GIAC Strategic Planning, Policy, and Leadership (GSTRT) Sample Questions (Q29-Q34):

NEW QUESTION # 29

Your organization has been tasked with developing a comprehensive security program to protect customer data as it expands into new markets. However, the executive team is concerned about the cost of implementing new security measures. How would you approach developing the security program while addressing these concerns?

Response:

- A. Implement only basic security measures to reduce costs

- B. Develop a business case that highlights the potential risks of not securing customer data, present a phased approach to implementation, and demonstrate the long-term value of the program
- C. Postpone the security program until the company grows further
- D. Eliminate the security program to avoid costs entirely

Answer: B

NEW QUESTION # 30

Your organization has been monitoring an increasing number of phishing attacks targeting senior leadership. You've identified several incidents where executives nearly fell victim to these scams. What steps should you take to mitigate this specific threat?

Response:

- A. Ignore the threat since no successful attacks have occurred yet
- B. Disable all email accounts to prevent phishing attacks
- C. Assume that executives will eventually fall victim and focus on remediation
- D. Implement targeted phishing awareness training for executives, deploy email filtering and anti-phishing technologies, and establish multi-factor authentication for sensitive accounts

Answer: D

NEW QUESTION # 31

What is the primary purpose of including a policy exception process in a cybersecurity policy?

Response:

- A. To avoid having to enforce the policy
- B. To provide a structured process for requesting deviations from the policy under specific circumstances
- C. To allow employees to bypass the policy
- D. To minimize policy updates

Answer: B

NEW QUESTION # 32

Which of the following is a common characteristic of insider threats?

Response:

- A. They are always easy to detect
- B. They only affect financial systems
- C. They often involve individuals with legitimate access to critical systems and data
- D. They can only occur in large organizations

Answer: C

NEW QUESTION # 33

Your organization operates in the financial sector and has been receiving intelligence reports about a growing number of ransomware attacks targeting similar institutions. How should you adjust your cybersecurity strategy to mitigate the risk of a ransomware attack?

Response:

- A. Strengthen your incident response plan, implement regular backups of critical data, perform network segmentation, and provide employee training on phishing prevention
- B. Shut down all network connections to prevent an attack
- C. Ignore the reports since your organization hasn't been targeted yet
- D. Wait for an attack to occur before taking any action

Answer: A
