MB-700 Exam Objectives Pdf | Valid MB-700 Exam Simulator

In traditional views, the MB-700 practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real MB-700 exam. However, our MB-700 learning questions are not doing that way. According to data from former exam candidates, the passing rate of our MB-700 learning material has up to 98 to 100 percent. There are adequate content to help you pass the exam with least time and money.

MB-700:Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Certification Path

MB-700:Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Exam is foundation level Certification.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q186-Q191):

NEW QUESTION # 186

A company currently using Dynamics AX 2009 plans to upgrade to Dynamics 365.

You need to recommend a data migration tool to transfer critical data.

Which two data migration tools should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Data Import/Export Framework (DIXF)

- B. Data Management Workspace
- C. Microsoft Dynamics AX 2009 Data migration tool (DMT)
- D. Data upgrade

Answer: A,B

Explanation:

NEW QUESTION # 187

A company is planning a Dynamics 365 deployment.

The company needs to determine whether to implement an on-premises or a cloud deployment based on system performance.

You need to work with a developer to determine the proper tool from the Performance SDK to complete performance testing.

Which tool should you use? To answer, drag the appropriate tools to the correct scenarios. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 188

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has multiple factories and distribution centers in remote areas where they have poor internet connectivity. The company is planning to implement Dynamics 365 Supply Chain Management.

The company's main priorities are uninterrupted factory and distribution center operations, master data management, financial global reporting, and integration with analytics tools.

You need to design the infrastructure.

Solution: Implement the distribution centers and center data repository in the cloud.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Section: Design solution components

NEW QUESTION # 189

You need to recommend solutions for City Power and Light's new system.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
ISV	Solar panel quoting	
Custom	Wire payments	
Standard	Audit requirements	

Answer:

Explanation:

Tools	Requirement	Tool
ISV	Solar panel quoting	Custom
Custom	Wire payments	ISV
Standard	Audit requirements	Standard

Explanation

Graphical user interface, application Description automatically generated

Requirement

Tool

Solar panel quoting

Custom

Wire payments

ISV

Audit requirements

Standard

Topic 3, Margie's Travel

Case Study

Background

Margie's

Travel company (<http://www.margiestravel.com/>) provides travel services to consumers. These services include package offers, special deals, and excursion add-ons such as jet ski and horseback rides in Jamaica.

Margie's

Travel negotiates rates with multiple vendors and secures bundled pricing for consumers, serving as a travel broker. Margie's Travel only sells services and does not have any tangible products or merchandise.

Margie's Travel began in 1994 when Margie, CEO, and president, planned group trips for her friends in the United States (US). As this grew organically, Margie's created a second company based in Jamaica, followed by the acquisition of a third company in the United Kingdom (UK). The company has grown fast challenging the current systems that support the business model. Margie has determined it is time to implement Dynamics

365 Finance.

Applications and environment

The current system has the following structure:

- * In the US, employees use Software A, accounting software, which is a desktop installation package for small businesses and single users.

- * In the UK, employees use Softwares, ERP (enterprise resource planning) software installed on local servers.

The cost of maintaining Software B licensing is high, and Margie's Travel has decided against the software and associated overhead costs.

- * In Jamaica, employees use Software C, a homegrown application based on spreadsheets, local sales representatives use pen and paper in the field.

- * Margie's Travel employees use personal email addresses and chat tools and text each other directly due to the lack of corporate tools.

- * IT department resources are located in the US and are responsible for management of all software support.

- * Margie's Travel company does not have standardized processes across the organization.

- * The manager in each country/region is responsible for system downtime. This has proven to be a challenge due to the multiple time zones across the organization and the centralized IT department.

Vendors and purchasing

As customers purchase packages, Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Customer relations

- * Customers exist in all three current countries/regions where Margie's Travel operates.

- * Margie's Travel offers consumers a loyalty program. Consumers can earn points per dollar spent across all in countries/regions in which Margie's operates. The loyalty program is currently managed by using a spreadsheet.

Application and environment

- * All three countries/regions must use Dynamics 365 Finance.

- * The system must allow for updates to be applied at the same time as they are periodically released.

- * Margie's Travel requires that the new business processes be standardized and follow industry best practices.

- * Margie's Travel requires implementation of Office 365 and Microsoft Teams to streamline operations. The IT department will be responsible for troubleshooting these applications, along with Dynamics 365 Finance.

- * The infrastructure team must ensure that separate environments are created for development and build, prior to moving to test and eventually gold environments.
- * The infrastructure team must move the code for the loyalty program to a test environment.
- * The CTO has directed the infrastructure team to guarantee they are on the most current version available at the time of go-live.
- * The go-live activities must be coordinated across all countries/regions, with data validation planned for each time zone.
- * Once user acceptance testing (UAT) has been completed, the project manager must report the number of tenants for production to Microsoft.
- * A report must show seasonality and weather patterns so that Margie's Travel does not offer excursions during timeframes where severe weather is predicted.
- * Sales representatives in the field will only be licensed for Microsoft 365 and Microsoft Power Platform.

Customer relations

- * Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
- * Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK.

This feature is not planned for the initial system rollout; however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.

- * New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

Vendor negotiations

- * The rebates cannot be claimed because disparate systems today do not allow for consolidation to ensure that thresholds are met to claim rebates.

- * The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process.

User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.

Customer relation

- * Customers must be identified with the same customer ID across all companies and systems, and automatically update cross-references as new records are created.
- * Margie's Travel wants to enable customer self-service in the future for customers based in the US and UK.

This feature is not planned for the initial system rollout; however, the CIO has asked that the roadmap be created for Dynamics 365 Customer Service and Dynamics 365 Commerce applications in the future. In addition, the CIO wants to ensure that the old customer numbers can be matched to a new standardized format.

- * New customers in Jamaica must be reviewed and approved due to frequent customer data discrepancies. The sales representatives in the field will enter information that must be routed to validate against existing data.

NEW QUESTION # 190

You need to design the data import strategy for integration 1.

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a drag-and-drop interface for sequencing actions. On the left, under the heading 'Actions', there is a list of eight items: 'Import the transfer journals.', 'Import the purchase orders.', 'Import the transfer orders.', 'Create the trade agreements.', 'Create the products.', 'Create the price adjustments.', 'Create the item model groups.', and 'Import the sales orders.'. On the right, under the heading 'Steps', there are two circular arrows indicating a sequence. A large 'Microsoft' watermark is visible across the center of the interface.
