# High Pass Rate SC-401 Exam Guide - SC-401 Latest Practice Dumps

2026 Latest PDFDumps SC-401 PDF Dumps and SC-401 Exam Engine Free Share: https://drive.google.com/open?id=1aLr-N_MHgW3MHk8SPkYcR-6AvHLssK1B

For candidates who buy SC-401 test materials online, they may care more about the privacy protection. We can ensure you that your personal information such as your name and email address will be protected well if you choose us. Once the order finishes, your personal information will be concealed. Furthermore, SC-401 exam braindumps are high-quality, and we can help you pass the exam just one time. We promise that if you fail to pass the exam, we will give you full refund. If you have any questions for SC-401 Exam Test materials, you can contact with us online or by email, we will give you reply as quickly as we can.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 2	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 3	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

Topic 4	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Microsoft SC-401 Exam Questions-Shortcut To Success

The life which own the courage to pursue is wonderful life. Someday when you're sitting in a rocking chair to recall your past, and then with smile in your face. Then your life is successful. Do you want to be successful in life? Then use PDFDumps's Microsoft SC-401 Exam Training materials quickly. This material including questions and answers and every IT certification candidates is very applicable. The success rate can reach up to 100%. Why not action? Quickly to buy it please.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q104-Q109):

NEW QUESTION # 104
You have a Microsoft 36S ES subscription that contains a Windows 11 device named Device 1 and three users named User 1. User2. and User3.
You plan to deploy Azure Information Protection (AIP) and the Microsoft Purview Information Protection client to Device 1.
You need to ensure that the users can perform the following actions on Device1 as part of the planned deployment
* User 1 will test the functionality of the client.
* User2 will install and configure the Microsoft Rights Management connector.
* User3 will be configured as the service account for the information protection scanner.
The solution must maximize the security of the sign-in process for the users What should you do?

- A. Exclude User2 and User3 from multifactor authentication (MfA).
- B. Exclude User1 and User? from multifactor authentication (Mf A}
- C. Enable User? and Usex3 for passwordless authentication.
- D. Enable User1. User I and User 3 for passkey (FIDO2) authentication

Answer: C

NEW QUESTION # 105
Drag and Drop Question
You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.
You need to implement insider risk management. The solution must meet the following requirements:
- Ensure that User1 can create insider risk management policies.
- Ensure that User2 can use content captured by using insider risk
management policies.
- Follow the principle of least privilege.
To which role group should you add each user? To answer, drag the appropriate role groups to the correct users. Each role group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Insider Risk Management Admins
Ensure that User1 can create insider risk management policies.
Use this role group to initially configure insider risk management and later to segregate insider risk administrators into a defined group. Users in this role group can create, read, update, and delete insider risk management policies, global settings, and role group assignments.
Box 2: Insider Risk Management Investigators

Investigators can access & view forensic evidence captures and Content Explorer.

NEW QUESTION # 106
You have a Microsoft 365 tenant
You need to create a new sensitive into type for items that contain the following:
* An employee ID number that consists of the hire date of the employee followed by a three digit number
* The words "Employee", "ID", or "Identification" within 300 characters of the employee ID number What should you use for the primary and secondary elements? To answer, select the appropriate options m the answer area NOTE: Each correct selection is worth one point
□

Answer:

Explanation:
□
Explanation:
□
Step 1 - Requirement
We need a custom sensitive information type (SIT) that detects:
An employee ID number in a specific format # hire date + three digits.
This is a pattern-based requirement.
Specific keywords within 300 characters of that ID # "Employee", "ID", or "Identification".
This is a keyword proximity requirement.
Step 2 - Sensitive info type elements in Microsoft 365
When creating custom SITs, you define primary and secondary elements:
Primary element # The main pattern or data to detect (the most defining factor).
Secondary element # Supporting evidence that must be found near the primary element to increase confidence.
Available elements:
Regular expression # Used to define patterns such as date + digits (for employee ID).
Keyword list # Used for lists of words/phrases like "Employee", "ID", "Identification".
Functions # Used for built-in validators like credit card checksum, not relevant here.
Reference: Create a custom sensitive information type in Microsoft 365 Step 3 - Apply to scenario Employee ID pattern (hire date + 3 digits) # Needs a regular expression # This must be the Primary element.
Keywords ("Employee", "ID", "Identification") within 300 characters # A keyword list # This must be the Secondary element.

NEW QUESTION # 107
You have a Microsoft 365 subscription.
You create a new trainable classifier.
You need to train the classifier.
Which source can you use to train the classifier?

- A. a Microsoft SharePoint Online site
- B. an A2ure Files share
- C. an NFS file share
- D. an on-premises Microsoft SharePoint Server site

Answer: A

NEW QUESTION # 108
You have Microsoft 365 E5 tenant that has a domain name of 86s40q.ofimicrosoft.com. The tenant contains the users shown in the following table.
□
You have a published sensitivity label.
The Access control settings for the sensitivity label are configured as shown in the exhibit (Click the Exhibit tab.)
□
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
□

Answer:

Explanation:
□
Explanation:
□
Comprehensive Detailed Explanation with References
We are given a sensitivity label with the following Access control settings:
Assign permissions now # meaning admins define permissions, not end users.
User access to content expires = Never.
Allow offline access = Always.
Permissions explicitly assigned:
LegalTeam@... # Co-Author
USSales@... # Reviewer
Dynamic watermarking and Double Key Encryption are not enabled.
Reference: Restrict access to content with sensitivity labels
Statement 1: Only users at your company can view an email that has the sensitivity label applied.
False, because permissions are explicitly assigned to two groups (LegalTeam, USSales).
If any external users were added, they would also get access. The configuration does not inherently restrict to only internal users.
The answer: NO
Statement 2: The owner of an email can assign permissions when applying the sensitivity label.
False, because the sensitivity label was configured with "Assign permissions now".
This means permissions are fixed by admins and cannot be modified by the email sender.
If "Let users assign permissions" was enabled, this would be YES.
The answerr: NO
Statement 3: USSales@86s40q.onmicrosoft.com
can print an email that has the sensitivity label applied.
USSales group has the Reviewer role.
Reviewer = Can view, read, and save, but cannot print, copy, or export.
Reference: Usage rights and role mapping for sensitivity labels
The answer: NO

NEW QUESTION # 109

......

When it comes to negotiating your salary with reputed tech firms, you could feel entirely helpless if you're a fresh graduate or don't have enough experience. You will have no trouble landing a well-paid job in a reputed company if you have Microsoft SC-401 Certification on your resume. Success in the test is also a stepping stone to climbing the career ladder. If you are determined enough, you can get top positions in your firm with the Microsoft SC-401 certification.
