Quiz & Worksheet - ISA 99/IEC 62443 Series Overview

1. The current co-chairmen of ISA99 are ____.

- ☐ Jim Cosman and Eric Gilsinn
- ☐ Jim Gilsinn and Bill Gates
- ☐ Jim Gilsinn and Eric Cosman
- ☐ None of these.

2. Which of the following may NOT happen if the ISA99 standards are compromised?

- ☐ Violation of law
- ☐ Shift in ICS to SCADA
- ☐ Economic loss
- ☐ Threat to nation

3. Which of the following is NOT part of the scope of ISA99?

- ☐ Authorized sellers
- ☐ Security technologies
- ☐ Product development requirements
- ☐ Patch Management

They are using outdated materials resulting in failure and loss of money and time. So to solve all these problems, Itcerttest offers actual ISA-IEC-62443 Questions to help candidates overcome all the obstacles and difficulties they face during ISA-IEC-62443 examination preparation. With vast experience in this field, Itcerttest always comes forward to provide its valued customers with authentic, actual, and genuine ISA-IEC-62443 exam dumps at an affordable cost.

If you are worried about your ISA-IEC-62443 practice test and you have no much time to prepare, now you can completely rest assured it because we will offer you the most updated ISA-IEC-62443 dumps pdf with 100% correct answers. You can save your time and money by enjoying one-year free update after purchasing our ISA-IEC-62443 Dumps PDF. We also provide the free demo for your reference.

Braindumps ISA-IEC-62443 Torrent - New ISA-IEC-62443 Exam Review

In today's competitive technology sector, the ISA ISA-IEC-62443 certification is a vital credential. Many applicants, however, struggle to obtain up-to-date and genuine ISA ISA-IEC-62443 exam questions in order to successfully prepare for the exam. If you find yourself in this circumstance, don't worry since Itcerttest has you covered with their real ISA ISA-IEC-62443 Exam Questions. Let's look at the characteristics of these ISA/IEC 62443 Cybersecurity Fundamentals Specialist test Questions and how they can help you pass the ISA ISA-IEC-62443 certification exam on the first try.

ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q83-Q88):

NEW QUESTION # 83

Which is a reason for
and physical security regulations meeting a mixed resistance?

Available Choices (select all choices that are correct)

- A. Regulations are voluntary documents.
- B. Cybersecurity risks can best be managed individually and in isolation.
- **C. There are a limited number of enforced cybersecurity and physical security regulations.**
- D. Regulations contain only informative elements.

Answer: C

NEW QUESTION # 84

Which of the following ISA-99 (IEC 62443) Reference Model levels is named correctly?

Available Choices (select all choices that are correct)

- A. Level 4: Process
- **B. Level 3: Operations Management**
- C. Level 2: Quality Control
- D. Level 1: Supervisory Control

Answer: B

Explanation:

The ISA-99/IEC 62443 standards for industrial automation and control systems security categorize network and system components into different levels based on their operational context. The correct name from the provided options for one of these levels is Level 3: Operations Management. This level typically encompasses systems that manage production control systems, including batch management, production scheduling, and overall factory operations. The other levels listed, such as Supervisory Control and Process, refer to different aspects of the system but are not named correctly in the options provided. Level 1 is correctly referred to as

"Basic Control," and Level 4 should be "Business Logistics" instead of "Process."

NEW QUESTION # 85

Which of the following is the underlying protocol for Ethernet/IP?

Available Choices (select all choices that are correct)

- **A. Common Industrial Protocol**
- B. Object Linking and Embedding (OLE) for Process Control
- C. Highway Addressable Remote Transducer (HART)
- D. Building Automation and Control Network (BACnet)

Answer: A

Explanation:

Ethernet/IP is an industrial network protocol that adapts the Common Industrial Protocol (CIP) to standard Ethernet. CIP is an object-oriented protocol that provides a unified communication architecture for various industrial automation applications, such as control, safety, security, energy, synchronization and motion, information and network management. CIP defines a set of messages and services for interacting with devices and data on the network, as well as a set of device profiles for consistent implementation of automation functions across different products. Ethernet/IP uses the transport and control protocols of standard Ethernet, such as TCP/IP and IEEE 802.3, to define the features and functions for its lower layers. Ethernet/IP also uses UDP to transport I/O messages and supports various network topologies, such as star, linear, ring and wireless. Ethernet/IP is one of the leading industrial protocols in the United States and is widely used in a range of industries, such as factory, hybrid and process. Ethernet/IP is managed by ODVA, Inc., a global trade and standards development organization. References:

NEW QUESTION # 86

Safety management staff are stakeholders of what security program development?

Available Choices (select all choices that are correct)

- **A. CSMS**

- B. SPRP
- C. CSA
- D. ERM

Answer: A

NEW QUESTION # 87

Which is an important difference between IT systems and IACS?

- **A. IACS cybersecurity must address safety issues.**
- B. The IACS security priority is integrity.
- C. The IT security priority is availability.
- D. Routers are not used in IACS networks.

Answer: A

Explanation:

A key distinguishing factor between IT (Information Technology) and IACS (Industrial Automation and Control Systems) environments is the **requirement for cybersecurity to consider safety in IACS systems.

From ISA/IEC 62443-1-1, Clause 4.3:

"In contrast to traditional IT environments, where the primary concern is confidentiality, the primary concerns in IACS environments are often availability, integrity, and most critically - safety." Any cybersecurity failure in IACS environments can result in physical consequences, such as equipment damage, environmental harm, or loss of human life - making safety a critical consideration.

Incorrect Options:

- A). Integrity is important, but availability and safety are usually higher priorities.
- B). IT prioritizes confidentiality, not availability.
- D). Routers are indeed used in IACS networks, often hardened or industrial-grade.
