## M2 Pdf Free & M2 Vce Test Simulator

In this version, you don't need an active internet connection to use the M2 practice test software. This software mimics the style of real test so that users find out pattern of the real test and kill the exam anxiety. TestSimulate offline practice exam is customizable and users can change questions and duration of Commercial Mechanical Inspector (M2) mock tests. All the given practice questions in the desktop software are identical to the Commercial Mechanical Inspector (M2) actual test.

## International Code Council Commercial Mechanical Inspector Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Solid-fuel cooking equipment:

- A. is permitted to be installed under common canopy-type hoods with other cooking equipment.
- B. is permitted to be installed under Type II canopy-type hoods.
- C. is permitted to be installed under Type II noncanopy-type hoods.
- D. shall be vented through a separate hood and exhaust system.

**Answer: D**

Explanation:

Solid-fuel cooking equipment requires a separate hood and exhaust system. It is not permitted to share the same hood/exhaust arrangement in the manner suggested by the other choices. This is a standard commercial kitchen exhaust requirement because of the added fire and residue hazards associated with solid-fuel appliances.

**NEW QUESTION # 48**

A low-pressure steam heating boiler is a boiler furnishing a maximum steam pressure of \_\_\_\_\_ psi.

- A. 0
- **B. 1**
- C. [option text not fully visible in the material you sent]
- D. [option text not fully visible in the material you sent]

**Answer: B**

Explanation:

A low-pressure steam heating boiler is defined as a boiler furnishing steam at pressures not exceeding 15 psi . That matches Option B .

**NEW QUESTION # 49**

Given: single-wall vent, which serves only one appliance, and has a height of 10 feet.

The maximum horizontal length permitted for a 5-inch diameter vent connector serving this vent is \_\_\_\_\_ feet.

- A. 0
- B. 1
- **C. 7.5**
- D. 2

**Answer: C**

Explanation:

For a single-wall vent connector serving one appliance, the maximum horizontal length is determined from the vent connector sizing and length rules. For a 5-inch diameter connector with a 10-foot vent height , the permitted maximum horizontal length is 7.5 feet . Therefore, Option B is correct.

**NEW QUESTION # 50**

An 8-inch Type B venting system with a listed vent cap must terminate a minimum of \_\_\_\_\_ feet above the flat roof through which it passes.

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

For a Type B gas vent with a listed vent cap terminating through a flat roof , the minimum required termination height is 1 foot above the roof . That makes Option A correct. This is consistent with gas vent termination tables used with listed Type B vent systems and the code framework for Type B vent terminations.

**NEW QUESTION # 51**

The exhaust outlet for a clothes dryer is required to be equipped with:

- A. a corrosion-resistant screen of 1/4-inch mesh.
- **B. a backdraft damper.**
- C. an automatically controlled volume damper.
- D. a temperature limit control device that will automatically shut off the system at a temperature of 250°F.

**Answer: B**

Explanation:

The IMC requires clothes dryer exhaust ducts to terminate outside the building and to be equipped with a backdraft damper at the terminal. The code also prohibits screens at dryer terminations because lint can accumulate and obstruct flow. That makes Option A correct and eliminates Option C. The other two choices describe controls not required by the dryer exhaust termination rule.

## NEW QUESTION # 52

.....

The M2 test material is reasonable arrangement each time the user study time, as far as possible let users avoid using our latest M2 exam torrent for a long period of time, it can better let the user attention relatively concentrated time efficient learning. The M2 practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the M2 test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.
