New Microsoft MB-335 Exam Pattern - MB-335 Valid Test Questions

Do you want to enhance your professional skills? How about to get the MB-335 test certification for your next career plan? Be qualified by Microsoft MB-335 certification, you will enjoy a boost up in your career path and achieve more respect from others. Here, we offer one year free update after complete payment for MB-335 Pdf Torrent, so you will get the latest MB-335 study

practice for preparation. 100% is our guarantee. Take your MB-335 real test with ease.

Microsoft MB-335 certification exam is for Dynamics 365 professionals who plan, implement, and manage supply chain management solutions for businesses. MB-335 exam is aimed at supply chain management professionals who have the expertise to implement Dynamics 365 Supply Chain Management solutions effectively. The MB-335 Certification Exam is part of the requirements needed to become a Dynamics 365 Supply Chain Management Functional Consultant Expert—a sought-after professional in the industry who helps organization optimize their supply chain management processes.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q51-Q56):

NEW QUESTION # 51

You are a manufacturing consultant helping a client test out different bill of material (BOM) and route consumption options when starting production orders. Material and labor consumption are to be completed before Report as finish.

You are running a production order with BOM lines that have a Flushing principle set to Start. The Automatic Route Consumption Runtime has been set to Yes.

You have set up the default Start user options for all production orders as shown in the exhibit below.

The screenshot shows the 'Set up start' configuration page in Microsoft Dynamics 365. The page is divided into two columns: 'Use on selected orders' and 'Make default for all users'. The 'Use on selected orders' column includes settings for 'START' (Date: 12/18/2018, Start production: Yes), 'REFERENCES' (No), 'ROUTE CARD JOURNAL' (Route card: Route, Automatic route consumption: Always, Post route card now: Yes, End-mark route: No), and 'JOURNALS' (Show journal info: Yes). The 'Make default for all users' column includes settings for 'PICKING LIST JOURNAL' (Picking list: Pick, Automatic BOM consumption: Flushing principle, Create journal/pdf: [blank], Post picking list now: No, Physical reduction: No, Complete picking list journal: Yes, End-mark picking list: Yes, Pick negative: No, Print picking list: No) and a 'Print options' button at the bottom.

Based on the settings in Route Card Journal area, what will happen when the production order is started?

	▼
A route card that includes only hours is posted	
A route card that only includes hours and good quantities is posted	
An unposted route card is posted. Hours and quantities are blank	

Based on the settings in the Picking list journal area, what will happen when the production order is started?

	▼
A picking list is posted with consumption quantities entered and end selected	
An unposted picking list is created with consumption quantities filled in for all lines and end selected	
An unposted picking list is created with consumption quantities blank and end selected	

Answer:

Explanation:

Based on the settings in Route Card Journal area, what will happen when the production order is started?

	▼
A route card that includes only hours is posted	
A route card that only includes hours and good quantities is posted	
An unposted route card is posted. Hours and quantities are blank	

Based on the settings in the Picking list journal area, what will happen when the production order is started?

	▼
A picking list is posted with consumption quantities entered and end selected	
An unposted picking list is created with consumption quantities filled in for all lines and end selected	
An unposted picking list is created with consumption quantities blank and end selected	

Explanation:

Based on the settings in Route Card Journal area, what will happen when the production order is started?

Based on the settings in the Picking list journal area, what will happen when the production order is started?

NEW QUESTION # 52

A company uses Dynamics 365 Supply Chain Management.

Several production orders are in the started status.

An issue with equipment causes a rollback in the production status for some of the orders.

Some orders must be reset once the equipment is repaired, based on which products were being manufactured.

You need to reset the production orders based on the requirements

Which status should you use for each requirement? To answer, drag the appropriate statuses to the correct requirements. Each status may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Statuses	Requirement	Status
Created	The report as finished quantities need to be reverted but retain the production jobs that were created.	<input type="text"/>
Ended	The production jobs need to be deleted but retain the calculated item consumption calculations.	<input type="text"/>
Estimated		
Released		

Answer:

Explanation:

Statuses	Requirement	Status
Created	The report as finished quantities need to be reverted but retain the production jobs that were created.	Created
Ended	The production jobs need to be deleted but retain the calculated item consumption calculations.	Ended
Estimated		
Released		

NEW QUESTION # 53

A company uses Process manufacturing for most products and Discrete manufacturing for other products. The company is creating a formula for a new product. The new item will be used to make a name brand product and two generic brand products.

