## Updated IAPP - Test CIPM Valid

Our CIPM exam questions boost 3 versions: PDF version, PC version, APP online version. You can choose the most suitable version of the CIPM study guide to learn. Each version of CIPM training prep boosts different characteristics and different using methods. For example, the APP online version of CIPM Guide Torrent is used and designed based on the web browser and you can use it on any equipment with the browser. It boosts the functions of exam simulation, time-limited exam and correcting the mistakes.

The CIPM Certification Exam is designed for professionals who are responsible for managing and overseeing privacy policies and practices within an organization. CIPM exam covers a variety of topics, including privacy program governance, privacy operational lifecycle, privacy regulations and standards, and privacy risk management.

## IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q96-Q101):

### NEW QUESTION # 96

As a Data Protection Officer, one of your roles entails monitoring changes in laws and regulations and updating policies accordingly. How would you most effectively execute this responsibility?

- A. Consult an external lawyer.
- **B. Subscribe to email list-serves that report on regulatory changes.**
- C. Regularly engage regulators.
- D. Attend workshops and interact with other professionals.

**Answer: B**

Explanation:

As a Data Protection Officer (DPO), one of the most effective ways to execute your responsibility of monitoring changes in laws and regulations and updating policies accordingly is to subscribe to email list-serves that report on regulatory changes. Email list-serves are online mailing lists that allow subscribers to receive regular updates on topics or issues of interest via email<sup>7</sup> By subscribing to email list-serves that report on regulatory changes, you can stay informed of the latest developments and trends in the regulatory environment that affect your organization and its data protection practices. You can also access relevant information and resources from reliable sources, such as regulatory agencies, law firms, industry associations, or experts<sup>8</sup> This can help you to identify and analyze the impact of regulatory changes on your organization and its data processing activities, and to update your policies and procedures accordingly to ensure compliance<sup>8</sup> Some examples of email list-serves that report on regulatory changes are:

The ICO Newsletter: This is a monthly newsletter from the UK Information Commissioner's Office (ICO) that provides updates on data protection news, guidance, events, consultations, and enforcement actions<sup>9</sup> The Privacy Advisor: This is a monthly newsletter from the International Association of Privacy Professionals (IAPP) that covers global privacy news, analysis, and insights<sup>10</sup> The Privacy & Data Security Law Journal: This is a monthly journal from LexisNexis that provides articles and case notes on privacy and data security law issues from around the world<sup>11</sup> The Data Protection Report: This is a blog from Norton Rose Fulbright that provides updates and commentary on data protection and cybersecurity developments across various jurisdictions<sup>12</sup>

7: What is a listserv?; 8: 5 Practical Ways to Keep Up with Regulatory Changes; 9: ICO Newsletter; 10: The Privacy Advisor; 11: Privacy & Data Security Law Journal; 12: Data Protection Report

### NEW QUESTION # 97

SCENARIO

Please use the following to answer the next QUESTION:

Ben works in the IT department of IgNight, Inc., a company that designs lighting solutions for its clients.

Although IgNight's customer base consists primarily of offices in the US, some individuals have been so impressed by the unique aesthetic and energy-saving design of the light fixtures that they have requested IgNight's installations in their homes across the globe. One Sunday morning, while using his work laptop to purchase tickets for an upcoming music festival, Ben happens to notice some unusual user activity on company files. From a cursory review, all the data still appears to be where it is meant to be but he can't shake off the feeling that something is not right. He knows that it is a possibility that this could be a colleague performing unscheduled maintenance, but he recalls an email from his company's security team reminding employees to be on alert for attacks from a known group of malicious actors specifically targeting the industry.

Ben is a diligent employee and wants to make sure that he protects the company but he does not want to bother his hard-working colleagues on the weekend. He is going to discuss the matter with this manager first thing in the morning but wants to be prepared so he can demonstrate his knowledge in this area and plead his case for a promotion.

If this were a data breach, how is it likely to be categorized?

- A. Integrity Breach.
- **B. Confidentiality Breach.**
- C. Availability Breach.
- D. Authenticity Breach.

**Answer: B**

Explanation:

## Explanation

If this were a data breach, it is likely to be categorized as a confidentiality breach. A confidentiality breach is a type of data breach that involves unauthorized or accidental disclosure of or access to personal data. A confidentiality breach violates the principle of confidentiality, which requires that personal data is protected from unauthorized or unlawful use or disclosure. A confidentiality breach can occur when personal data is exposed to unauthorized parties, such as hackers, competitors, or third parties without consent. A confidentiality breach can also occur when personal data is sent to incorrect recipients, such as by email or mail.

