Start Exam Preparation with Real and Valid Test4Sure Amazon SCS-C02 Exam Questions

Now you don't need to spend too much time and money preparing for the Amazon SCS-C02 test. Just get the latest SCS-C02 exam dumps from Test4Sure and prepare the SCS-C02 test in a very short time. These Customer Experience (Amazon) SCS-C02 updated dumps will eliminate your risk of failing and enhance your chance of success in the Test4Sure test. Using Amazon SCS-C02 Exam study material you will gain the best Amazon SCS-C02 exam knowledge and you will attempt the final SCS-C02 certification test with confidence.

Amazon AWS Certified Security - Specialty Sample Questions (Q109-Q114):

NEW QUESTION # 109

A systems engineer is troubleshooting the connectivity of a test environment that includes a virtual security appliance deployed inline. In addition to using the virtual security appliance, the development team wants to use security groups and network ACLs to accomplish various security requirements in the environment.

What configuration is necessary to allow the virtual security appliance to route the traffic?

- A. Place the security appliance in the public subnet with the internet gateway.
- B. Disable network ACLs.
- **C. Disable the Network Source/Destination check on the security appliance's elastic network interface.**
- D. Configure the security appliance's elastic network interface for promiscuous mode.

Answer: C

Explanation:

<https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/using-eni.html>

NEW QUESTION # 110

A development team is attempting to encrypt and decode a secure string parameter from the IAM Systems Manager Parameter Store using an IAM Key Management Service (IAM KMS) CMK. However, each attempt results in an error message being sent to the development team.

Which CMK-related problems possibly account for the error? (Select two.)

- A. The CMK is used in the attempt needs to be rotated.
- B. The CMK is used in the attempt does not exist.
- C. The CMK is used in the attempt is using an alias.
- D. The CMK is used in the attempt is not enabled.
- E. The CMK is used in the attempt is using the CMK's key ID instead of the CMK ARN.

Answer: B,D

Explanation:

<https://docs.IAM.amazon.com/kms/latest/developerguide/services-parameter-store.html#parameter-store-cmk-fa>

NEW QUESTION # 111

Company A has an AWS account that is named Account A. Company A recently acquired Company B, which has an AWS account that is named Account B. Company B stores its files in an Amazon S3 bucket. The administrators need to give a user from Account A full access to the S3 bucket in Account B.

After the administrators adjust the IAM permissions for the user in Account A to access the S3 bucket in Account B, the user still cannot access any files in the S3 bucket.

Which solution will resolve this issue?

- A. In Account B, create a user policy to allow the user from Account A to access the S3 bucket in Account B.
- B. In Account B, create an object ACL to allow the user from Account A to access all the objects in the S3 bucket in Account B.
- C. In Account B, create a bucket ACL to allow the user from Account A to access the S3 bucket in Account B.
- D. In Account B, create a bucket policy to allow the user from Account A to access the S3 bucket in Account B.

Answer: D

Explanation:

For cross-account access, go to update S3 bucket policy to allow principal from other account to access it.

NEW QUESTION # 112

A company has a new partnership with a vendor. The vendor will process data from the company's customers. The company will upload data files as objects into an Amazon S3 bucket. The vendor will download the objects to perform data processing. The objects will contain sensitive data.

A security engineer must implement a solution that prevents objects from residing in the S3 bucket for longer than 72 hours.

Which solution will meet these requirements?

- A. Use Amazon Macie to scan the S3 bucket for sensitive data every 72 hours. Configure Macie to delete the objects that contain sensitive data when they are discovered.
- B. Create an Amazon EventBridge scheduled rule that invokes an AWS Lambda function every day. Program the Lambda function to remove any objects that have been in the S3 bucket for 72 hours.
- C. Configure an S3 Lifecycle rule on the S3 bucket to expire objects that have been in the S3 bucket for 72 hours.
- D. Use the S3 Intelligent-Tiering storage class for all objects that are uploaded to the S3 bucket. Use S3 Intelligent-Tiering to expire objects that have been in the S3 bucket for 72 hours.

Answer: C

NEW QUESTION # 113

A company needs to encrypt all of its data stored in Amazon S3. The company wants to use IAM Key Management Service (IAM KMS) to create and manage its encryption keys. The company's security policies require the ability to Import the company's own key material for the keys, set an expiration date on the keys, and delete keys immediately, if needed.

How should a security engineer set up IAM KMS to meet these requirements?

- A. Configure IAM KMS and use a custom key store. Create an IAM managed CMK with no key material. Import the company's key material into the CMK.
- B. **Configure IAM KMS and use a custom key store. Create a customer managed CMK with no key material Import the company's keys and key material into the CMK**
- C. Configure IAM KMS and use the default Key store Create an IAM managed CMK with no key material Import the company's key material into the CMK
- D. Configure IAM KMS and use the default key store Create a customer managed CMK with no key material import the company's key material into the CMK

Answer: B

NEW QUESTION # 114

.....

Due to professional acumen of expert's, our SCS-C02 guide quiz has achieved the highest level in proficiency's perspective. For your particular inclination, we have various versions of our SCS-C02 exam braindumps for you to choose:the PDF, the Software version and the APP online. Now take a look of their features and you can get realized of our SCS-C02 Training Materials better. And as long as you purchase our SCS-C02 study engine, you can enjoy free updates for one year long.
