

PSE-Cortex-Pro-24 Pass4sure Exam Prep - VCE PSE-Cortex-Pro-24 Dumps

BTW, DOWNLOAD part of Pass4SureQuiz PSE-Cortex-Pro-24 dumps from Cloud Storage: https://drive.google.com/open?id=1d_jqIC-cVEeFKIdFgFozbydZnsTg4ICQ

If you don't have enough time to study for your certification exam, Pass4SureQuiz provides Palo Alto Networks Systems Engineer Professional - Cortex PSE-Cortex-Pro-24 PDF Questions. You may quickly download Palo Alto Networks Systems Engineer Professional - Cortex PSE-Cortex-Pro-24 exam questions in PDF format on your smartphone, tablet, or desktop. You can Print Palo Alto Networks pdf questions and answers on paper and make them portable so you can study on your own time and carry them wherever you go.

The Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) certification exam which is not easy to crack. You have to put in some extra effort, and time and prepare thoroughly to pass the Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) exam. For the quick, complete, and comprehensive Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) exam dumps preparation you can get help from top-notch and easy-to-use PSE-Cortex-Pro-24 Questions.

Marvelous PSE-Cortex-Pro-24 Pass4sure Exam Prep - Pass PSE-Cortex-Pro-24 Exam

The Palo Alto Networks market has become so competitive and tough with time. To satisfy this task the professionals have to analyze new in-name for skills and improve their expertise. With the Palo Alto Networks PSE-Cortex-Pro-24 certification exam they could do that activity fast and well. Your examination training with Palo Alto Networks Certification Questions is our top priority at Pass4SureQuiz. To do this they just join up in Palo Alto Networks Systems Engineer Professional - Cortex (PSE-Cortex-Pro-24) certification exam and show a few firm dedication and self-discipline and prepare well to crack the PSE-Cortex-Pro-24 examination.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q130-Q135):

NEW QUESTION # 130

What is the result of creating an exception from an exploit security event?

- A. exempts administrators from generating alerts for 24 hours
- **B. disables the triggered EPM for the host and process involve**
- C. White lists the process from Wild Fire analysis
- D. exempts the user from generating events for 24 hours

Answer: B

NEW QUESTION # 131

On a multi-tenanted v6.2 Cortex XSOAR server, which path leads to the server.log for "Tenant1"?

- A. /var/log/demisto/Tenant1/server.log
- B. /var/lib/demisto/acc_Tenant1/server.log
- **C. /var/log/demisto/acc_Tenant1/server.log**
- D. /var/lib/demisto/server.log

Answer: C

Explanation:

Reference: <https://live.paloaltonetworks.com/twzvq79624/attachments/twzvq79624>

/Cortex_XSOAR_Release_Announcements/15/7/Multi-Tenant%206.1.pdf

In a multi-tenant setup, Cortex XSOAR organizes logs by tenant using a specific directory structure. The prefix acc_ (short for "account") is used to differentiate tenant-specific directories within the /var/log/demisto/ path. This convention helps in clearly segregating logs for different tenants, making it easier for administrators to manage and troubleshoot issues specific to each tenant.

On the other hand, /var/log/demisto

/Tenant1/server.log does not follow the standard naming convention used in multi-tenant environments for Cortex XSOAR, which includes the acc_ prefix to indicate tenant accounts.

NEW QUESTION # 132

Which source provides data for Cortex XDR?

- A. Amazon Alexa rank indicator
- **B. Linux endpoints**
- C. Cisco ACI
- D. VMware NSX

Answer: B

Explanation:

Reference: <https://www.paloaltonetworks.com/resources/datasheets/cortex-xdr>

NEW QUESTION # 133

What should be configured for a Cortex XSIAM customer who wants to automate the response to certain alerts?

- A. Correlation rules
- B. Data model rules
- **C. Playbook triggers**
- D. Incident scoring

Answer: C

Explanation:

To automate the response to certain alerts in Cortex XSIAM, playbook triggers should be configured. Playbooks allow automated workflows to be executed based on specific conditions or alerts, enabling faster and more consistent responses to security events.

NEW QUESTION # 134

What must a customer deploy prior to collecting endpoint data in Cortex XSIAM?

- **A. XDR agent**
- B. External dynamic list
- C. Playbook
- D. Broker VM

Answer: A

Explanation:

25 web pages

As a Palo Alto Cortex Professional, I'll provide a detailed explanation for Question 118: What must a customer deploy prior to collecting endpoint data in Cortex XSIAM? along with the reasoning and references based on Palo Alto Networks' official documentation and product knowledge.

C: XDR Agent

Cortex XSIAM (Extended Security Intelligence and Automation Management) is an AI-driven security operations platform designed to centralize and automate security operations across an enterprise, including endpoint, network, cloud, and identity data. To collect endpoint data specifically, Cortex XSIAM relies on the Cortex XDR Agent, which is a lightweight software component installed on endpoints (such as laptops, desktops, or servers). This agent is responsible for gathering telemetry data, monitoring endpoint activity, and enforcing security policies, which are then sent to the Cortex XSIAM cloud for analysis, detection, and response.

Here's why the XDR Agent is the correct choice and why the other options do not apply:

Option A: Playbook

* Explanation: A playbook in Cortex XSIAM (or its predecessor, Cortex XSOAR) is a predefined workflow that automates incident response tasks, such as investigating alerts or remediating threats.

While playbooks are critical for automation and orchestration, they are not involved in the initial collection of endpoint data.

