

2026 Actual ISO-IEC-27001-Foundation Test 100% Pass | Trustable APMG-International Test ISO/IEC 27001 (2022) Foundation Exam Questions Pass for sure

BONUS!!! Download part of PracticeDump ISO-IEC-27001-Foundation dumps for free: <https://drive.google.com/open?id=1BH2Ozzpk7MarJCFCIwZ0-lfewULmHnq>

In the major environment, people are facing more job pressure. So they want to get ISO-IEC-27001-Foundation certification rise above the common herd. How to choose valid and efficient ISO-IEC-27001-Foundation guide torrent should be the key topic most candidates may concern. So now, it is right, you come to us. Our company is famous for its high-quality in this field especially for ISO-IEC-27001-Foundation Certification exams. It has been accepted by thousands of candidates who practice our study materials for their exam.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 2	<ul style="list-style-type: none"> • Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 3	<ul style="list-style-type: none"> • Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 4	<ul style="list-style-type: none"> • Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

100% Pass Quiz APMG-International - ISO-IEC-27001-Foundation – Trustable Actual Test

It is very convenient for all people to use the ISO-IEC-27001-Foundation study materials from our company. Our study materials will help a lot of people to solve many problems if they buy our products. The online version of ISO-IEC-27001-Foundation study materials from our company is not limited to any equipment, which means you can apply our study materials to all electronic equipment, including the telephone, computer and so on. So the online version of the ISO-IEC-27001-Foundation Study Materials from our company will be very useful for you to prepare for your exam. We believe that our ISO-IEC-27001-Foundation study materials will be a good choice for you.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which information is required to be included in the Statement of Applicability?

- A. The risk assessment approach of the organization
- B. The scope and boundaries of the ISMS
- C. The justification for including each information security control
- D. The criteria against which risk will be evaluated

Answer: C

Explanation:

Clause 6.1.3 (d) requires that the organization "produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.

Therefore, the mandatory requirement for the SoA is justification for including (or excluding) each information security control.

NEW QUESTION # 43

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO/IEC 27001?

- A. To evaluate information security performance
- B. To ensure that employees and contractors are competent
- C. To track the use of outsourced processes
- D. To monitor the use of information assets

Answer: A

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

NEW QUESTION # 44

Which item is required to be defined when planning the organization's risk assessment process?

- A. How the effectiveness of the method will be measured
- B. The parts of the ISMS scope which are excluded from the risk assessment
- C. The criteria for acceptable levels of risk
- D. There are NO specific information requirements

Answer: C

Explanation:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false—the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

NEW QUESTION # 45

Identify the missing word in the following sentence.

According to ISO/IEC 27000, the definition of risk [?] is a "process to comprehend the nature of risk and to determine the level of risk."

- A. Evaluation
- B. Analysis
- C. Management
- D. Assessment

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

ISO/IEC 27000 defines:

* Risk analysis: "process to comprehend the nature of risk and to determine the level of risk" (Clause 3.58).

* Risk assessment: the overall process of risk identification, risk analysis, and risk evaluation.

* Risk evaluation: compares results of risk analysis against risk criteria to determine priority.

* Risk management: coordinated activities to direct and control an organization with regard to risk.

Therefore, the missing word in the given definition is "analysis".

This is important for ISMS implementation: organizations must understand the distinctions. Risk analysis is the core technical evaluation stage, while assessment is the broader process including evaluation, and management refers to the overall governance of risks.

Thus, the correct verified answer is B: Analysis.

NEW QUESTION # 46

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- A. A statement of correspondence between other ISO standards and the ISMS
- B. The budget assigned to operate the ISMS and its related allocations
- C. Third party information security awareness materials
- D. Records of management decisions related to continual improvement

Answer: D

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third-party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review.

decisions related to continual improvement, confirming answer: A.

NEW QUESTION # 47

.....

Our professional experts have compiled the ISO-IEC-27001-Foundation exam questions carefully and skillfully to let all of our worthy customers understand so that even an average candidate can learn the simplified information on the syllabus contents and grasp it to ace exam by the first attempt. It is the easiest track that can lead you to your ultimate destination with our ISO-IEC-27001-Foundation Practice Engine. And as our pass rate of the ISO-IEC-27001-Foundation learning guide is high as 98% to 100%, you will pass the exam for sure.
