## Free 156-315.81 Exam, Valid 156-315.81 Test Review

Doubtlessly, clearing the 156-315.81 certification exam is a challenging task. You can make this task considerably easier by studying with actual Check Point Certified Security Expert R81 (156-315.81) Questions of PremiumVCEDump. We provide you with a triple-formatted 156-315.81 Practice Test material, made under the supervision of experts. This product has everything you need to clear the challenging 156-315.81 exam in one go.

## CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q297-Q302):

### NEW QUESTION # 297

What is the benefit of "fw monitor" over "tcpdump"?

- A. "fw monitor" is also available for 64-Bit operating systems.
- B. "fw monitor" reveals Layer 2 information, while "tcpdump" acts at Layer 3.
- C. With "fw monitor", you can see the inspection points, which cannot be seen in "tcpdump"
- D. "fw monitor" can be used from the CLI of the Management Server to collect information from multiple gateways.

**Answer: C**

Explanation:

Explanation

The benefit of fw monitor over tcpdump is that with fw monitor, you can see the inspection points, which cannot be seen in tcpdump. Inspection points are the locations in the firewall kernel where packets are inspected by the security policy and other software blades. Fw monitor allows you to capture packets at different inspection points and see how they are processed by the firewall. Tcpdump, on the other hand, is a generic packet capture tool that only shows the packets as they enter or leave the network interface.

### NEW QUESTION # 301

For Management High Availability, which of the following is NOT a valid synchronization status?

- A. Down
- B. Lagging
- C. Collision
- D. Never been synchronized

**Answer: A**

Explanation:

For Management High Availability, the valid synchronization status options are:

- A). Collision  
B). Down  
C). Lagging  
D). Never been synchronized

In this context, "Down" indicates that the synchronization is not functioning correctly or that the standby management server is not reachable. This is a valid synchronization status, so the answer is not B.
