- A. Automatically patching vulnerable systems
- B. Summarizing the content of alerts
- C. **Identifying and classifying alerts**
- D. Applying filters on specific alerts

Answer: C

NEW QUESTION # 78

A security administrator must provide access controls for AI systems to list tables. Which of the following should the administrator implement?

- A. Model access
- B. Network access control list (NACL)
- C. Agentic AI access
- D. Data access

- C. Modality controls
- D. Output token controls
- E. Application programming interface (API) rate controls
- F. Endpoint access controls
