## CompTIA Cloud+ (2025) Sample Questions (Q348-Q353):

### NEW QUESTION # 348

A systems administrator has finished installing monthly updates to servers in a cloud environment. The administrator notices certain portions of the playbooks are no longer functioning. Executing the playbook commands manually on a server does not work as well. There are no other reports of issues. Which of the following is the MOST likely cause of this issue?

- A. Service overload
- B. Job validation issues
- C. Change management failure
- D. Patching failure
- E. Deprecated features

**Answer: E**

**NEW QUESTION # 349**

A video surveillance system records road incidents and stores the videos locally before uploading them to the cloud and deleting them from local storage. Which of the following best describes the nature of the local storage?

- A. Incremental
- B. Persistent
- C. Differential
- **D. Ephemeral**

**Answer: D**

Explanation:

The nature of the local storage in a video surveillance system that records road incidents and stores the videos locally before uploading them to the cloud and deleting them from local storage is ephemeral. Ephemeral storage is temporary and is designed to provide short-term storage for information that changes frequently or is not meant to be persistent. **NEW QUESTION # 350**

A cloud vendor notifies an administrator that the router version currently in use will no longer be made. Which of the following describes the stage the router has reached and what needs to be done?

- **A. The router has reached end of life. The router should be replaced.**
- B. The router has reached end of support. The router's software should be updated.
- C. The router has reached end of life. The router's software should be updated.
- D. The router has reached end of support. The router should be replaced.

**Answer: A**

Explanation:

When a product reaches end of life, it is no longer manufactured or supported by the vendor. The proper action is to replace the router with a supported model to ensure continued functionality, compatibility, and security updates.

**NEW QUESTION # 351**

Department supervisors have requested a report that will help them understand the utilization of cloud resources, make decisions about budgeting for the following year, and reduce costs. Which of the following are the most important requisite steps to create the report? (Select two).

- A. Set the desired retention of resource logs.
- B. Configure application tracing.
- **C. Enable resource tagging.**
- D. Configure metric threshold alerts.
- E. Integrate email alerts with ticketing software.
- **F. Configure the collection of performance/utilization logs.**

**Answer: C,F**

Explanation:

To create a report that helps understand the utilization of cloud resources, make budget decisions, and reduce costs, the most important steps are to enable resource tagging and configure the collection of performance/utilization logs. Resource tagging helps in categorizing and tracking costs by associating tags with resources, while performance/utilization logs are essential for analyzing resource usage over time. **NEW QUESTION # 352**

During a project kickoff meeting, the project manager wants to set expectations for all of the team members. Which of the following

actions should the project manager take to accomplish this goal?

- **A. Provide an overview of the project objectives and timeline**
- B. Assign tasks and responsibilities to the team members
- C. Develop a project communication plan
- D. Set a meeting cadence for the rest of the project

**Answer: A**

Explanation:

The kickoff meeting is held at the beginning of a project to set direction and expectations. The most important activity is to review the project objectives and overall timeline so everyone understands the project's scope and goals. Detailed assignments and communication planning are handled afterward in the execution and planning phases.
