

Free PDF Fortinet - FCP_FSA_AD-5.0 - FCP - FortiSandbox 5.0 Administrator–Efficient Valid Test Syllabus

Time talks. The passing rate for TestKingFree FCP_FSA_AD-5.0 download free dumps is really high. Our users do not worry about tests with our products. There was one big piece missing from the puzzle. As exams are very difficult and low passing rate, it will be useless if you do not purchase valid dumps. Fortinet FCP_FSA_AD-5.0 Exam Learning materials make you half the work double the things. Once you pass exam you will obtain a satisfied jobs as you desire.

The experts and professors of our company have designed the three different versions of the FCP_FSA_AD-5.0 prep guide, including the PDF version, the online version and the software version. Now we are going to introduce the online version for you. There are a lot of advantages about the online version of the FCP_FSA_AD-5.0 exam questions from our company. For instance, the online version can support any electronic equipment and it is not limited to all electronic equipment. More importantly, the online version of FCP_FSA_AD-5.0 study practice dump from our company can run in an off-line state, it means that if you choose the online version, you can use the FCP_FSA_AD-5.0 exam questions when you are in an off-line state. In a word, there are many advantages about the online version of the FCP_FSA_AD-5.0 prep guide from our company.

Valid FCP_FSA_AD-5.0 Test Dumps, Dump FCP_FSA_AD-5.0 Collection

As long as you can provide us with a transcript or other proof of your failure, we can refund you the full amount immediately. The goal of our FCP_FSA_AD-5.0 exam questions is always to get you through the FCP_FSA_AD-5.0 exam. If you don't pass, we won't earn you any money. This is what we should do for you as a responsible company. But our FCP_FSA_AD-5.0 Study Materials have the high pass rate as 98% to 100%, so it is guarantee for you to pass.

Fortinet FCP - FortiSandbox 5.0 Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which two products integrated with FortiSandbox work to protect against the lateral movement stage of the Cyber Kill Chain? (Choose two answers)

- A. FortiADC
- B. FortiDeceptor
- C. FortiMail
- D. FortiGate

Answer: B,D

Explanation:

From the Attack Methodologies lesson, the Study Guide explicitly states:

"During the lateral movement stage, the attacker is trying to compromise and infect other computers in the network. If these computers are protected with FortiClient, FortiClient can send any file that the computer downloads, to FortiSandbox for analysis."

"FortiDeceptor creates a network of decoys, to lure attackers and monitor their activities on the network. When attackers attack a decoy, an alert is generated. FortiDeceptor engages FortiSandBox to get a verdict on the suspected malware."

"If you deploy FortiGate as an ISFW firewall, FortiGate can analyze the traffic moving across subnets and send any files to FortiSandbox for analysis to prevent propagation." Both FortiDeceptor (Option B) and FortiGate (Option D) are specifically identified as protecting against the lateral movement stage through their FortiSandbox integration.

NEW QUESTION # 36

You must increase the scanning capacity of a FortiSandbox device by increasing the number of clones, but the FortiSandbox local clone limit is already at maximum. Which two actions can you take to expand the scanning capacity of the unit? (Choose two answers)

- A. Add custom VMs
- B. Add VM licenses to FortiSandbox
- C. Reorganize the scan priority list
- D. Deploy remote WindowsCloudVM and MACOSX clones

Answer: B,D

Explanation:

From the Scanning and Rating Components lesson, the Study Guide states:

"The universal VM license is a single license that grants you access to multiple VMs. Provides a scalable and cost-effective solution with up to 200 VMs on a single unit. Clone count limits shown on the VM Settings view apply to all enabled VM Types."

"When you enable Adaptive Scan, FortiSandbox dynamically adjusts the number of clones of any local VMs you have enabled.

Enabling this option does not affect the number of remote Mac OS or Windows cloud VMs." This confirms:

Option A - Deploying remote WindowsCloudVM and MACOSX clones expands capacity beyond local clone limits since remote VMs are not subject to local clone restrictions Option D - Adding VM licenses directly increases the number of available VMs up to 200 on a single unit Reorganizing the scan priority list (B) only affects scan order, not capacity. Adding custom VMs (C) would still be subject to the same local clone limits.

NEW QUESTION # 37

You are asked to configure FortiSandbox to use one VM instance for multiple sequential scan jobs without shutting down the instance between each scan job submission. Which scan profile setting must you enable to achieve this? (Choose one answer)

- A. VM scan ratio
- B. Parallel VM scan
- C. Adaptive VM scan
- D. Pipeline mode

Answer: D

Explanation:

From the Scanning and Rating Components lesson, the Study Guide explicitly states:

"The Pipeline Mode feature improves performance by allowing to scan multiple files, one at a time, without shutting down the VM instance after scanning each file."

