

## 4A0-D01 Valid Guide Files - 4A0-D01 Instant Discount

Our 4A0-D01 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our 4A0-D01 study materials. For instance, PC version of our 4A0-D01 training quiz is suitable for the computers with the Windows system and supports the MS Operation System. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our 4A0-D01 learning guide at any time.

To make you be rest assured to buy the 4A0-D01 exam materials on the Internet, our Lead2PassExam have cooperated with the biggest international security payment system PayPal to guarantee the security of your payment. After the payment, you can instantly download 4A0-D01 Exam Dumps, and as long as there is any 4A0-D01 exam software updates in one year, our system will immediately notify you. To choose Lead2PassExam is equivalent to choose the best quality service.

### 4A0-D01 Valid Guide Files | Pass-Sure 4A0-D01 Instant Discount: Nokia Data Center Fabric Fundamentals Exam 100% Pass

Lead2PassExam is a specialized IT certification exam training website which provide you the targeted exercises and current exams. We focus on the popular Nokia Certification 4A0-D01 Exam and has studied out the latest training programs about Nokia certification 4A0-D01 exam, which can meet the needs of many people. Nokia 4A0-D01 certification is a reference of many well-known IT companies to hire IT employee. So this certification exam is very popular now. Lead2PassExam is also recognized and relied by many people. Lead2PassExam can help a lot of people achieve their dream. If you choose Lead2PassExam, but you do not successfully pass the examination, Lead2PassExam will give you a full refund.

### Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.</li> </ul>

## Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q12-Q17):

### NEW QUESTION # 12

How does Nokia's Fabric Services System use a fabric intent to build the DC switch fabric?

- A. It uses a digital sandbox to connect workloads to the DC fabric.
- B. It uses a digital sandbox to build the configuration files for the DC fabric.
- C. It uses telemetry data to build the configuration files for the DC fabric.
- **D. It uses a YAML file that defines the intended configuration state of the DC fabric.**

**Answer: D**

Explanation:

Nokia's Fabric Services System uses a fabric intent defined in a declarative YAML file to specify the desired state of the data center fabric, which is then used to build and configure the fabric accordingly.

### NEW QUESTION # 13

Which of the following statements about Nokia's Fabric Services System is FALSE?

- A. Cloud-native design enables easy integration with the customer's environment.
- B. Telemetry data is provided in a context that is relevant to the fabric intent.
- **C. Digital sandbox provides notification of performance issues in the data center fabric.**
- D. Data center fabric configuration is represented as the fabric intent in a declarative YAML format.

**Answer: C**

Explanation:

The Digital Sandbox in Nokia's Fabric Services System is primarily used for simulation and validation of fabric intent, not for providing notifications of performance issues.

### NEW QUESTION # 14

Which of the following statements about Zero Touch Provisioning (ZTP) is FALSE?

- A. The ZTP process relies on a DHCP server for an IP address.
- B. ZTP allows a router to become operational in the network without any pre-provisioning.
- **C. The ZTP process downloads a provisioning script defined in the TLS profile.**
- D. The ZTP process is managed by the ZTP application in Nokia SR Linux.

**Answer: C**

Explanation:

The ZTP process downloads a provisioning script typically from a defined URL or server, not from a TLS profile. The TLS profile is used for securing communications but does not define the provisioning script location.

#### NEW QUESTION # 15

Which of the following is NOT a function of Nokia's SR Linux application manager?

- A. It reads the application's configuration information and starts each application.
- **B. It translates the application's YANG model into protobufs for the IDB.**
- C. It monitors the health of all applications.
- D. It manages the SR Linux and customer-defined applications.

**Answer: B**

Explanation:

The SR Linux application manager does not perform the function of translating an application's YANG model into protobufs for the Interface DataBase (IDB). Its primary roles are managing applications, reading their configuration, and monitoring their health.

#### NEW QUESTION # 16

Examine the exhibit. Which of the following statements is TRUE?

- A. A recursive lookup is performed to resolve 10.1.1.0 to use 10.2.1.0.
- B. A recursive lookup is performed to resolve 10.2.1.0 to use 10.1.1.0.
- C. The next-hop selected for this route will be based on the preference value configured for each next-hop.
- **D. The next-hop group for this static route is configured with two next-hops.**

**Answer: D**

Explanation:

The static route shows two next-hop IP addresses (10.1.1.0 and 10.2.1.0) listed, indicating that a next-hop group with multiple next-hops is configured for load balancing or redundancy.

#### NEW QUESTION # 17

.....

With a high quality, we can guarantee that our 4A0-D01 practice quiz will be your best choice. There are three different versions about our products, including the PDF version, the software version and the online version. The three versions are all good with same questions and answers; you can try to use the version of our 4A0-D01 Guide materials that is suitable for you. Our 4A0-D01 exam questions have many advantages, I am going to introduce you the main advantages of our 4A0-D01 study materials, I believe it will be very beneficial for you and you will not regret to use our 4A0-D01 learning guide.
