

SAP C-CPI-2506合格率: SAP Certified Associate - Integration Developer - Xhs1991最も信頼できるウェブサイト

Xhs1991 はプロなウェブサイトで、受験生の皆さんに質の高いサービスを提供します。プリセールスサービスとアフターサービスに含まれているのです。Xhs1991のSAPのC-CPI-2506試験トレーニング資料を必要としたら、まず我々の無料な試用版の問題と解答を使ってみることができます。そうしたら、この資料があなたに適用するかどうかを確かめてから購入することができます。Xhs1991のSAPのC-CPI-2506試験トレーニング資料を利用してから失敗になりましたら、当社は全額で返金します。それに、一年間の無料更新サービスを提供することができます。

SAP C-CPI-2506 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
トピック 2	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
トピック 3	SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

- **SAP Integration Suite Overview:** This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

初めて練習を選ぶことは、ギャンブルをすることに少し似ていると思うかもしれません。ただし、C-CPI-2506学習クイズでは、参考になる無料のデモと、バックアップとしてのプロのエリートが用意されています。彼らは、C-CPI-2506トレーニング資料で発生したエラーについて妥協しない検閲エリートの集まりです。そのため、彼らの正解率は信じられないほど高く、試験の受験者の98%以上が合格しました。あなたのように成功することに熱心な熱心な受験者に試験の知識を伝えることで、彼らはそれを助けを提供する責任として扱います。そのため、情報の特性に従って次のC-CPI-2506学習ガイドを入手できる場合は、目覚ましい進歩を遂げてください。

SAP Certified Associate - Integration Developer 認定 C-CPI-2506 試験問題 (Q24-Q29):

質問 # 24

Which of the following does SAP Graph provide?

- **A. Unified view of SAP-managed business data**
- B. Unified cache of SAP-managed business data
- C. Abstraction of business data for end users

正解: A

解説:

SAP Graph provides a unified API layer that offers a business-centric, semantically harmonized view of SAP-managed data across multiple SAP solutions (e.g., S/4HANA, SuccessFactors, Ariba).

It does not cache data; instead, it provides real-time access.

It is not only an abstraction for end users, but specifically designed as a unified view for developers and applications.

Thus, the correct answer is Unified view of SAP-managed business data.

質問 # 25

Which of the following capabilities within SAP Integration Suite are core for integration? Note: There are 3 correct answers to this question.

- **A. API Management**
- B. Open Connectors
- **C. Cloud Integration**
- D. Integration Advisor
- **E. Integration Assessment**

正解: A、C、E

解説:

The following capabilities within SAP Integration Suite are core for integration: Integration Assessment, Cloud Integration, and API Management. Integration Assessment allows you to evaluate your integration landscape and strategy and identify the best-fit integration technologies and tools for your scenarios. Cloud Integration allows you to design, deploy, and monitor integration flows between cloud and on-premise systems using various adapters and protocols. API Management allows you to create, publish, secure, and monitor APIs across different environments and platforms. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

質問 # 26

You have created a product based on an API proxy, but you have not published the product yet. What is a consequence?

- A. The product is displayed in the API Business Hub Enterprise with the note "not published".
- **B. The product is not displayed in the API Business Hub Enterprise.**
- C. The product is displayed in the API Business Hub Enterprise but is grayed out.

正解: B

解説:

In API Management (part of SAP Integration Suite), when you create an API Product (which bundles API Proxies for consumption):

Publishing is required before it becomes visible in API Business Hub Enterprise (Developer Portal).

If the product is not yet published, it remains in the design-time environment and is invisible to app developers.

Only published products are available for subscription and discovery.

Other options:

The product will not be shown grayed out or with a "not published" note; it simply won't be visible at all in the Business Hub Enterprise.

質問 # 27

Which functionalities are used by OData?

- A. TCP, AtomPub, and JSON
- **B. HTTP, AtomPub, and JSON**
- C. SOAP, AtomPub, and JSON

正解: B

解説:

OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: [Introducing OData - SAP Learning](#), [OData Overview](#) | [OData - The Best Way to REST](#)

質問 # 28

Which expression language can you use to access the content of a message in an integration flow?

- A. XML expression language
- **B. Simple expression language**
- C. Spring expression language
- D. JavaScript expression language

正解: B

解説:

In SAP Cloud Integration, the runtime message content, headers, and properties can be accessed using the Camel Simple Expression Language.

Examples:

`${body}` # Accesses the message payload.

`${header.<headerName>}` # Accesses message headers.

`${property.<propertyName>}` # Accesses integration properties.

Other options:

XML expression language # Not supported directly.

Spring expression language # Used in Spring apps, not in SAP CPI.

JavaScript expression language # Not used; JavaScript/Groovy scripts exist, but not for message expressions.

Thus, the correct language is Simple expression language.
