

Free PDF PCNSA - Palo Alto Networks Certified Network Security Administrator Perfect Reliable Practice Materials

The advertisement is a vertical banner. At the top left is the Palo Alto Networks logo and 'PCNSA'. At the top right is the 'CBTnuets' logo. The central part of the banner shows a man in a dark suit with his arms crossed, standing in front of server racks. Overlaid on this is the text 'PCNSA Certification' in large white letters, with '17+ Hours' in red below it. Below that, in smaller white text, is 'Palo Alto Networks Certified Network Security Administrator (PCNSA)'. At the bottom of the banner, the text 'Palo Alto (PCNSA)' is written in large red letters. Below the banner, there is a blue bar with the word 'VideoCourse' in white, followed by a video camera icon. To the right of this is a black button with the word 'DOWNLOAD' in white and a white download arrow icon.

In order to meet the requirements of our customers, Our PCNSA test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our PCNSA exam question provide the automatic correcting system to help customers understand and correct the errors. If you are finding a study material in order to get away from your exam, you can spend little time to know about our PCNSA Test Torrent, it must suit for you.

Palo Alto Networks Certified Network Security Administrator Sample Questions (Q267-Q272):

NEW QUESTION # 267

An administrator is reviewing the Security policy rules shown in the screenshot below.

Which statement is correct about the information displayed?

- A. Eleven rules use the "Infrastructure*" tag.
- B. There are seven Security policy rules on this firewall.
- C. Highlight Unused Rules is checked.
- **D. The view Rulebase as Groups is checked.**

Answer: D

NEW QUESTION # 268

Match the cyber-attack lifecycle stage to its correct description.

Answer:

Explanation:

NEW QUESTION # 269

An administrator wants to reference the same address object in Security policies on 100 Panorama managed firewalls, across 10 device groups and five templates.

Which configuration action should the administrator take when creating the address object?

- A. Ensure that the Shared option is cleared.
- B. Ensure that Disable Override is cleared.
- C. Tag the address object with the Global tag.
- **D. Ensure that the Shared option is checked.**

Answer: D

Explanation:

To reference the same address object in Security policies on 100 Panorama-managed firewalls, across 10 device groups and five templates, the administrator should ensure that the Shared option is checked when creating the address object. This option allows the administrator to create a shared address object that is available to all device groups and templates on Panorama. The shared address object can then be used in multiple firewall policy rules, filters, and other functions¹. This reduces the complexity and duplication of managing address objects across multiple firewalls².
