Exam 1Z0-1055-25 Details, Study 1Z0-1055-25 Material

BraindumpQuiz is the leading position in this field and famous for high pass rate of the 1Z0-1055-25 learning guide. If you are headache about your qualification exams, our 1Z0-1055-25 learning guide materials will be a great savior for you. Now it is your opportunity that we provide the best valid and professional 1Z0-1055-25 Study Guide materials which have 100% pass rate. If you really want to clear exam and gain success one time, choosing us will be the wise thing for you. If you hesitate about us please pay attention on below about our satisfying service and high-quality 1Z0-1055-25 guide torrent.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q17-Q22):

NEW QUESTION # 17

SIMULATION

MANAGE EXPENSE REPORT TEMPLATE

Task 2:

Create Expense Items, where:

- a. The effective start date is the current date.
- b. There is no tax implication.
- c. Projects are not used.
- d. Receipt and expense fields are the same as the expense report template.
- e. The dinner expense item is associated with the Meal policy created in the previous challenge.

Answer:

Explanation:

See the Explanation for Step by Step Solution

Explanation:

TASK 2: CREATE EXPENSE ITEMS

We need to create expense items with the following requirements:

- ✓ Effective Start Date: Set to current date.
- ✓ No tax implications.
- ✓ Projects are not used.
- ✓ Receipt and expense fields should match those from the expense report template created earlier.
- ✓ Dinner expense item must be linked to the Meal policy created in the previous task.

Step-by-Step Solution: Configuring Expense Items in Oracle Financials Cloud Step 1: Navigate to the Expense Items Setup Log in to Oracle Financials Cloud as an Expense Manager or Financial Administrator.

Navigate to Setup and Maintenance.

In the Search Bar, type "Manage Expense Items".

Click on Manage Expense Items.

Step 2: Create Expense Items

Click Create New Expense Item.

Enter the following details:

Expense Item: Internet

Name: "Internet"

Expense Category: "Meals and Entertainment"

Effective Start Date: Current Date

Tax Classification Code: None (No tax implications)

Projects Used? No (Uncheck "Enable for Projects")

Receipt Required? Follow Template Policy

Expense Fields? Set as Optional

✓ Click Save and Close.

Expense Item: Room Rate

Click Create New Expense Item again.

Enter the following details:

Name: "Room Rate"

Expense Category: "Lodging"

Effective Start Date: Current Date

Tax Classification Code: None

Projects Used? No

Receipt Required? Follow Template Policy

Expense Fields? Set as Optional

✓ Click Save and Close.

Expense Item: Dinner (Linked to Meal Policy)

Click Create New Expense Item again.

Enter the following details:

Name: "Dinner"

Expense Category: "Meals and Entertainment"

Effective Start Date: Current Date

Tax Classification Code: None

Projects Used? No

Receipt Required? Follow Template Policy

Expense Fields? Set as Optional

Link to the Meal Policy Created Earlier:

Navigate to Expense Policies.

Select the previously created Meal Policy.

Ensure that Dinner Expense Item is associated with this policy.

Set Limit Type: Warning Only (if applicable).

✓ Click Save and Close.

Step 3: Validate and Confirm the Expense Items

Review the created expense items.

Ensure that:

No tax classification codes are applied.

Projects are disabled.

Receipt and expense fields match those in the Expense Report Template.

Dinner Expense Item is correctly linked to the Meal Policy.

✓ Click Submit and Activate.

Step 4: Test the Expense Items

Simulate an Expense Report Submission:

Select Internet, Room Rate, and Dinner as expense types.

Enter sample amounts.

Ensure that:

No tax implications appear.

Projects field is disabled.

Receipt rules match the Expense Report Template.

A warning is displayed if the Dinner Expense exceeds the Meal Policy limit.

Expected Outcome:

✓ Expense items are successfully created.

✓ No tax implications are applied.

✓ Projects are not enabled.

✓ Receipts and expense fields match the template.

✓ Dinner expense item is linked to the Meal Policy and displays a warning if the limit is exceeded.

Conclusion

By following these steps, we have successfully created expense items that comply with all business requirements.

NEW QUESTION # 18

An installment for \$2,000 USD is due for payment on July 31, 2022. The installment has two discounts: the first discount date is June 15, 2022 for \$150 USD and the second discount date is June 30, 2022 for \$50 USD.

You submit a Payment Process Request with the following criteria:

Payment Date = June 20, 2022

Pay Through Date = July 30, 2022

Date Basis = Due Date

What will be the resulting status of the installment and discount?

- A. The installment is selected and a discount of \$50 USD is applied.
- B. The installment is not selected because the discount dates are before the Pay Through Date.
- C. The installment is not selected because the due date is after the Pay Through Date.
- D. The installment is selected and a discount of \$150 USD is applied.
- E. The installment is selected and no discount is applied.

