#### NEW QUESTION # 137

A user is unable to relate a task to the Course custom object. What should a Platform Administrator do to allow tasks to be related to courses?

- A. Add the Open Activities related list to the Course page layout.
- **B. Select Allow Activities on the Course object in Object Manager.**
- C. Update the user's profile to grant them Edit access to the Task object.
- D. Create a sharing rule for the Course object to grant the user Read/Write access.

**Answer: B**

Explanation:

For a custom object to support Tasks and Events, the "Allow Activities" setting must be enabled in the object's properties. When a Platform Administrator creates a custom object, this checkbox is often left unchecked by default<sup>35</sup>. Enabling this feature allows the "Related To" (WhatId) field on a Task or Event to be linked to records of that custom object type<sup>36</sup>. While adding the related list to the page layout (Option C) is a necessary step for visibility, it will not work if the underlying feature isn't enabled first<sup>37</sup>. Sharing

rules (Option A) and profile permissions (Option D) manage access to existing records but do not control whether the object is technically capable of having activities associated with it.
