ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q19-Q24):

NEW QUESTION # 19

Why is it recommended to keep the value of the property 'com.snc.project.task.max_task_duration' to 2600 or under?

- A. Because projects longer than 2600 days will no longer load.
- **B. To avoid application memory issues.**
- C. Best practices states projects should be no longer than 5 years.
- D. The system is unable to handle more than 2600 tasks.

Answer: B

NEW QUESTION # 20

The RIDAC workflow can be modified by using which recommended feature?

- A. Project Form
- **B. Workflow Editor**
- C. Flow Designer
- D. Service Catalog

Answer: B

Explanation:

Explanation

According to the RIDAC (Risk, Issue, Decision, Action, and Request Changes) record entries for a project document, the RIDAC workflow can be modified by using the Workflow Editor, which is a graphical tool that allows you to create and edit workflows. The other options are not correct, as they are not recommended features for modifying the RIDAC workflow. The Project Form is used to create and update project records. The Flow Designer is used to automate processes without coding. The Service Catalog is used to order items and services.

NEW QUESTION # 21

If a lens has four entities, which entity within the lens structure would not have a parent reference?

- **A. Top-level entity**
- B. Third-level entity
- C. Bottom entity
- D. Second-level entity

Answer: A

Explanation:

According to the ServiceNow documentation¹, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 22

What role can configure the default columns in the project planning console?

Choose 2 answers

- A. admin
- B. it_pps_admin
- C. it_console_admin
- D. it_project_manager

Answer: A,B

Explanation:

According to the ServiceNow support article¹, the it_pps_admin role can configure the default columns in the project planning console by modifying the pm_project_planning_console list view. The admin role can also do this, as well as any other configuration on the platform².
