Candidates who become Peoplecert DevOps-Foundation certified demonstrate their worth in the Peoplecert field. The PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) certification is proof of their competence and skills. This is a highly sought-after skill in large Peoplecert companies and makes a career easier for the candidate. To become certified, you must pass the PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) certification exam. For this task, you need high-quality and accurate PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam dumps. We have seen that candidates who study with outdated PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) practice material don't get success and lose their resources.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Topic 2	<ul style="list-style-type: none"> • Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.
Topic 3	<ul style="list-style-type: none"> • Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 4	<ul style="list-style-type: none"> • Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI • CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.
Topic 5	<ul style="list-style-type: none"> • Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 6	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 7	<ul style="list-style-type: none"> • Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.

Reliable Peoplecert DevOps-Foundation Exam Study Material from ExamTorrent

If you are overwhelmed with the job at hand, and struggle to figure out how to prioritize your efforts, these would be the basic problem of low efficiency and production. You will never doubt anymore with our DevOps-Foundation test prep. With our DevOps-Foundation exam questions, you will not only get the DevOps-Foundation Certification quickly, but also you can get the best and helpful knowledge. And that when you make a payment for our DevOps-Foundation quiz torrent, you will possess this product in 5-10 minutes and enjoy the pleasure and satisfaction of your study time.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

The last release of a critical application contained an error that significantly impacted the business. While the error was detected immediately after release, the situation was not resolved in a timely manner. During the retrospective, it was identified that many of the delays were the result of poor communication and collaboration between development and operational teams.

What steps could the IT organization take to improve its response and resolution in the future?

- **A. Implement chat platforms for faster access and collaboration**
- B. Use social media to communicate between teams
- C. Increase the number of people that are alerted when an error occurs
- D. Introduce self-help tools to empower users to solve their own problems

Answer: A

Explanation:

Poor communication and collaboration slow incident resolution. DevOps emphasizes fast, transparent communication channels between Dev, Ops, and other stakeholders. Implementing chat platforms (e.g., Slack, Microsoft Teams) that integrate with monitoring, alerting, and deployment tools enables:

- * Real-time collaboration across geographically distributed teams
- * Immediate sharing of incident context and system data
- * Faster decision-making and coordinated action

A (alerting more people) risks causing noise without improving targeted response. B (social media) is not secure or appropriate for enterprise incident management. C (self-help tools) benefits end-users but does not address Dev-Ops collaboration.

Thus, D provides the most direct and effective improvement in communication for faster incident resolution.

NEW QUESTION # 50

Why are feedback loops important for improving DevOps capabilities?

- A. Sharing is prevented
- **B. Trust grows**
- C. Information is not amplified
- D. They drive more unplanned work

Answer: B

Explanation:

In the PeopleCert DevOps framework, feedback loops are essential for creating trust between teams. When feedback is timely, accurate, and acted upon, teams see that issues are addressed quickly, leading to increased confidence in the process and in each other.

High-trust environments promote openness, knowledge sharing, and collaborative problem-solving. This encourages teams to raise issues early and experiment with improvements without fear of blame.

Options A, B, and D describe negative effects that actually occur when feedback loops are absent or ineffective.

Well-designed loops reduce unplanned work, promote sharing, and amplify important information to the right people.

Therefore, C-trust grows-is the correct answer.

Accelerate- Correlation Between Culture, Trust, and Performance

NEW QUESTION # 51

Which of the following sets of skills are essential for a DevOps professional?

- **A. Business, technical, core (soft) skills, self-management**
- B. Business, Agile, ITSM, Lean and networking
- C. Business, Agile, infrastructure, communication
- D. Business, development, cloud and containers, core skills

Answer: A

Explanation:

A DevOps professional needs:

Business skills: Understanding the business context and value.

Technical skills: Automation, coding, cloud, infrastructure.

Core (soft) skills: Collaboration, communication, empathy, learning.

Self-management: Time, priorities, feedback.

Other options miss the full blend or focus too much on tech or process.

Extract-style reference:

"DevOps success requires a blend of business, technical, and core (soft) skills, as well as the ability to self-manage and continuously learn."

- DevOps Handbook; Accelerate

PeopleCert DevOps Foundation v3.6: Holistic skillsets are emphasized for cross-functional teams.

NEW QUESTION # 52

What makes the concept of learning through immersion particularly useful in a DevOps culture?

- A. People learn by doing
- B. People learn from subject matter experts
- C. People learn from their failures in a safe environment
- D. All of the Above

Answer: D

Explanation:

Learning through immersion is powerful in DevOps because:

- * People learn by doing (A)
- * People learn from subject matter experts (B)
- * People learn from failures in a safe environment (C)
- * All of the above (D) are true

DevOps encourages hands-on, real-world, collaborative, and safe-to-fail learning environments.

Extract-style reference:

"Immersive learning, including hands-on labs, peer interactions, and blameless retrospectives, is vital to building DevOps capabilities."

-DevOps Handbook, Accelerate

PeopleCert DevOps Foundation v3.6: Calls for learning culture, blamelessness, and experimentation.

NEW QUESTION # 53

How can Scrum support DevOps' Third Way?

- A. By overcoming constraints and getting more work done
- B. By using Sprint Retrospectives as learning and improvement opportunities
- C. By encouraging Scrum Teams to invite an operational professional to their team
- D. By encouraging shorter feedback loops through Daily Scrums

Answer: B

Explanation:

The Third Way of DevOps emphasizes continuous learning and experimentation to drive improvement.

Scrum supports this principle through Sprint Retrospectives, which are dedicated sessions at the end of each sprint where the team reflects on what went well, what could be improved, and how to adapt processes or behaviors.

Retrospectives create a structured space for honest discussion, experimentation, and the application of lessons learned. This aligns directly with the Third Way's focus on learning from successes and failures, promoting innovation, and building a culture of continual improvement.

B focuses on throughput, which aligns more with the First Way (flow). C could improve collaboration but is not a core mechanism of the Third Way. D (shorter feedback loops) is more related to the Second Way.

Thus, A is correct because Sprint Retrospectives directly embody the Third Way's goal of learning and adaptation.
