Real Microsoft Power BI Data Analyst Test Questions - PL-300 Actual Torrent & Microsoft Power BI Data Analyst Pdf Questions

In order to make sure your whole experience of buying our PL-300 prep guide more comfortable, our company will provide all people with 24 hours online service. The experts and professors from our company designed the online service system on our PL-300 exam questions for all customers. If you purchasing the PL-300 Test Practice files designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. And you can enjoy updates of PL-300 learning guide for one year after purchase.

Microsoft Power BI Data Analyst Sample Questions (Q365-Q370):

NEW QUESTION # 365
You have a Power BI model that contains a table named Sales. Sales has the following three measures:
A measure named Total Sales Last Year that displays the sales from the previous calendar year. The current value is 32.89 million.
A measure named Total Sales This Year that displays the sales from the current calendar year. The current value is 11.69 million.
A measure named Total Sales Difference that uses a DAX formula of Sales[Last Year] - Sales[This Year].
You need to create the following visualization.

How should you configure the visualization? To answer, drag the appropriate measures to the correct fields. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 366
You have an API that returns more than 100 columns. The following is a sample of column names.
* client_notified_timestamp
* client_notified_source
* client_notified_sourceid
* client_notified_value
* client_responded_timestamp
* client_responded_source
* client_responded_sourceid
* client_responded_value
You plan to include only a subset of the returned columns.
You need to remove any columns that have a suffix of sourceid.
How should you complete the Power Query M code? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
Box 1: Table.RemoveColumns
When you do "Remove Columns" Power Query uses the Table.RemoveColumns function Box 2: List.Select Get a list of columns.
Box 3: Text.EndsWith

NEW QUESTION # 367
You have a Power BI report that contains five pages.
Pages 1 to 4 are visible and page 5 is hidden.
You need to create a solution that will enable users to quickly navigate from the first page to all the other visible pages. The solution must minimize development and maintenance effort as pages are added to the report.
What should you do first?

- A. Add a bookmark navigation button to page 1.
- B. Create a bookmark for each page.
- C. Add a blank button to page 1.
- D. Add a page navigation button to page 1.

Answer: A

Explanation:
The solution must minimize development and maintenance effort as pages are added to the report. If we add more pages the report they will be automatically added to the page navigator.
Only thing is you have to change 'show hidden pages' option to off.
But with the bookmark navigator, lot of efforts required to create individual bookmark to each page and also the newly added pages manually. another problem is it also adds all other bookmarks to the navigator which we don't need.
So we should create a page navigator button in page 1(and set 'show hidden pages' to off).

NEW QUESTION # 368
Hotspot Question
You need to create a visualization to meet the reporting requirements of the sales managers.
How should you create the visualization? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
Scenario: The sales managers require a visual to analyze sales performance versus sales targets.
Box 1: KPI -
A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.
Box 2: Sales[sales_amount]
Box 3: Date[month]
Time > FiscalMonth. This value will represent the trend.
Box 4: Targets[sales_target]

NEW QUESTION # 369

You have a collection of reports for the HR department of your company. The datasets use row-level security (RLS). The company has multiple sales regions that each has an HR manager. You need to ensure that the HR managers can interact with the data from their region only. The HR managers must be prevented from changing the layout of the reports. How should you provision access to the reports for the HR managers?

- A. Publish the reports to a different workspace other than the one hosting the datasets.
- B. Add the HR managers as members of the existing workspace that hosts the reports and the datasets.
- C. Create a new workspace, copy the datasets and reports, and add the HR managers as members of the workspace.
- D. Publish the reports in an app and grant the HR managers access permission.

Answer: D

Explanation:
Note: Row-level security (RLS) with Power BI can be used to restrict data access for given users. Filters restrict data access at the row level, and you can define filters within roles. In the Power BI service, members of a workspace have access to datasets in the workspace. RLS doesn't restrict this data access.
