SAFe-RTE Practice Exams, SAFe-RTE Latest Test Vce

By analyzing the syllabus and new trend, our SAFe-RTE practice engine is totally in line with this exam for your reference. So grapple with this chance, our SAFe-RTE learning materials will not let you down. With our SAFe-RTE Study Guide, not only that you can pass you exam easily and smoothly, but also you can have a wonderful study experience based on the diversified versions of our SAFe-RTE training prep.

Scaled Agile SAFe Release Train Engineer Sample Questions (Q164-Q169):

NEW QUESTION # 164

Why is a confidence vote held at the end of program increment (PI) planning?

- A. To build shared commitment to the plan
- B. To ensure the business owners accept the plan
- C. To hold the teams accountable if the Agile release train (ART) does not deliver on its commitment
- D. To remove the risks for the PI

Answer: A

Explanation:

The confidence vote held at the end of Program Increment (PI) planning within the Scaled Agile Framework (SAFe) serves several purposes:

- * It ensures that all team members are aligned with the PI objectives and understand their roles and responsibilities in achieving them.
- * It provides a quantitative and qualitative assessment of the confidence level that Agile Release Train (ART) members have in the

feasibility and successful execution of the PI objectives.

* It fosters a collaborative environment where team members can work together to address concerns, mitigate risks, and refine the PI plan.

* It empowers ART members to take ownership of the proposed PI objectives and hold each other accountable for their successful execution.

The confidence vote is expressed on a scale of 1 to 5, with 1 representing low confidence and 5 representing high confidence. If the average is three fingers or above, then management should accept the commitment. This process promotes transparency and collaboration by encouraging open dialogue and feedback among team members¹².

NEW QUESTION # 165

Which core competency helps foster faster lead time, faster recovery, fewer defects, and more frequent deployments?

- A. Lean-Agile Leadership
- **B. Agile Product Delivery**
- C. Team and Technical Agility
- D. Enterprise Solution Delivery

Answer: B

Explanation:

The core competency of Agile Product Delivery is pivotal in fostering faster lead time, quicker recovery from setbacks, fewer defects, and more frequent deployments within the SAFe framework. This competency focuses on delivering value through the continuous flow of valuable products and services to customers. It encompasses the principles and practices that help teams and ARTs deliver quality solutions to the market faster and more predictably. This includes the implementation of DevOps and Release on Demand, which are essential for achieving the mentioned outcomes¹.

NEW QUESTION # 166

When looking at a program board at the end of program increment (PI) planning, what does it mean when a feature is placed in a team's swim lane with no strings?

- A. That it has dependencies on teams in other Agile release trains (ARTs) or Solution Trains
- B. That the team has not broken the feature into stories yet and has not identified dependencies
- C. That the team has been assigned, but the feature's dependencies have not been identified yet
- **D. That the feature can be completed by that team independently**

Answer: D

NEW QUESTION # 167

How often should a system demo occur?

- A. After every other iteration
- B. After the end of each program increment (PI)
- **C. After every iteration**
- D. After every release

Answer: C

NEW QUESTION # 168

Teams are reporting a high level of success through their individual quantitative measurements, but the system results say otherwise. What should the Release Train Engineer do to help the teams deliver more value?

- A. Work with the team that is struggling the most to discover patterns that can be applied to the other teams
- **B. Coach the Scrum Masters on good retrospective techniques and ensure teams are defining and taking a systems view approach to improvements**
- C. Diagnose the differences between the measurements and the results and suggest improvement items to each team
- D. Share the quantitative measurement results with Product Management and leadership and ask for their input

Answer: B

Explanation:

When individual teams report high levels of success through their quantitative measurements, but the system results indicate otherwise, the Release Train Engineer (RTE) plays a crucial role in aligning team perceptions with actual system outcomes. Here's how an RTE can help the teams deliver more value:

- * Coach on Retrospective Techniques: The RTE can coach the Scrum Masters on effective retrospective techniques to ensure that teams can reflect on and improve their processes1.
- * Systems View Approach: Encourage teams to adopt a systems view approach to understand how their work fits into the larger context and impacts the overall system1.
- * Facilitate Problem-Solving Workshops: Organize problem-solving workshops during the Inspect and Adapt (I&A) events to collaboratively identify systemic issues and improvement actions2.
- * Encourage ART Synchronization: Assist teams in synchronizing with other teams on the Agile Release Train (ART) to ensure alignment and collective responsibility for delivering value1.
- * Drive Relentless Improvement: Emphasize the importance of relentless improvement and foster a culture where continuous growth is valued and pursued1.

By focusing on these areas, the RTE can help bridge the gap between individual team metrics and the broader system results, leading to improved value delivery across the ART.

NEW QUESTION # 169

.....

The web-based SAFe-RTE practice exam is similar to the desktop-based software. You can take the web-based SAFe-RTE practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based Scaled Agile SAFe-RTE Practice Exam. Both SAFe Release Train Engineer practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your SAFe Release Train Engineer practice exams according to your needs.
