

Free PDF Quiz FCSS_SDW_AR-7.4 - Updated Preparation FCSS - SD-WAN 7.4 Architect Store

BTW, DOWNLOAD part of PassTestking FCSS_SDW_AR-7.4 dumps from Cloud Storage: https://drive.google.com/open?id=1vzn-riAe8TYL0nNO9ImJx2effL_2viPL

A Fortinet FCSS_SDW_AR-7.4 practice questions is a helpful, proven strategy to crack the Fortinet FCSS_SDW_AR-7.4 exam successfully. It helps candidates to know their weaknesses and overall performance. PassTestking software has hundreds of Fortinet exam dumps that are useful to practice in real time. The FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) practice questions have a close resemblance with the actual FCSS_SDW_AR-7.4 exam.

For every candidates, practicing for the pass of the exam is an evitable process, since we can improve our ability. Our FCSS_SDW_AR-7.4 Exam Torrent will provide you the practice. The pass rate is 98.88%, and if you fail to pass the test, money back guarantee. Besides, we also have online chat service stuff, if you have any questions, you can have a chat with them, or you can send emails to us, we will give you the reply as quickly as we can.

Valid FCSS_SDW_AR-7.4 Test Syllabus | FCSS_SDW_AR-7.4 PDF Cram Exam

PassTestking also offers simple and easy-to-use FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) Dumps PDF files of real Fortinet FCSS_SDW_AR-7.4 exam questions. It is easy to download and use on smart devices. Since it is a portable format, it can be used on a smartphone, tablet, or any other smart device. This FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) PDF file contains the most probable actual FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam questions.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q52-Q57):

NEW QUESTION # 52

Refer to the exhibits.

Exhibit A

Name	Type	Outgoing Interface
HUB1-VPN1	Static	\$(ISP1)
HUB1-VPN2	Static	\$(ISP2)

Exhibit B

```
invalid template assignment - conflicting template assignment scope: device branch1_fgt. vdom root. x
_ipsec template [Branch_IPsec_1] and [Branch_IPsec_2]
```

Exhibit A shows two IPsec templates to define BranchIPsec_1 and Branch_IPsec_2. Each template defines a VPN tunnel. Exhibit B shows the error message that FortiManager displayed when the administrator tried to assign the second template to the FortiGate device.

Which statement best explain the cause for this issue?

- A. You should review the branch1_fgt configuration for the already configured tunnel with the name HUB1-VPN2.
- **B. You can assign only one IPsec template to each FortiGate device.**
- C. You can assign only one template with a tunnel of type static to each FortiGate device.
- D. You can define only one IPsec tunnel from branch devices to HUB1.

Answer: B

Explanation:

One Template per FortiGate Device, you have multiple tunnels inside the template.

NEW QUESTION # 53

Refer to the exhibit.

FortiGate router policy and diagnose output

```
branch1_fgt # show router policy
config router policy
    edit 1
        set src "10.0.1.128/255.255.255.128"
        set dst "128.66.0.0/255.255.255.0"
        set action deny
    next
end

branch1_fgt # diagnose sys sdwan service4

Service(1): Address Mode(IPV4) flags=0x4200 use-shortcut-sla
use-shortcut
    Tie break: cfg
    Shortcut priority: 2
        Gen(1), TOS(0x0/0x0), Protocol(0): src(1->65535):dst

```

How does FortiGate handle the traffic with the source IP 10.0.1.130 and the destination IP 128.66.0.125?

- A. FortiGate routes the traffic flow according to the FIB.
- B. FortiGate load balances the traffic flow through port1 and port2.
- C. FortiGate drops the traffic flow.
- D. FortiGate steers the traffic flow through port2.

Answer: C

Explanation:

The router policy explicitly denies traffic with source 10.0.1.128/25 (which includes 10.0.1.130) and destination 128.66.0.0/24 (which includes 128.66.0.125). Even though SD-WAN service 4 shows members (port1 and port2) alive and available for this traffic, the router policy is evaluated first and blocks it.

Therefore, FortiGate drops the traffic flow.

NEW QUESTION # 54

The administrator uses the FortiManager SD-WAN overlay template to prepare an SD-WAN deployment.

Using information provided through the SD-WAN overlay template wizard, FortiManager creates templates ready to install on the spoke and hub devices.

What are the three templates created by the SD-WAN overlay template for a spoke device? (Choose three.)

- A. Static route template
- B. CLI template
- C. BGP template
- D. IPsec tunnel template
- E. Rules template

Answer: C,D,E

Explanation:

Rules template # Defines the SD-WAN rules for traffic steering.

BGP template # Configures dynamic routing for overlay tunnels.

IPsec tunnel template # Builds the IPsec VPN tunnels from the spoke to the hubs.

NEW QUESTION # 55

You want FortiGate to use SD-WAN rules to steer local-out traffic.

Which two constraints should you consider? (Choose two.)

- A. By default, local-out traffic does not use SD-WAN.
- B. You must configure each local-out feature individually to use SD-WAN.
- C. By default, FortiGate uses SD-WAN rules only for local-out traffic that corresponds to ping and traceroute.
- D. You can steer local-out traffic only with SD-WAN rules that use the manual strategy.

Answer: A,B

Explanation:

By default, local-out traffic does not use SD-WAN → FortiGate normally sends local-out traffic (e.g., DNS, NTP, FortiGuard updates) directly through its interfaces without applying SD-WAN rules.

You must configure each local-out feature individually to use SD-WAN → To steer local-out traffic via SD-WAN, you must explicitly configure the desired local-out features (e.g., DNS, FortiGuard, CAPWAP) to use SD-WAN rules.

NEW QUESTION # 56

Refer to the exhibit.

An administrator checks the status of an SD-WAN topology using the FortiManager SD-WAN monitor menus. All members are configured with one or two SLAs.

Which two conclusions can you draw from the output shown? (Choose two.)

- A. This SD-WAN topology contains only two branch devices.
- B. The template view should be used to see the hub devices.
- C. branch2_fgt establishes six tunnels to the hubs and they are all up.
- D. One member of branch2_fgt is missing the SLAs.

Answer: A,D

NEW QUESTION # 57

.....

The remarkably distinguished results FCSS_SDW_AR-7.4 are enough to provide a reason for PassTestking's huge clientele and obviously the best proof of its outstanding products. This is the reason that professionals find our FCSS_SDW_AR-7.4 exam questions and answers products worthier than exam collection's or PassTestking's dumps. Above all, it is the assurance of passing the exam with PassTestking 100% money back guarantee that really distinguishes our Top FCSS_SDW_AR-7.4 Dumps.

Valid FCSS_SDW_AR-7.4 Test Syllabus: https://www.passtestking.com/Fortinet/FCSS_SDW_AR-7.4-practice-exam-dumps.html

1. When will I receive Fortinet FCSS_SDW_AR-7.4 real exam questions after purchasing. So our Valid FCSS_SDW_AR-7.4 Test Syllabus - FCSS - SD-WAN 7.4 Architect exam cram will be your best choice, And each version has latest FCSS_SDW_AR-7.4 exam questions materials for your free download, Fortinet Preparation FCSS_SDW_AR-7.4 Store On the Internet, you can find a variety of training tools, The PassTestking FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam dumps are ready for quick download.

Excessive subjection to red can lead to agitation, anger, and even FCSS_SDW_AR-7.4 violence, The SC firmware is enhanced to detect domain hangs and recover from such situations by resetting and rebooting the domain.