This item has the following requirements:

- * Production of the name brand and generic products must use the same formula.
- * The company must produce all three items at the same time.

You need to create a produced item that can make two generic items and one main item.

How should you set up the item?

- A. Create the name brand product as the main product and use a formula production type. Create the two generic items as a formula planning production type planning items. Copy the formula from the name brand item into each of the generic items.
- B. Create the name brand item as a Bills of material production type item. Create the two generic items as a sub-assembly on the Bills of material for the name brand product.
- C. Create the name brand item as a Bills of material production type item. Add the two generic items on the Bills of material for the name brand product and use line type phantom
- D. Create a product as the main product and use a planning item production type. Create the name brand and two generic products as co-products for the planning item.

Answer: A

NEW QUESTION # 54

A skateboard manufacturer uses route operations to schedule resources and estimate units per hour. All products use the same sub assembly item and resource sanding process.

You observe an Increase in the number of units a sanding belt resource can produce. The production schedule is now inaccurate due to the number of units the sanding belt line can produce. You must make a permanent change to the number of units the resource can produce for all future orders.

You need to adjust the process quantity on the route operation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a Microsoft Dynamics 365 interface. On the left, there is a list of actions under the heading "Actions":

- Apply the new template to the resource's calendar.
- Create a new working time template.
- Select the calendar related to the resource.
- In the engineering tab of the subassembly item, select route.
- Select times on the operation that use the resource.
- In the Process qty. field, update the quantity.

On the right, there is an "Answer area" which is currently empty. The interface includes a Microsoft logo and navigation arrows.

Answer:

Explanation:

This screenshot shows the same interface as above, but with the correct actions moved to the answer area. The actions in the "Actions" list are: "Apply the new template to the resource's calendar.", "Create a new working time template.", "Select the calendar related to the resource.", "In the engineering tab of the subassembly item, select route.", "Select times on the operation that use the resource.", and "In the Process qty. field, update the quantity." The "Answer area" on the right contains three items in sequence: 1. "In the engineering tab of the subassembly item, select route.", 2. "Select times on the operation that use the resource.", and 3. "In the Process qty. field, update the quantity." The interface includes a Microsoft logo and navigation arrows.

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

This screenshot shows the same interface as above, but with an incorrect answer sequence. The actions in the "Actions" list are: "Apply the new template to the resource's calendar.", "Create a new working time template.", and "Select the calendar related to the resource." The "Answer area" on the right contains three items in sequence: 1. "In the engineering tab of the subassembly item, select route.", 2. "Select times on the operation that use the resource.", and 3. "In the Process qty. field, update the quantity." The interface includes a Microsoft logo and navigation arrows.

NEW QUESTION # 55

You need to calculate estimated consumption of ingredients for liquid cleaning solution.

What is the consumption? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Consumption factor	Consumption in liters
Estimated consumption	<input type="text"/> <ul style="list-style-type: none"> 40 liters 50 liters 80 liters 100 liters
Round up to a multiple	<input type="text"/> <ul style="list-style-type: none"> 20 liters 40 liters 50 liters 100 liters
Excess consumption	<input type="text"/> <ul style="list-style-type: none"> 10 liters 20 liters 40 liters 50 liters

Answer:

Explanation:

Consumption factor	Consumption in liters
Estimated consumption	<input type="text"/> <ul style="list-style-type: none"> 40 liters 50 liters 80 liters 100 liters
Round up to a multiple	<input type="text"/> <ul style="list-style-type: none"> 20 liters 40 liters 50 liters 100 liters
Excess consumption	<input type="text"/> <ul style="list-style-type: none"> 10 liters 20 liters 40 liters 50 liters

Explanation:

Consumption factor	Consumption in liters
Estimated consumption	<input type="text"/> <ul style="list-style-type: none"> 40 liters 50 liters <li style="background-color: #e0e0e0;">80 liters 100 liters
Round up to a multiple	<input type="text"/> <ul style="list-style-type: none"> 20 liters 40 liters <li style="background-color: #e0e0e0;">50 liters 100 liters
Excess consumption	<input type="text"/> <ul style="list-style-type: none"> 10 liters <li style="background-color: #e0e0e0;">20 liters 40 liters 50 liters

Microsoft

NEW QUESTION # 56

.....

You have the option to change the topic and set the time according to the actual Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam. The Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) practice questions give you a feeling of a real exam which boost confidence. Practice under real Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam situations is an excellent way to learn more about the complexity of the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam dumps.