Answer: C

NEW QUESTION # 19

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Primary Ledger
- B. Balancing Segment Value
- C. Business Unit
- D. Accounting Period
- E. Natural Account
- F. Supplier

Answer: B,C,D

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process.

Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.

NEW QUESTION # 20

In the implementation project you are leading, the customer has a requirement to add new transactional attributes to the Expense Approver Report workflow notification. Which two Business Intelligence catalog objects should you copy (or customize) and edit?

- A. The Output types
- B. The Original Source
- C. The Data Model
- D. The layout template

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth

To incorporate new transactional attributes into the Expense Approver Report workflow notification in Oracle Financials Cloud, you need to customize specific Business Intelligence Publisher (BI Publisher) catalog objects. The two primary objects that require customization are:

The Data Model (Option B):

Purpose: The Data Model defines the data structure and sources for the report. It determines which attributes from the application's data sources are available for inclusion in the report.

Customization Process:

Navigate to the BI Catalog: Shared Folders > Financials > Workflow Notifications > Expenses.

Locate the Expense Approval Data Model.

Use the Customize option to create a copy of the data model in the Custom folder.

Edit the copied data model to include the new transactional attributes required for the notification.

Reference:

The Layout Template (Option A):

Purpose: The Layout Template defines the visual presentation of the notification, including which data fields are displayed and their formatting.

Customization Process:

In the same BI Catalog location, find the Expense Report Approval report.

Use the Customize option to create a copy of the report layout template in the Custom folder.

Download the copied layout template (an .rtf file) and open it using Microsoft Word with the BI Publisher Template Builder add-in.

Insert the new transactional attributes into the template as needed.

Upload the modified template back to the BI Catalog and set it as the default layout.

By customizing both the Data Model and the Layout Template, you ensure that the new transactional attributes are not only retrieved from the data source but also properly displayed in the workflow notification.

Note: Options C (The Original Source) and D (The Output types) are not directly involved in the process of adding new attributes to the workflow notification and therefore are not relevant to this requirement.

NEW QUESTION # 21

An installment meets all the selection criteria of a Payment Process Request, but it still does not get selected for payment processing. What are the two reasons for this?

- A. The pay-through date is in a future period.
- B. The invoice has not been accounted.
- C. The pay-through date is in a closed Payables period.
- **D. The invoice needs re-validation.**
- **E. The invoice requires approval.**

Answer: D,E

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, even when an installment meets the selection criteria of a Payment Process Request (PPR), certain conditions can prevent it from being selected for payment processing. Understanding these conditions is crucial for troubleshooting and ensuring a smooth payment workflow.

Analysis of Each Option:

A . The pay-through date is in a future period.

The pay-through date in a PPR determines the latest due date of invoices to be included for payment. Setting this date in the future is a common practice to include all invoices due up to that date. Therefore, having a pay-through date in a future period would not prevent installments from being selected; instead, it broadens the selection criteria. This is not a reason for an installment not being selected.

B . The pay-through date is in a closed Payables period.

The pay-through date affects which invoices are selected based on their due dates, but it does not directly relate to the status of accounting periods. While processing payments in a closed period is not allowed, the pay-through date itself being in a closed period does not prevent installment selection. Therefore, this is not a valid reason for an installment not being selected.

C . The invoice needs re-validation.

Invoices that have undergone changes affecting their payment attributes may require re-validation. If an invoice is in a status indicating it needs re-validation, it will not be selected for payment processing until the validation process is successfully completed.

This ensures that all invoice data is accurate and meets the necessary criteria for payment. According to Oracle documentation, an installment might not get selected if "The invoice must be revalidated." docs.oracle.com D . The invoice requires approval.

Invoices often need to go through an approval workflow to ensure their legitimacy and accuracy. If an invoice has not received the necessary approvals, it remains in a pending status and is excluded from payment processing. Ensuring that all invoices are approved is essential for them to be selected in a PPR. The Oracle documentation states that an installment might not get selected if "The invoice requires approval." docs.oracle.com E . The invoice has not been accounted.

While accounting is a critical aspect of financial management, the accounting status of an invoice does not typically prevent it from being selected for payment. Invoices can be selected and paid even if they have not yet been accounted, with accounting entries being created subsequently. Therefore, the lack of accounting is not a reason for an installment not being selected in a PPR.

Conclusion:

The two primary reasons an installment, despite meeting selection criteria, might not be selected for payment processing are:

C . The invoice needs re-validation.

D . The invoice requires approval.

Ensuring that all invoices are validated and approved is essential for their inclusion in payment processing.