The other options are not likely to be the correct category for this data breach. An availability breach is a type of data breach that involves accidental or unauthorized loss of access to or destruction of personal data. An availability breach violates the principle of availability, which requires that personal data is accessible and usable by authorized parties when needed. An availability breach can occur when personal data is deleted, corrupted, encrypted, or otherwise rendered inaccessible by malicious actors or technical errors. An authenticity breach is a type of data breach that involves unauthorized or accidental alteration of personal data.

An authenticity breach violates the principle of authenticity, which requires that personal data is accurate and up to date. An authenticity breach can occur when personal data is modified, tampered with, or falsified by malicious actors or human errors. An integrity breach is a type of data breach that involves unauthorized or accidental alteration of personal data that affects its quality or reliability. An integrity breach violates the principle of integrity, which requires that personal data is complete and consistent with its intended purpose.

An integrity breach can occur when personal data is incomplete, inconsistent, outdated, or inaccurate due to malicious actors or human errors. References: Personal Data Breaches: A Guide; Guidance on the Categorisation and Notification of Personal Data Breaches

## NEW QUESTION # 98

### SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover. He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job.

Based on Albert's observations, executive leadership should most likely pay closer attention to what?

- A. Potential in-house threats
- B. Obsolete data processing systems
- C. Outdated security frameworks
- D. Awareness campaigns with confusing information

**Answer: C**

## NEW QUESTION # 99

### SCENARIO

Please use the following to answer the next QUESTION:

For 15 years, Albert has worked at Treasure Box - a mail order company in the United States (U.S.) that used to sell decorative candles around the world, but has recently decided to limit its shipments to customers in the 48 contiguous states. Despite his years of experience, Albert is often overlooked for managerial positions. His frustration about not being promoted, coupled with his recent interest in issues of privacy protection, have motivated Albert to be an agent of positive change.

He will soon interview for a newly advertised position, and during the interview, Albert plans on making executives aware of lapses in the company's privacy program. He feels certain he will be rewarded with a promotion for preventing negative consequences resulting from the company's outdated policies and procedures.

For example, Albert has learned about the AICPA (American Institute of Certified Public Accountants)/CICA (Canadian Institute of Chartered Accountants) Privacy Maturity Model (PMM). Albert thinks the model is a useful way to measure Treasure Box's ability to protect personal data. Albert has noticed that Treasure Box fails to meet the requirements of the highest level of maturity of this model; at his interview, Albert will pledge to assist the company with meeting this level in order to provide customers with the most rigorous security available.

Albert does want to show a positive outlook during his interview. He intends to praise the company's commitment to the security of customer and employee personal data against external threats. However, Albert worries about the high turnover rate within the company, particularly in the area of direct phone marketing. He sees many unfamiliar faces every day who are hired to do the marketing, and he often hears complaints in the lunch room regarding long hours and low pay, as well as what seems to be flagrant disregard for company procedures.

In addition, Treasure Box has had two recent security incidents. The company has responded to the incidents with internal audits and updates to security safeguards. However, profits still seem to be affected and anecdotal evidence indicates that many people still harbor mistrust. Albert wants to help the company recover.

He knows there is at least one incident the public is unaware of, although Albert does not know the details. He believes the company's insistence on keeping the incident a secret could be a further detriment to its reputation. One further way that Albert wants to help Treasure Box regain its stature is by creating a toll-free number for customers, as well as a more efficient procedure for responding to customer concerns by postal mail.

In addition to his suggestions for improvement, Albert believes that his knowledge of the company's recent business maneuvers will also impress the interviewers. For example, Albert is aware of the company's intention to acquire a medical supply company in the coming weeks.

With his forward thinking, Albert hopes to convince the managers who will be interviewing him that he is right for the job. Based on Albert's observations, executive leadership should most likely pay closer attention to what?

- A. Potential in-house threats
- B. Awareness campaigns with confusing information
- C. Outdated security frameworks
- D. Obsolete data processing systems

**Answer: D**

Explanation:

Explanation

This answer is the best suggestion that Albert should make based on his observations regarding recent security incidents, as it can help to ensure that Treasure Box's privacy program and practices are assessed and verified by an independent and objective party who has the necessary expertise, experience and credentials to evaluate the company's compliance with the applicable laws, regulations, standards and best practices for data protection. Using a third-party auditor can also help to identify any gaps, weaknesses or risks that may have been overlooked or missed by the prior internal audits, and to recommend or implement any improvements or corrective actions. A third-party audit can also help to enhance the company's reputation and trust among its customers, partners and stakeholders, as well as demonstrate its commitment and accountability for privacy protection.

## NEW QUESTION # 100

All of the following should be mandatory in the contract for the outsourced vendor EXCEPT?

- A. Generation of reports and metrics.
- B. Liability for data breach.
- C. Cyber insurance.
- D. Information security controls.

**Answer: C**
