Our clients can have our 400-007 exam questions quickly. The clients only need to choose the version of the product, fill in the correct mails and pay for our 400-007 useful test guide. Then they will receive our mails in 5-10 minutes. Once the clients click on the links they can use our 400-007 Study Materials immediately. If the clients can't receive the mails they can contact our online customer service and they will help them solve the problem successfully. The purchase procedures are simple and the delivery of our 400-007 study tool is fast.

To prepare for the CCDE certification exam, candidates must have a thorough understanding of network design principles, including network topology, protocols, and technologies. They must also be familiar with network design methodologies, including the Cisco Lifecycle Services approach. Additionally, candidates must be able to demonstrate their ability to design complex networks that meet specific business requirements and are scalable, secure, and reliable.

Cisco Certified Design Expert (CCDE v3.0) Written Exam, also known as the Cisco 400-007 Exam, is a certification exam that tests the knowledge and skills of network design experts. 400-007 exam is designed to validate the candidate's expertise in the design of complex network solutions and architectures. Cisco Certified Design Expert (CCDE) Written Exam certification is highly respected in the industry and is a prerequisite for many high-level networking positions.

New Study 400-007 Questions, 400-007 Actual Questions

Keep making progress is a very good thing for all people. If you try your best to improve yourself continuously, you will that you will harvest a lot, including money, happiness and a good job and so on. The 400-007 preparation exam from our company will help you keep making progress. Choosing our 400-007 study material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. If you decide to buy our 400-007 study questions, you can get the chance that you will pass your 400-007 exam and get the certification successfully in a short time.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q298-Q303):

NEW QUESTION # 298
Refer to the exhibit.
Your company designed a network to allow server VLANs to span all access switches in a data center. In the design, Layer 3 VLAN interfaces and HSRP are configured on the aggregation switches. Which two features improve STP stability within the network design? (Choose two.)

- A. access switch pairs explicitly determined to be root and backup root bridges
- B. BPDU guard on the aggregation switch downlinks toward access switches
- C. edge port on access ports
- D. BPDU guard on access ports
- E. root guard on access ports
- F. root guard on the aggregation switch downlinks toward access switches

Answer: D,F

Explanation:
* A (BPDU Guard on access ports): Prevents accidental connection of switches or bridging devices on access ports, which could cause unexpected topology changes or loops.
* C (Root Guard on aggregation switch downlinks): Ensures access switches cannot send superior BPDUs to challenge aggregation switch root status, maintaining predictable STP root placement.
Why other options are incorrect:
* B: Aggregation downlinks are not normally configured with BPDU Guard (since they expect BPDUs from access switches).
* D: Root guard on access ports is unnecessary as those ports should not participate in STP.
* E: Edge port (Rapid STP concept) is good for faster convergence but doesn't address stability.
* F: STP root and backup root election is important but not a specific STP feature - this is a design decision, not a stability feature.

NEW QUESTION # 299
Refer to the exhibit.
This network is running legacy STP 802.1 d. Assuming "hello_timer" is fixed to 2 seconds, which parameters can be modified to speed up convergence times after single link/node failure?

- A. The max_age and forward delay parameters can be adjusted to speed up STP convergence process.
- B. Only the transit_delay and bpdu_delay timers are configurable parameters in 802.1d to speed up STP convergence process.
- C. The transit_delay=5 and dpdu_delay=20 are recommended values, considering helto_timer=2 and specified
- D. Only the maximum_transmission_halt_delay and diameter parameters are configurable parameters in 802. to speed up STP convergence process

Answer: A

NEW QUESTION # 300
When consumers that leverage IaaS reach 100% resource capacity, what can be used to redirect the overflow of traffic to the public cloud so there is no disruption to service?

- A. Cloud spill
- B. Cloud shaping
- C. Cloud bursting
- D. Cloud policing

Answer: C

Explanation:
Cloud Bursting is the process by which applications or workloads that run in a private cloud or data center environment are "bursted" into a public cloud infrastructure during high-demand periods. This prevents service degradation and ensures performance continuity without manual intervention.
In CCDE design strategy terms, this enables:
* Elastic scalability
* Cost-effective use of public infrastructure on-demand
* Seamless service delivery to end users
Options like "cloud policing" and "cloud shaping" are not standard terms, and "cloud spill" is not an established mechanism. "Cloud bursting" is the correct architectural mechanism that addresses this overflow requirement.

NEW QUESTION # 301
Drag and drop the correct mitigation methods from the left onto the corresponding types of attack on the right

Answer:

Explanation:

NEW QUESTION # 302
A network security team observes phishing attacks on a user machine from a remote location. The organization has a policy of saving confidential data on two different systems using different types of authentication. What is the next step to control such events after the security team verifies all users in Zero Trust modeling?

- A. Apply a context-based network access control policy for users.
- B. Ensure trustworthiness of devices.
- C. Enforce risk-based and adaptive access policies.
- D. Assess real-time security health of devices.

Answer: B

NEW QUESTION # 303
