Salesforce Certified Platform Developer Sample Questions (Q36-Q41):

NEW QUESTION # 36
An org tracks customer orders on an Order object and the items of an Order on the Line Item object. The Line Item object has a MasterDetail relationship to the order object. A developer has a requirement to calculate the order amount on an Order and the line amount on each Line item based on quantity and price.
What is the correct implementation?

- A. Implement the Line amount as a currency field and the order amount as a SUM formula field.
- B. Write a process on the Line item that calculates the item amount and order amount and updates the filed on the Line Item and the order.
- C. Implement the line amount as a numeric formula field and the order amount as a roll-up summary field.
- D. Write a single before trigger on the Line Item that calculates the item amount and updates the order amount on the Order.

Answer: C

NEW QUESTION # 37