"FortiSandbox will continue scanning files without shutting down the VM instance, as long as the VM status hasn't changed. If the VM status changes, then the VM instance will shut down and will be restored for the next job." This precisely matches the requirement - using one VM instance for multiple sequential scan jobs without shutting down between submissions. The other options serve different purposes:

Adaptive Scan dynamically adjusts clone numbers

VM Scan Ratio controls the percentage of jobs scanned in a VM

Parallel VM Scan runs multiple VMs simultaneously for a single job

NEW QUESTION # 38

You notice a recent file downloaded by some end stations is exhibiting malware behavior, however, on the sandbox the file is rated clean. After further investigation you determine that only end stations using the Opera browser are being affected. What must you do to prevent these infections? (Choose one answer)

- A. Configure a custom VM to use the same browser as the exploited end stations.
- B. Change the job queue priority to process web-based files first.
- C. Modify the scan profile to include the malware file type.
- D. Enable the STIX/TAXII Integration setting on FortiSandbox.

Answer: A

Explanation:

The best answer is B. The Study Guide explains that under VM settings, "FortiSandbox has a Browser selection that allows you to choose which internet browser the VM instance will use. This helps to customize the test using an internet browser that more closely resembles the user's environment or just monitor if the test delivers different results." It also states that the default browser choices are Internet Explorer, Firefox, Chrome, and Edge. In addition, the guide says that "The VM images provided by Fortinet might not suit your needs... You can generate a custom VM that fits your organization's needs and upload it to FortiSandbox." Because only endpoints using Opera are affected, the clean verdict likely occurred because the sandbox environment does not accurately reproduce the exploited browser environment. The most effective fix is to make the sandbox environment match the real target environment more closely by using a custom VM with the same browser behavior as the affected endpoints. The other answers do not address the root cause. STIX/TAXII is unrelated, changing the scan profile file type does not solve a browser-specific exploit path, and job queue priority affects order, not analysis fidelity. Therefore, the required action is to configure a custom VM to use the same browser as the exploited end stations.

NEW QUESTION # 39

You are asked to create an 802.3ad interface on FortiSandbox with port 2 and port 4. However, when attempting to make the configuration change, you discover that you cannot select port 4 for the aggregate bonding. What are two reasons for this issue? (Choose two answers)

- A. Port 4 is a sniffer interface.
- B. Port 4 is an administration interface.
- C. Port 4 is an api interface.
- D. Port 4 does not have an IP address.

Answer: B,C

Explanation:

From the Deployment and System Settings lesson, the Study Guide states:

"Other ports, with the exception of port3, can also be configured as management ports from CLI."

"You can set additional ports as management port using the CLI command shown on this slide." From the Lab Guide (Exercise 4 - Using Inline Scanning):

"FortiGate and FortiSandbox communicate through port 4443. Management or API ports grant access through port 4443."

"Enter the following command to enable API access on port2: set api-port port2" Ports that are designated as either administration interfaces or API interfaces cannot be selected for 802.3ad aggregate bonding because:

Option A - Port 4 configured as an administration interface is reserved for management traffic and cannot be repurposed for link aggregation Option C - Port 4 configured as an API interface is dedicated for API communication (port 4443) and is similarly restricted from being used in aggregate bonding configurations Port 4 in the Lab Guide is specifically referenced as the HA

communication and management port, confirming these restrictions apply when special roles are assigned to interfaces.

NEW QUESTION # 40

.....

TestKingFree gives a guarantee to our customers that they can pass the Fortinet FCP_FSA_AD-5.0 Certification Exam on the first try by preparing from the TestKingFree and if they fail to pass it despite their efforts they can claim their payment back as per terms and conditions. TestKingFree facilitates customers with a 24/7 support system which means whenever they get stuck somewhere they don't struggle and contact the support system which will assist them in the right way. A lot of students have prepared from practice material and rated it positively.

Valid FCP_FSA_AD-5.0 Test Dumps: https://www.testkingfree.com/Fortinet/FCP_FSA_AD-5.0-practice-exam-dumps.html

As long as you encounter obstacles in the learning process on our FCP_FSA_AD-5.0 training guide, send us an email and we will solve it for you at the first time, Fortinet Valid FCP_FSA_AD-5.0 Test Syllabus Our high passing rate is the leading position in this field, Want to learn more about Fortinet Valid FCP_FSA_AD-5.0 Test Dumps Installing and Configuring Valid FCP_FSA_AD-5.0

Test Dumps certification experience, The answers of TestKingFree's exercises is 100% correct and they can help you pass FCP_FSA_AD-5.0 Questions Fortinet Certified Professional Security Operations exam successfully.

No matter what your previous learning level is, there will be no problem of understanding. And with the simplified the content, you will find it is easy and interesting to study with our FCP_FSA_AD-5.0 learning questions.

Free PDF Quiz Fortinet - Fantastic FCP_FSA_AD-5.0 - Valid FCP - FortiSandbox 5.0 Administrator Test Syllabus

As long as you encounter obstacles in the learning process on our FCP_FSA_AD-5.0 training guide, send us an email and we will solve it for you at the first time, Our high passing rate is the leading position in this field.

Want to learn more about Fortinet Installing and Configuring Fortinet Certified Professional Security Operations certification experience, The answers of TestKingFree's exercises is 100% correct and they can help you pass FCP_FSA_AD-5.0 Questions Fortinet Certified Professional Security Operations exam successfully.
