Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q303-Q308):

NEW QUESTION # 303

Which data flow describes redistribution of user mappings?

- A. firewall to firewall
- B. Domain Controller to User-ID agent
- C. User-ID agent to Panorama
- D. User-ID agent to firewall

Answer: A

Explanation:

<https://www.paloaltonetworks.com/documentation/71/pan-os/pan-os/user-id/configure-firewalls-to-redistribute-user-mapping-information>

<https://docs.paloaltonetworks.com/pan-os/8-1/pan-os-admin/user-id/deploy-user-id-in-a-large-scale-network/redistribute-user-mappings-and-authentication-timestamps/firewall-deployment-for-user-id-redistribution.html#idc3661b46-4722-4936-bb9b-181679306809>

NEW QUESTION # 304

Which statement accurately describes service routes and virtual systems?

- A. The interface must be used for traffic to the required external services
- B. Virtual systems cannot have dedicated service routes configured: and virtual systems always use the global service and service route settings for the firewall
- C. Virtual systems can only use one interface for all global service and service routes of the firewall
- D. Virtual systems that do not have specific service routes configured inherit the global service and service route settings for the firewall

Answer: C

Explanation:

"When a firewall is enabled for multiple virtual systems, the virtual systems inherit the global service and service route settings." So you can define specific service routes if you want, but they start out as inherited from the global settings.

NEW QUESTION # 305

An administrator encountered problems with inbound decryption. Which option should the administrator investigate as part of triage?

- A. Firewall connectivity to a CRL
- B. Root certificate imported into the firewall with "Trust" enabled
- C. Importation of a certificate from an HSM
- D. Security policy rule allowing SSL to the target server

Answer: D

NEW QUESTION # 306

A company has a PA-3220 NGFW at the edge of its network and wants to use active directory groups in its Security policy rules. There are 1500 groups in its active directory. An engineer has been provided 800 active directory groups to be used in the Security

policy rules.

What is the engineer's next step?

- A. Create a Group Mapping with 800 groups in the Group Include List.
- B. Create a Group Include List with the 800 Active Directory groups.
- C. Create two Group Mappings, each with 400 groups in the Group Include List.
- **D. Create two Group Include Lists, each with 400 Active Directory groups.**

Answer: D

NEW QUESTION # 307

After configuring HA in Active/Passive mode on a pair of firewalls the administrator gets a failed commit with the following details.

What are two explanations for this type of issue? (Choose two)

- A. The peer IP is not included in the permit list on Management Interface Settings
- **B. Either management or a data-plane interface is used as HA1-backup**
- **C. The Backup Peer HA1 IP Address was not configured when the commit was issued**
- D. One of the firewalls has gone into the suspended state

Answer: B,C

Explanation:

Cause The issue is seen when the HA1-backup is configured with either management (MGT) or an in-band interface. The "Backup Peer HA1 IP Address" is not configured : https://knowledgebase.paloaltonetworks.com/KCSArticleDetail?id=kA14u0000008UmPCAU&lang=en_US%E2%80%A9

NEW QUESTION # 308

.....
