

IT-Tests SC-900 Test Study Guide, Answer Microsoft SC-900 Practice Exam Questions

Pass Microsoft SC-900 Practice Test with Certs4Future - A Complete Guide

The Microsoft SC-900 certification is an entry-level security, compliance, and identity certification designed for individuals looking to validate their knowledge of Microsoft security solutions. Passing the [Microsoft SC-900 Practice Test](#) is crucial to achieving certification, and Certs4Future provides excellent study materials to help you succeed. In this guide, we will explore the best strategies for passing the Microsoft SC-900 exam, the benefits of using Certs4Future, and essential tips for effective exam preparation.

Understanding the SC-900 Exam

The **Microsoft Security, Compliance, and Identity Fundamentals (SC-900) exam** is designed to assess foundational knowledge of security principles within Microsoft Azure and Microsoft 365 environments. The exam consists of 40 to 60 multiple-choice questions and must be completed within 60 minutes. To pass, candidates need to score at least 700 out of 1000. The exam is priced at \$99 and is accessible to professionals worldwide.

This certification is ideal for IT professionals exploring security roles, business decision-makers interested in cybersecurity solutions, and students or beginners looking to **build a career in cloud security**. The SC-900 exam covers four primary areas, including security, compliance, and identity concepts; Microsoft identity and access management solutions; Microsoft security solutions; and Microsoft compliance solutions. Each of these areas requires a fundamental understanding of Microsoft security frameworks, cloud security strategies, and compliance regulations.

Microsoft Security Compliance and Identity Fundamentals Sample Questions (Q203-Q208):

NEW QUESTION # 203

Which Azure Active Directory (Azure AD) feature can you use to evaluate group membership and automatically remove users that no longer require membership in a group?

- A. managed identities
- B. conditional access policies
- C. Azure AD Identity Protection
- D. access reviews

Answer: D

Explanation:

Azure Active Directory (Azure AD) access reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments.

NEW QUESTION # 204

Match the types of Conditional Access signals to the appropriate definitions.

To answer, drag the appropriate Conditional Access signal type from the column on the left to its definition on the right. Each signal type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Conditional access signals	Answer Area
Device	<input type="text"/>
Location	<input type="text"/>
Sign-in risk	<input type="text"/>
User risk	<input type="text"/>

<input type="text"/>	The probability that an identity or account is compromised.
<input type="text"/>	The probability that an authentication request isn't authorized by the identity owner.

Microsoft

Answer:

Explanation:

Conditional access signals	Answer Area
Device	<input type="text"/>
Location	<input type="text"/>
Sign-in risk	<input type="text"/>
User risk	<input type="text"/>

<input type="text"/>	The probability that an identity or account is compromised.
<input type="text"/>	The probability that an authentication request isn't authorized by the identity owner.

Microsoft

NEW QUESTION # 205

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure Active Directory (Azure AD) is deployed to an on-premises environment.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is an identity and access management service.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Azure Active Directory (Azure AD) is deployed to an on-premises environment.	<input type="radio"/>	<input checked="" type="radio"/>
Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is an identity and access management service.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Graphical user interface, text, application, email Description automatically generated

Statements	Yes	No
Azure Active Directory (Azure AD) is deployed to an on-premises environment.	<input type="radio"/>	<input checked="" type="radio"/>
Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription.	<input checked="" type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is an identity and access management service.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

Box 2: Yes

Microsoft 365 uses Azure Active Directory (Azure AD). Azure Active Directory (Azure AD) is included with your Microsoft 365 subscription.

Box 3: Yes

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

NEW QUESTION # 206
