domino is built on Public Key Infrastructure (PKI). By default, when a Notes client connects to a Domino server, it uses the Notes ID file. This file contains the user's private key.

The server uses the corresponding public key (stored in the user's Person document) to perform a complex cryptographic "handshake" to verify the user's identity without ever sending the actual password or private key over the network.

NEW QUESTION # 69

.....

Our HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late. This kind of approach is great for complete and flawless HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) test preparation.
