Pass Guaranteed 2026 Microsoft Latest AZ-120: Practice Planning and Administering Microsoft Azure for SAP Workloads Exams

We can calculate that AZ-120 certification exam is the best way by which you can learn new applications, and tools and mark your name in the list of best employees in your company. You don't have to be dependent on anyone to support you in your professional life, but you have to prepare for BraindumpsPass real Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam questions.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q284-Q289):

NEW QUESTION # 284
Your on-premises network contains SAP and non-SAP applications.
You have JAVA-based SAP systems that use SPNEGO for single-sign on (SSO) authentication.
Your external portal uses multi-factor authentication (MFA) to authenticate users.
You plan to extend the on-premises authentication features to Azure and to migrate the SAP applications to Azure.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
Box 1: No
Need AD FS for MF
Note: Azure Active Directory (Azure AD) Pass-through Authentication allows your users to sign in to both on-premises and cloud-based applications using the same passwords. This feature is an alternative to Azure AD Password Hash Synchronization (see Box 2).
Box 2: Yes
Password hash synchronization is one of the sign-in methods used to accomplish hybrid identity. Azure AD Connect synchronizes a hash, of the hash, of a users password from an on-premises Active Directory instance to a cloud-based Azure AD instance.
Password hash synchronization is an extension to the directory synchronization feature implemented by Azure AD Connect sync.
You can use this feature to sign in to Azure AD services like Office 365. You sign in to the service by using the same password you use to sign in to your on-premises Active Directory instance.
Box 3: Yes
If your organization is federated with Azure AD, you can use Azure Multi-Factor Authentication to secure AD FS resources, both on-premises and in the cloud. Azure MFA enables you to eliminate passwords and provide a more secure way to authenticate.

NEW QUESTION # 285
You have an SAP landscape on Azure that contains the virtual machines shown in the following table.
You need to ensure that the Application Server role is available if a single Azure datacenter fails.
What should you include in the solution?

- A. a local network gateway
- B. Azure Private Link
- C. Azure Load Balancer Standard
- D. Azure Application Gateway v2

Answer: D

NEW QUESTION # 286
You deploy an SAP environment on Azure.
You need to ensure that incoming requests are distributed evenly across the application servers.

What should you use?

- A. SAP Solution Manager
- B. SAP Control
- C. Azure Monitor
- D. SAP Web Dispatcher

Answer: D

Explanation:
Explanation
The SAP Web Dispatcher (SWD) component is used as a load balancer for SAP traffic among the SAP application servers.

NEW QUESTION # 287
HOTSPOT
You are planning the Azure network infrastructure for an SAP environment.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.
Hot Area:

Answer:

Explanation:

Explanation:
Box 1: Yes
Box 2: No
A design that's not supported is the segregation of the SAP application layer and the DBMS layer into different Azure virtual networks that aren't peered with each other. We recommend that you segregate the SAP application layer and DBMS layer by using subnets within an Azure virtual network instead of by using different Azure virtual networks.
Box 3: Yes
Be aware that network traffic between two peered Azure virtual networks is subject to transfer costs. Huge data volume that consists of many terabytes is exchanged between the SAP application layer and the DBMS layer.
You can accumulate substantial costs if the SAP application layer and DBMS layer are segregated between two peered Azure virtual networks.

NEW QUESTION # 288
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: No
Box 2: Yes
The minimum SAP HANA certified conditions for the different storage types are:
Azure Premium SSD - /hana/log is required to be cached with Azure Write Accelerator. The /hana/data volume could be placed on Premium SSD without Azure Write Accelerator or on Ultra disk Box 3: Yes References:
https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/hana-vm-operations-storage

NEW QUESTION # 289
......

We can tell you with confidence that the AZ-120 practice materials are superior in all respects to similar products. First, users can have a free trial of AZ-120 test prep, to help users better understand the AZ-120 study guide. If the user discovers that the product is not appropriate for him, the user can choose another type of learning material. Respect the user's choice, will not impose the user must purchase the AZ-120 practice materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying AZ-120 exam.
