MM : 80 Mock Test-08A(G1) - Maths-Standard(CBSE) - Foundation Class-X(2023-24) Time : 180 Min.

Topics Covered:
Mathematics: Complete Syllabus (As Prescribed by CBSE for the Session 2023-24)

General Instructions :
(i) This question paper contains 38 questions. All questions are compulsory.
(ii) Question paper is divided into FIVE Sections - Section A, B, C, D and E.
(iii) In Section A - question number 1 to 18 are Multiple Choice Questions (MCQs) and question number 19 and 20 are Assertion-Reason based Questions of 1 mark each.
(iv) In Section B - question number 21 to 25 are Very Short Answer (VSA) type questions of 2 marks each.
(v) In Section C - question number 26 to 31 are Short Answer (SA) type questions carrying 3 marks each.
(vi) In Section D - question number 32 to 35 are Long Answer (LA) type questions carrying 5 marks each.
(vii) In Section E - question number 36 to 38 are Source based/Case based/Units of Assessment Questions carrying 4 marks each. Internal choice is provided in 2 marks question in each case study.
(viii) There is no overall choice. However, an internal choice has been provided in 2 questions in Section B, 2 questions in Section C, 2 questions in Section D and 3 questions in Section E.

MATHEMATICS

SECTION-A : Multiple Choice Type Questions (20×1 = 20 Marks)

Q1. If HCF of two numbers 36 and 54 is 18, then their LCM will be [1]
(1) 36 (2) 324
(3) 9 (4) 108

Q2. Expression for $\tan \theta$ in terms of $\cosec \theta$ is equal to [1]
(1) $\frac{\cosec \theta}{\sqrt{1-\cosec^2 \theta}}$ (2) $\frac{1}{\sqrt{\cosec^2 \theta - 1}}$
(3) $\sqrt{1 + \cosec^2 \theta}$ (4) $\frac{\sqrt{1 - \cosec^2 \theta}}{\cosec \theta}$

Q3. The system of linear equations $2x - 3y = 5$ and $2x + 9y = 7$ represents [1]
(1) Intersecting lines (2) Parallel lines
(3) Coincident lines (4) None of these

Q4. The area of a sector of a circle of radius 14 cm is 154 cm^2 , then the measure of its central angle is [1]
(1) 30° (2) 90°
(3) 45° (4) 60°

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q43-Q48):

NEW QUESTION # 43

In SAP Central Business Configuration, which activities can you perform during Product-Specific Configuration? Note: There are 3 correct answers to this question.

- A. Add blocking reasons for billing.
- B. Add new sales organizations.
- C. Modify building blocks.
- D. Create new scope items.
- E. Change approval thresholds.

Answer: A,B,E

NEW QUESTION # 44

Which of the following actions does the lead configuration expert carry out during the content deployment phase in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- A. Confirm primary finance settings
- B. Confirm primary HCM settings
- C. Confirm primary logistics settings
- D. Create two projects
- E. Define the scope

Answer: C,D,E

Explanation:

For implementing SAP S/4HANA Cloud Public Edition for a customer, the following systems are commonly used:

* Sandbox system: This system is used in the very early stages of the project for exploration and trying out different configurations without affecting the development or production environments. It's a safe space for experimentation.

* Development system: This system is where the initial setup and customizations are made. Configuration changes, custom development, and extensions are carried out here before being moved to the test system for further testing.

* Test system: After configurations and developments are done in the development system, they are transported to the test system. This environment is used for rigorous testing to ensure that everything works as expected and to identify any issues before moving to the production environment.

These systems play crucial roles in the implementation process, allowing for a structured and phased approach to setting up, customizing, testing, and finally deploying SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 45

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. Added partner content
- B. The selected scope
- C. System consistency checks
- D. The selected deployment target

Answer: B,D

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 46

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. A Defect document created through an industry application
- B. A Production Order created through a non-SAP front-end
- C. An unattended bot in SAP Build Process Automation
- D. A Time Sheet Record from a 3rd party application

Answer: B,D

NEW QUESTION # 47

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Software as a Service
- B. Infrastructure as a Service
- C. Platform as a Service
- D. On premise
- E. Private Cloud

Answer: C,D,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 48
