Three Formats of Actual MSSC CLT Exam Questions Offered By PDFTorrent! Certified Logistics Technician (CLT) 4.0 CLT genuine dumps are designed in the three best formats. The name of these three formats of PDFTorrent MSSC CLT exam questions is CLT PDF Questions formats, Web-based and desktop MSSC CLT practice exam software. MSSC CLT dumps pdf format will help you to immediately prepare for the MSSC CLT exam.

MSSC CLT Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.
Topic 2	<ul style="list-style-type: none">Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.

Topic 3	<ul style="list-style-type: none"> • Quality Control Principles: This section of the exam measures skills of the Certified Logistics Associate and covers the fundamental concepts used to monitor and ensure that goods and processes meet required quality standards and customer expectations.
Topic 4	<ul style="list-style-type: none"> • Safe Material Handling and Equipment Operation: This section of the exam measures skills of the Certified Logistics Associate and covers the proper methods for safely moving materials and the correct operation of common handling equipment like forklifts and pallet jacks.
Topic 5	<ul style="list-style-type: none"> • Order Processing: This section of the exam measures skills of the Certified Logistics Technician and covers the steps required to accurately manage and fulfill customer requests, including picking and preparing the correct items for dispatch.
Topic 6	<ul style="list-style-type: none"> • Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.
Topic 7	<ul style="list-style-type: none"> • Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.
Topic 8	<ul style="list-style-type: none"> • The Logistics Environment: This section of the exam measures skills of the Certified Logistics Associate and covers the standard operational setting, including the various facilities, equipment, and regulatory factors that affect daily logistics tasks.
Topic 9	<ul style="list-style-type: none"> • The World of Logistics and the Global Supply Chain: This section of the exam measures skills of the Certified Logistics Associate and covers the foundational knowledge of how logistics fits into the broader global economy and the movement of goods from their origin to the final consumer.
Topic 10	<ul style="list-style-type: none"> • Teamwork and Good Workplace Conduct to Solve Problems: This section of the exam measures skills of the Certified Logistics Associate and covers the professional behaviors and collaborative techniques needed to work effectively with colleagues and resolve common operational issues as a team.
Topic 11	<ul style="list-style-type: none"> • Inventory Control: This section of the exam measures skills of the Certified Logistics Technician and covers the methods used to track stock levels, perform cycle counts, and reconcile inventory discrepancies to maintain high accuracy and prevent shortages or overstock.
Topic 12	<ul style="list-style-type: none"> • Measuring Weight & Volume: This section of the exam measures skills of the Certified Logistics Technician and covers the technical computations needed to correctly size packages and calculate accurate weight and cubic volume for shipping costs and load planning.
Topic 13	<ul style="list-style-type: none"> • Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q113-Q118):

NEW QUESTION # 113

Which of the following governing bodies is responsible for collecting taxes on imported and exported goods?

- **A. U.S. Customs and Border Protection**
- B. Food and Drug Administration
- C. U.S. State Department
- D. World Trade Organization

Answer: A

Explanation:

The U.S. Customs and Border Protection (CBP) collects tariffs, duties, and taxes on imported goods entering the United States. As CLT 4.0 explains, CBP is part of the Department of Homeland Security and manages both trade enforcement and revenue collection functions. Duties and tariffs are assessed based on the Harmonized Tariff Schedule (HTS), which classifies goods according to their type, value, and country of origin. The WTO and State Department guide policy, but only CBP enforces and collects. Understanding CBP's role helps logistics personnel ensure accurate customs declarations and prevent costly penalties for underpayment or misclassification. Tariff collection supports fair trade and protects domestic industries from unfair competition while funding essential government programs.

NEW QUESTION # 114

The basic elements of HAZMAT training required by OSHA for new HAZMAT employees include the following EXCEPT

- A. safety
- B. function specific
- C. general awareness training
- D. Globally Harmonized System

Answer: D

Explanation:

The CLT curriculum aligns with OSHA's HAZWOPER / Hazard Communication training: new hazmat employees require general awareness, safety training, and function-specific training (the tasks they'll perform). GHS (Globally Harmonized System) is a chemical classification/labeling standard incorporated into SDS and labeling, but it is not typically listed as a training "element" separate from those core categories in OSHA's training rubric. Thus GHS is integrated but not a separate training element per se.

Reference:

NEW QUESTION # 115

Which inventory control method groups inventory into priority categories based on the demand for the inventory or the value of that inventory?

- A. FIFO inventory control
- B. Just-In-Time inventory control
- C. ABC inventory control
- D. LIFO inventory control

Answer: C

Explanation:

ABC inventory control classifies items (typically A, B, C) by their usage value or demand criticality so that resources focus on the few items that account for most of the value or movement. "A" items are tightly controlled and reviewed frequently; "B" get moderate attention; "C" are managed with simpler controls. This stratification supports targeted cycle counting, purchasing policies, and storage strategies to optimize accuracy and cost. FIFO/LIFO are stock rotation/costing approaches, and JIT is a replenishment philosophy- not a prioritization scheme.

Reference:

NEW QUESTION # 116

Which of the following equipment, also called a straddle carrier, straddles containers in order to quickly move them between road and rail vehicles?

- A. RORO Vessel
- B. Reach Stacker
- C. Gantry Crane
- D. Transtainers

Answer: D

Explanation:

A transtainer, also referred to as a straddle carrier or rubber-tired gantry (RTG) crane, operates above containers, lifting and moving them between transport modes-typically between trucks, trains, and storage stacks. CLT 4.0 explains that transtainers improve

intermodal transfer efficiency in port and rail terminals. They can lift fully loaded containers and move them within stacking yards without the need for fixed infrastructure. This flexibility enhances throughput, especially where space is limited. While gantry cranes perform similar functions, transtainers are mobile and can straddle multiple container rows. Their versatility supports leaner port operations and reduces idle time between transfers.

NEW QUESTION # 117

During the receiving process, after the materials are staged, all of the following are completed by the material handler EXCEPT

- A. perform housekeeping in the staging area
- B. check the materials against the order and Bill of Lading
- C. check quantities
- D. inspect material for damage

Answer: A

Explanation:

The CLT "Product Receiving" activities outline that after materials are staged, handlers verify shipment accuracy, quantity, and condition against the purchase order and Bill of Lading. Inspection ensures quality control and discrepancy identification. While housekeeping is important for safety, it is not a functional step in the receiving verification process. The purpose of staging is to separate materials by order or destination, allowing organized inspection and documentation. CLT emphasizes accuracy and documentation at this stage, as errors during receiving propagate through the inventory system. Housekeeping tasks occur after receiving completion to maintain workplace order but are not part of the inspection checklist.

NEW QUESTION # 118

.....

Facing the incoming MSSC CLT Exam, you may feel stained and anxious, suspicious whether you could pass the exam smoothly and successfully. Actually, you must not impoverish your ambition. Our suggestions are never bogged at difficulties. It is your right time to make your mark. Preparation of exam without effective materials is just like a soldier without gun.