Playbooks operate on data that has already been collected and ingested into the system. Therefore, deploying a playbook is not a prerequisite for collecting endpoint data.

* Conclusion: Incorrect.

Option B: Broker VM

* Explanation: The Broker VM is an optional component in the Cortex ecosystem that can be deployed to enhance connectivity and functionality, such as acting as a proxy for endpoints to communicate with the Cortex cloud, collecting logs, or running additional services. While it can facilitate data forwarding or log collection in certain scenarios (e.g., from third-party sources), it is not a mandatory requirement for collecting endpoint data directly from devices managed by Cortex XSIAM. The XDR Agent can communicate with the Cortex cloud independently without a Broker VM.

* Conclusion: Incorrect.

Option C: XDR Agent

* Explanation: The Cortex XDR Agent is the core component required to collect endpoint data in Cortex XSIAM. It is installed on supported endpoints (e.g., Windows, macOS, Linux, or Android devices) and performs several key functions:

* Data Collection: Gathers detailed telemetry, including process execution, file activity, network connections, and system events.

* Prevention: Blocks exploits, malware, and fileless attacks using AI-driven techniques.

* Detection and Response: Provides real-time data to the Cortex cloud for advanced analytics and incident investigation. Without the XDR Agent deployed on endpoints, Cortex XSIAM cannot collect the necessary data to monitor, detect, or respond to endpoint-based threats. This makes it the essential prerequisite for endpoint data collection.

* Conclusion: Correct.

Option D: External Dynamic List (EDL)

* Explanation: An External Dynamic List (EDL) is a feature in Palo Alto Networks' ecosystem used to import and manage dynamic lists of indicators (e.g., IP addresses, URLs, or domains) for use in security policies or threat intelligence. While EDLs can enhance threat detection by providing additional context, they are not involved in the process of collecting endpoint data. They are a supplementary tool rather than a requirement for data collection.

* Conclusion: Incorrect.

References from Palo Alto Networks:

* Cortex XSIAM Datasheet (Palo Alto Networks):

* "Cortex XSIAM unifies best-in-class security operations functions, including Endpoint Detection and Response (EDR)... The platform leverages the Cortex XDR Agent to prevent endpoint attacks and collect full telemetry for detection and response."

* This highlights the XDR Agent's role as the mechanism for endpoint data collection.

- * Cortex XSIAM Solution Brief (Palo Alto Networks):
- * "XSIAM requires the deployment of the XSIAM Endpoint Agent to appropriate and compatible endpoints to collect telemetry and enforce security."
- * This directly ties the agent to the data collection process.
- * Cortex XDR Agent Documentation (Palo Alto Networks Cortex Documentation Portal):
- * The agent is described as "a lightweight agent that stops threats with Behavioral Threat Protection, AI, and cloud-based analysis while collecting endpoint telemetry for extended detection and response."
- * Available at: docs-cortex.paloaltonetworks.com
- * What is Cortex XSIAM? (Palo Alto Networks Website):
- * "Endpoint Protection Platform (EPP): Prevents endpoint attacks with a proven endpoint agent that blocks exploits, malware, and fileless attacks and collects full telemetry for detection and response."
- * This reinforces the agent's foundational role in endpoint data collection.

NEW QUESTION # 135

.....

One of the advantages of our PSE-Cortex-Pro-24 study material is that it has various versions. There are includes PDF, APP and Practice exam software. Every version has their feature. PSE-Cortex-Pro-24 PDF can download as a document in your smart devices and lug it along with you, it makes your PSE-Cortex-Pro-24 prepare more convenient. PSE-Cortex-Pro-24 App is unlimited use of equipment, support for any electronic device, but also support offline use, while the Practice exam software creates is like an actual test environment for your PSE-Cortex-Pro-24 Certification Exam. The software also sets up time and mock examination functions. You can set a timer for simulation tests to help you complete our PSE-Cortex-Pro-24 Practice in an effective time, which will help you adjust the speed and vigilance in real exams.

VCE PSE-Cortex-Pro-24 Dumps: <https://www.pass4surequiz.com/PSE-Cortex-Pro-24-exam-quiz.html>

Earning PSE-Cortex-Pro-24 certification credentials is easy, in first attempt, with the help of products, Palo Alto Networks PSE-Cortex-Pro-24 Pass4sure Exam Prep We promise that you can get through the challenge within a week, Palo Alto Networks PSE-Cortex-Pro-24 Pass4sure Exam Prep You need only to click on the internet and enjoy a real classroom environment through your PC at home, Once you have used our PSE-Cortex-Pro-24 exam training guide in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use PSE-Cortex-Pro-24 exam training at your own right.

Have Errata to Submit, Smoke detectors do not react to heat but use one of two common sensor designs to detect smoke, Earning PSE-Cortex-Pro-24 Certification credentials is easy, in first attempt, with the help of products.

Key Features of Palo Alto Networks PSE-Cortex-Pro-24 PDF Questions By Pass4SureQuiz

We promise that you can get through the challenge within PSE-Cortex-Pro-24 a week, You need only to click on the internet and enjoy a real classroom environment through your PC at home.

Once you have used our PSE-Cortex-Pro-24 exam training guide in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use PSE-Cortex-Pro-24 exam training at your own right.

Once you establish your grip on Pass4SureQuiz's PSE-Cortex Professional PSE-Cortex-Pro-24 exam dumps PDF, the real exam questions will be a piece of cake for you.
