- **A. Automatic API proxy generation**
- B. Automatic API specification generation
- C. Automatic API semantic versioning
- D. Automatic API governance

**Answer: A**

Explanation:

Anypoint Platform, MuleSoft's unified platform for API design and integration, offers several productivity advantages for both implementing and managing APIs. Among these features, automatic API proxy generation is particularly beneficial. Here's a step-by-step explanation:

    - \* This automation saves time and reduces the complexity of manual proxy setup, allowing developers to focus on core business logic.
  - \* API Management:
    - \* API Manager: Provides a dashboard to manage API policies, versions, and SLA tiers. Users can apply security policies, monitor traffic, and analyze API usage.
