## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q15-Q20):

### NEW QUESTION # 15

Why is it helpful to create a BPMN subset?

- A. To help users check whether diagrams adhere to certain BPMN rules
- B. To enable changes to the default appearance of the notation
- C. To focus on frequently used elements
- D. To add additional information based on company requirements

**Answer: C**

Explanation:

Creating a BPMN subset is beneficial for focusing on frequently used elements within the Business Process Model and Notation (BPMN) framework. This approach helps organizations streamline process modeling by concentrating on the BPMN elements that are most relevant and commonly used in their specific context. By doing so, it simplifies the modeling language for users, making it more accessible and reducing complexity in process design. This tailored subset can improve efficiency in process documentation and communication among stakeholders by eliminating rarely used or unnecessary elements that could otherwise complicate understanding and implementation.

References: BPMN specification and SAP Signavio best practices documentation.

### NEW QUESTION # 16

Which Widgets can visualize process flows by backtracking the performed events? Note: There are 3 correct answers to this question.

- A. Breakdown
